Environmental And Social Impact Assessment:

Methods of Environmental and Social Impact Assessment Riki Therivel, Graham Wood, 2017-09-13 Environmental and social impact assessment ESIA is an important and often obligatory part of proposing or launching any development project. Delivering a successful ESIA needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required. Riki Therivel and Graham Wood bring together the latest advice on best practice from experienced practitioners to ensure an ESIA is carried out effectively and efficiently. This new edition explains how an ESIA works and how it should be carried out, demonstrates the links between socio-economic, cultural, environmental and ecological systems and assessments, incorporates the World Bank's IFC performance standards and best practice examples from developing as well as developed countries, includes new chapters on emerging ESIA topics such as climate change, ecosystem services, cultural impacts, resource efficiency, land acquisition and involuntary resettlement. Invaluable to undergraduate and MSc students of ESIA on planning, ecology, geography and environment courses, this internationally oriented fourth edition of *Methods of Environmental and Social Impact Assessment* is also of great use to planners, ESIA practitioners and professionals seeking to update their skills. *Environmental and Social Impact Assessment* Christopher J. Directions in Social Impact Assessment Frank Vanclay, Ana Maria Esteves, 2011-01-01 This book should be read by anyone commissioning impact assessments who wants to build their understanding of the more progressive and innovative end of the topic. A job well done in the eyes of stakeholders and regulators requires proper social analysis. Jon Samuel Head of Social Performance, Anglo American. The list of authors reads like a who's who in SIA. Academics and practitioners are equally represented among the authors. The book provides a good mix of broad theoretical concepts and specific practical topics. Martin Haeefele, Manager, Environmental Impact Assessment at Mackenzie Valley Environmental Impact Review Board, Yellowknife, Northwest Territories, Canada. This book gives a very broad overview of where Social Impact Assessment is coming from, where it is now and where it could go, from an impact assessment tool to an impact management tool. It provides a realistic insight into both the achievements and the struggles of Social Impact Assessment. A recommended read for both those interested in Social Impact Assessment and those in related domains where social issues are gaining increasing importance, such as Environmental Assessment and Sustainability Appraisal. Rob Verheem, Deputy Director, Netherlands Commission for Environmental Assessment. This important new book outlines current developments in thinking in the field of Social Impact Assessment (SIA). It advances the theory and practice of SIA and argues that a dramatic shift is required in the way socioeconomic studies and community participation is undertaken. The book emphasizes that much more than the act of predicting impacts in a regulatory context, SIA needs to be the process of managing the social aspects of development and that there needs to be a holistic and integrated approach to impact assessment. It stresses that greater attention needs to be given to ensuring that the goals of development are attained and enhanced. This significant addition to the literature will be
