Environmental Control Of Plant Growth:

Environmental Control of Plant Growth; Proceedings L. T. (Ed.). EVANS, 1974 The concept of a phytotron The physics of plant environments The environment of plant surfaces Climatic control of plant water relations Energy and water balance of plant communities Light relations in plant communities Gas exchange in plant communities Climatic control of photosynthesis and respiration Energy relations in plant communities Effect of climate on the distribution and translocation of assimilates The mediation of climatic effects through endogenous regulating substances Effects of environment on metabolic patterns Endogenous rhythms in controlled environments Control of plant growth by light Climatic control of germination Bud break and dormancy Climatic control of reproductive development Morphogenetic responses to climate Climate weather and plant yield Hardiness and the survival of extremes a uniform system for measuring resistance and its two components The genetic basis of climatic response Species and population differences in climatic response Achievements challenges and limitations of phytotrons Extrapolation from controlled environments to the field *Environmental Control of Plant Growth* L.T. Evans, 2012-12-02 Environmental Control of Plant Growth consists of the proceedings of a symposium held at Canberra Australia in August 1962 The symposium aims to consider the natural microenvironments of plants and the associations between natural and controlled environments It also considers the physiological and genetic bases of responses by plants to environmental conditions The book contains 24 chapters and discusses the physics of plant environment as well as the physical quantities within plant air layers It also elucidates the energy and water balance light relations gas exchange and energy relations in plant communities The book also looks into the respiration of various organs and of whole plants Lastly the effects of the environment including climatic factors on the metabolism of plant cells are addressed

Environmental control of plant growth : proceedings L. T. Evans, 1963 **Environmental Control of Plant Growth : Proceedings of a Symposium Held at Canberra, Australia, August, 1962** L. T. Evans, 1967 **Environmental Control of Plant Growth** L. T. Evans, 1963 **Automation and environmental control in plant tissue culture** Jenny Aitken-Christie, T. Kozai, M.A.L Smith, 2013-06-29 Automation and Environmental Control in Plant Tissue Culture rigorously explores the new challenges faced by modern plant tissue culture researchers and producers worldwide issues of cost efficiency automation control and optimization of the in vitro microenvironment This book achieves a critical balance between the economic engineering and biological viewpoints and presents well balanced unique and clearly organized perspectives on current initiatives in the tissue culture arena Each chapter offers guidelines leading towards an exhaustive unprecedented level of control over in vitro growth based on emerging technologies of robotics machine vision environmental sensors and regulation and systems analysis Unlike other tissue culture books which focus on specific crops and techniques this book spans the broad range of major tissue culture production systems and advances evidence on how some underrated aspects of the process actually determine the status of the end product Key researchers from industry and academia have

joined to give up to date research evidence and analysis The collection comprises an essential reference for industrial scale tissue culture producers as well as any researcher interested in optimizing in vitro production *Environment and the Experimental Control of Plant Growth* R.J. Downs,2012-12-02 *Environment and the Experimental Control of Plant Growth* centers on the general role of environmental factors in plant growth and methods of providing the desired levels and limit of control The book is organized into seven chapters focusing on the various factors in the environment such as temperature light carbon dioxide and water It also describes the controlled environments for plant research This book will help biologists understand what he is buying or constructing in terms of environment variability in plant growth facilities It will also provide some help and guidance to those who have encountered the problem of not obtaining the degree of control they have expected in the units they have in hand **Symposium on Environmental Control of Plant Growth ,1962**

Environmental Control of Plant Growth; Proceedings of a Symposium Held At Canberra, Australia, August, 1962 L. T. Evans (Ed),1965 **Mathematical and Control Applications in Agriculture and Horticulture** W. Day,Yasushi Hashimoto,2014-07-04 This title provides a general overview of recent developments and research into types of systems and their uses in the agricultural and horticultural industry 64 papers are included containing both theoretical models and applied examples for greenhouse systems harvesting technology and plant factory systems **Inventory of Federal Energy-related Environment and Safety Research for ... ,1978** **Symposium on Environmental Control of Plant Growth, Canberra, 1962** L. T. Evans,1963 **Inventory of Federal Energy-related Environment and Safety Research for FY 1977** United States. Department of Energy. Environmental Impacts Division,1978 **Plant Production for Sustainable Society as a Semi-closed Ecosystem** Yoshiaki Kitaya,2024-06-29 This book introduces the concept of a semi closed ecosystem which is necessary for the social implementation of plant production such as agriculture in harmony with the environment While aiming at achieving a sustainable balance of human activities and environmental protection this book focuses on the material cycle within each semi closed system listed below 1 Mangrove forests as semi closed systems in coastal ecosystems 2 Environmental control in facility based plant production systems as semi closed systems 3 Control of the gaseous environment in the root zone as a semi closed system 4 Controlled ecological life support system as a completely closed ecosystem in space 5 A sustainable balance of human activities and environmental conservation in urban ecosystems Developing efficient food production with less environmental loads is an important issue Plant production is vital to human health and welfare especially in urban areas as semi closed ecosystems Producing food efficiently under consideration of environmental protection is necessary with material cycling systems especially in semi closed ecosystems Establishing a resource recycling production system with reduced waste emissions has also become important in agriculture Plant production will play an important role not only in food production Goal 2 in SDGs but also in many other goals This book explains how we must regard plant production as semi closed ecosystems reduce material and energy resource inputs and

recycle waste emissions generated during production and consumption processes to solve the various issues Students and researchers studying Agricultural Environmental Engineering Environmental and Ecological Engineering Systems Design for Sustainable Society Environmental Control in Agriculture etc will find this publication a helpful reference

High-Tech and Micropropagation I Y. P. S. Bajaj, 2012-12-06 Presented here is another classic from this series and deals with general aspects of micropropagation of plants for commercial exploitation It includes chapters on setting up a commercial laboratory meristem culture somatic embryogenesis factors affecting micropropagation disposable vessels vitrification acclimatization induction of rooting artificial substrates cryopreservation and artificial seed Special emphasis is given on modern approaches and developing technologies such as automation and bioreactors robots in transplanting artificial intelligence information management and computerized greenhouses for en masse commercial production of plants

Controlled Environment Horticulture: Where Plant Biotechnology Meets Sustainable Future Hemant Bagul, Nikita Patel, T. R. Ahlawat, R. Krishnamurthy, Stephen Oyediji, 2025-09-16 A comprehensive exploration into the convergence of advanced plant science engineering and biotechnology to revolutionize food production in controlled environments As global challenges such as climate change population growth and resource scarcity intensify this book highlights the transformative potential of controlled environment horticulture CEH in building a more resilient and sustainable food future The volume covers a wide range of topics including smart greenhouse technologies precision agriculture vertical farming bioreactor based plant production and gene edited crops optimized for indoor systems It integrates biological advances with technological innovations to improve yield quality and resource efficiency in horticultural practices By blending plant biotechnology with environmental control strategies the book serves as a roadmap for sustainable intensification in horticulture Key features

- Explores integration of genomics phenotyping and controlled environments
- Demonstrates the use of sensors AI and automation in smart horticultural systems
- Addresses energy efficient lighting water use and nutrient management
- Highlights sustainability metrics and circular economy practices
- Provides case studies on commercial CEA models and innovation pathways
