Chemometrics Fabiano André Narciso Fernandes, Sueli Rodrigues, Elenilson Godoy Alves Filho, 2024-06-26 Chemometrics Data Treatment and Applications demonstrates the best practices for treating real world analytical instrument data and how to apply chemometrics to this data Rather than focusing on the mathematical theory involved in chemometrics this book is meant for the industrial chemist and academics and advanced students that want to use chemometrics in practice Case studies on several applications are presented Unlike existing literature this book focuses on best practices practical realities and challenges when treating data rather than on the mathematical theory It also provides basic information on chemometrics several chapters on how to treat and the best practices used to treat data from different analytical instruments as well as case studies and uses of chemometrics in different fields The book is written primarily for analytic chemists as practitioners in analytical laboratories and other industries It will also be useful to academics and graduate masters and postdoc students chiefly working in analytical chemistry who want to improve the practical aspects of their research activities Presents topical and important chapters for the most used analytical instruments Focuses on practical issues in the implementation of chemometrics Examines advances in the application of chemometrics in several fields Includes frank perspectives on what works well for the data of a certain analytical instrument given the multiple choices of mathematical models and protocols that can be applied Covered protocols are heavily illustrated with case studies showing their potential use and the advances in chemometrics **Chemometric Methods in Forensic Science** Vishal Sharma, Georgina Sauzier, Simon W. Lewis, 2023-12-20 Chemometrics or the application of multivariate statistics to chemical data provides

informative and statistically valid analyses within a forensic context and there has been an increase in the use of chemometrics to characterise forensic exhibits Introducing chemometric methods suitable for forensic practitioners this book fills a gap in the literature outlining how such methods are applied to forensic casework what limitations to these approaches exist and future trends emerging in the field The book highlights how chemometric methods may be applied to different areas of forensic science enabling more confident and transparent decision making based on quantitative approaches It is divided into various sections which include a background to chemometrics types of chemometric methods their applications in various disciplines of forensic science and emerging trends in the field The detailed discussion of chemometric methods used for the examination of forensic exhibits outlines their advantages limitations and efficiency Providing a centralised source of information addressing the above aspects and suitable for forensic practitioners researchers and stakeholders this book is written for MSc Forensic Science courses and more broadly applications in the biological chemical and physical sciences *Applications of Advanced Oxidation Processes (AOPs) in Drinking Water Treatment* Antonio Gil, Luis Alejandro Galeano, Miguel Ángel Vicente, 2018-07-03 This volume reviews the drinking water treatments in which AOPs display a high

application potential Firstly it reveals the typical supply sources and limitations of conventional technologies and critically reviews natural organic matter characterization and removal techniques focusing mainly on AOP treatments It then explores using AOPs for simultaneous inactivation disinfection of several types of microorganisms including highly resistant Cryptosporidium protozoa Lastly it discusses relevant miscellaneous topics like the most promising AOP solid catalysts the regime change of Fenton like processes toward continuous reactors the application of chemometrics for process optimization the impact on disinfection byproducts and the tracing of toxicity during AOP treatments This work is a useful reference for researchers and students involved in water technologies including analytical and environmental chemistry chemical and environmental engineering toxicology biotechnology and related fields It is intended to encourage industrial and public health scientists and decision makers to accelerate the application of AOPs as technological alternatives for the improvement of drinking water treatment plants
