Natural Resources Law Elena Blanco, Jona Razzaque, 2011-01-01 This book is a very welcome addition to publications on globalisation and natural resources management. It adopts a very broad approach to this important subject; it includes the general issues such as trade and investment. It deals with very complex questions of permanent sovereignty over natural resources, the right to development, the role of indigenous peoples in resource management. This publication also provides the reader with general underlying principles and approaches to natural resources management such as sustainable use, the precautionary principle, the principle of common but differentiated responsibilities and the ecosystem approach, regulatory approach etc. The book is very analytical and gives a lot of food for thought for readers. Malgosia Fitzmaurice, Queen Mary University of London, UK. The book is the first of its kind to deal in depth with complex cross-cutting issues relating to globalization and natural resources. The authors demonstrate not only a broad range of knowledge but also provides deep insights into what will be needed to make the transition from economic globalization to sustainable globalization, including improved resource efficiency and sustainable development and inclusive and participatory governance. In particular, the authors consider specific approaches in such sectors as water resources, renewable energy and biological resources. The book has carefully documented and analyzed numerous international, regional and national legal frameworks as well as relevant theories and principles. It is a must for every law library as well as for policy makers, administrators, academics, non-governmental bodies and civil societies. We owe a great debt to the authors for their painstaking comprehensive research. Koh Kheng Lian, National University of Singapore. Globalization as a means of aptly capturing political, social, cultural and above all else economic phenomena has been well documented and the subject of a multitude of comment. What has perhaps been less well studied is its relationship with natural resource management. Thus this work by Merino Blanco and Razzaque is to be commended. Moreover, by focusing on globalization, an important truth is revealed. It is neither about the diminution of the role of the State nor the ascendancy of the multinational corporation but rather a more nuanced and complex interaction which we are only beginning to appreciate. This book is an important contribution to that debate. Duncan French, University of Sheffield, UK. While sustainable development requires State regulation of the exploitation of natural resources, globalisation as originally conceived pushed for free and unfettered markets, creating a fundamental tension between the two approaches. This book attempts to find a way towards their reconciliation with inspiring results. The book explores many themes, especially how globalisation may contribute to the solution of the problems it has caused by helping to empower non-state actors around the world so that the international decision-making processes become more inclusive, transparent and oriented towards sustainable development. Ximena Fuentes, Universidad Alonso Ibanez, Chile and ILA Co-Rapporteur on the Commission on Sustainable Development. This book examines the complex relationships between trade, human rights and the environment within natural resources law. It discusses key theories and challenges whilst exploring the concepts and approaches available to manage crucial natural resources in both developed and developing countries. Primarily aimed at

undergraduates and postgraduates it includes exercises questions and discussion topics for courses on globalisation and or natural resources law as well as an ample bibliography for those interested in further research The book will therefore serve as an invaluable reference tool for academics researchers and activists alike      *Comparative Environmental and Natural Resources Law* Sandra Beth Zellmer,2013 With increasing globalization comparative law has become increasingly more relevant in recent years Climate change transboundary pollution biodiversity loss and the emerging field of environmental human rights make comparative environmental law especially compelling This coursebook provides a comparative look at environmental and natural resource laws governing water waste biological diversity wildlife and habitat and environmental assessment It focuses on the United States Canada England New Zealand and India The first four countries are chosen for comparative analysis because of their common cultural roots yet divergent environmental problems and strategies The first three countries the U S Canada and England have taken media specific and somewhat fragmented approaches to water waste and wildlife issues while New Zealand has made path breaking efforts to adopt a more holistic ecosystem based approach to pollution prevention and sustainable development The fifth nation India is a country deeply influenced by England but charting its own course as an emerging economic giant whose growth poses significant implications for biological diversity climate and the environment The book is suitable as a text for law classes and seminars as well as other types of graduate and undergraduate courses It includes case studies on specific environmental and resource management problems to enable students to take a hands on problem solving approach and to compare and contrast outcomes under the laws of various nations      Reimagining Environmental and Natural Resources Law ,2021 In ELI s 50th anniversary year we undertook a project in partnership with the Environmental and Energy Law Program at George Washington University School of Law to review the state of environmental law and reimagine what law might need to look like in the years ahead if we are to achieve a more sustainable future Key to this endeavor were several meetings that we convened of natural resources legal scholars and leaders from the community of practitioners to discuss the critical issues that will define the next 50 years of environmental and natural resources law starting with convenings at the Wingspread Conference Center in Racine Wisconsin in March 2019 and at Airlie House Conference Center in Warrenton Virginia in November 2019 Page 2
