Environmental Design Research Directions Process And Prospects:

Environmental Design Research Directions Gary T. Moore, D. Paul Tuttle, Sandra C. Howell, 1985 **Environmental Design** Avigail Sachs, 2018-08-15 Much of twentieth century design was animated by the creative tension of its essential duality is design an art or a science In the postwar era American architects sought to calibrate architectural practice to evolving scientific knowledge about humans and environments thus elevating the discipline's stature and enmeshing their work in a progressive restructuring of society This political and scientific effort was called environmental design a term expanded in the 1960s to include ecological and liberal ideas In her expansive new study Avigail Sachs examines the theoretical scaffolding and practical legacy of this professional effort Inspired by Lewis Mumford's 1932 challenge enjoining architects to go beyond visual experimentation and create complete human environments *Environmental Design* details the rise of modernist ideas in the architectural disciplines within the novel context of sociopolitical rather than aesthetic responsibilities Unlike today's architects environmental designers saw themselves as orchestrators of decision making more than auteurs of form and style Viewing architectural practice as rooted in Progressive Era politics and the democratic process rather than the European avant garde Sachs plots how these social concepts spread via influential architecture schools This rich examination of pedagogy and practice is a map to both the history of environmental design and the contemporary consequences of architecture understood as a pressing social concern **Building Evaluation** Wolfgang F.E. Preiser, 1989-09-30 Based on the Symposium on Advances in Building Evaluation Knowledge methods and Applications held as part of the Tenth Biannual Conference of the International Association for the Study of People and Their Physical Surroundings July 5-8 1988 in Delft The Netherlands *Virtual Reality and Its Application in Education* Dragan Cvetković, 2021-01-14 Virtual reality is a set of technologies that enables two way communication from computer to user and vice versa In one direction technologies are used to synthesize visual auditory tactile and sometimes other sensory experiences in order to provide the illusion that practically non-existent things can be seen heard touched or otherwise felt In the other direction technologies are used to adequately record human movements sounds or other potential input data that computers can process and use This book contains six chapters that cover topics including definitions and principles of VR devices educational design principles for effective use of VR technology education and use of VR in technical and natural sciences **Toward the Integration of Theory, Methods, Research, and Utilization** Gary T. Moore, Robert W. Marans, 2013-03-09 This fourth volume in the *Advances in Environment Behavior and Design* series continues the intent of earlier volumes by exploring new directions in the multidisciplinary environment behavior EB or EBS field The series is organized around a framework of theory methods research and utilization that some say has defined the field for the past 15 years This fourth volume is devoted to chapters that explore the integration of theory quantitative and qualitative research and utilization in policy planning and architecture The authors selected for this volume exemplify the multidisciplinary

character of the field they have been selected from architecture environmental psychology environmental studies housing research landscape architecture social anthropology social ecology urban design and urban planning from academe and practice and from Australia Europe and North America HISTORY OF THE ADVANCES SERIES The idea for the series emerged in 1983 at meetings of the Board of Directors of the Environmental Design Research Association EDRA Several publishers were contacted about the possibility of an EDRA Annual Review Eliot Werner at Plenum Press expressed great interest but suggested that an Advances series would be more appropriate since publication could be tied to a less specific timetable EDRA Plenum and the editors signed a contract in June 1984 for three volumes with an open door for oral agreements between Plenum and the editors after that time Four volumes have been published Volume 1 1987 Volume 2 1989 Volume 3 1991 and the current Volume 4 each containing 10 to 12 chapters

Building Access Aimi Hamraie, 2017-11-01 All too often wrote disabled architect Ronald Mace designers don't take the needs of disabled and elderly people into account Building Access investigates twentieth century strategies for

designing the world with disability in mind Commonly understood in terms of curb cuts automatic doors Braille signs and flexible kitchens Universal Design purported to create a built environment for everyone not only the average citizen But who counts as everyone Aimi Hamraie asks and how can designers know Blending technoscience studies and design history with critical disability race and feminist theories Building Access interrogates the historical cultural and theoretical contexts for these questions offering a groundbreaking critical history of Universal Design Hamraie reveals that the twentieth century shift from design for the average to design for all took place through liberal political economic and scientific structures concerned with defining the disabled user and designing in its name Tracing the co evolution of accessible design for disabled veterans a radical disability maker movement disability rights law and strategies for diversifying the architecture profession Hamraie shows that Universal Design was not just an approach to creating new products or spaces but also a sustained understated activist movement challenging dominant understandings of disability in architecture medicine and society Illustrated with a wealth of rare archival materials Building Access brings together scientific social and political histories in what is not only the pioneering critical account of Universal Design but also a deep engagement with the politics of knowing making and belonging in twentieth century United States Environmental Design Research Wolfgang Preiser, 2018-12-07 First published in 1973 this two volume set summarises and structures the contributions by researchers at the Fourth International EDRA Conference held in April 1973 The second volume focuses on the symposia and invited papers which were theory orientated The symposia comprehensively assessed the status of contemporary knowledge as well as potential future directions in the respective fields contributing to environmental design research This volume also provides summaries of the workshops which explored problem solving processes and offered methodological applications to environmental analysis and other topics of concern This book will be of interest to students of architecture and design

Space Josefine Fokdal, 2008 Architects are creators of places Spaces are produced by the social practice of the user within places Thus the user is brought into the picture as a producer of space whereas architects are classified as producers of place The book addresses the notion of power relations within undefined spaces of transition through case study documentations and by analyzing individual and common expressions in four social housing projects in greater Copenhagen Understanding the struggle of power relations can help identify an interest articulated by the user The articulations are made by means of additions that are placed within the spaces of transition The conclusion that can be drawn is that power relations should be recognized by architects as a phenomenon of the dominating aspect of architecture Neglecting to consider this domination in the conception of residential housing projects has a large impact on the user and his/her possibilities for practicing social interactions *Advances in Computer Graphics* Marina Gavrilova, Jian Chang, Nadia Magnenat Thalmann, Eckhard Hitzler, Hiroshi Ishikawa, 2019-06-11
