

The background of the book cover is a photograph of a landscape. In the foreground, there are several bare, leafless trees with intricate branch structures. The ground appears to be covered in a light layer of snow or frost. In the background, a range of mountains is visible, their peaks softened by a thick mist or fog. The sky is a pale, hazy blue, suggesting an early morning or late afternoon setting. The overall mood is quiet and contemplative.

Environmental Governance Reconsidered Challenges Choices And Opportunities:

Environmental Governance Reconsidered Robert F. Durant, Daniel J. Fiorino, Rosemary O'Leary, 2004 A comprehensive in depth and thematically integrated analysis of key issues in environmental governance today from perspectives including environmental economics democratic theory public policy law political science and public administration Environmental Governance Reconsidered, second edition Robert F. Durant, Daniel J. Fiorino, Rosemary O'Leary, 2017-08-25 Key topics in the ongoing evolution of environmental governance with new and updated material This survey of current issues and controversies in environmental policy and management is unique in its thematic mix broad coverage of key debates and in depth analysis The contributing authors all distinguished scholars or practitioners offer a comprehensive examination of key topics in the continuing evolution of environmental governance with perspectives from public policy public administration political science international relations sustainability theory environmental economics risk analysis and democratic theory The second edition of this popular reader has been thoroughly revised with updated coverage and new topics The emphasis has shifted from sustainability to include sustainable cities from domestic civic environmentalism to global civil society and from global interdependence to the evolution of institutions of global environmental governance A general focus on devolution of authority in the United States has been sharpened to address the specifics of contested federalism and fracking and the treatment of flexibility now explores the specifics of regulatory innovation and change New chapters join original topics such as environmental justice and collaboration and conflict resolution to address highly salient and timely topics energy security risk assessment communication and technology innovation regulation by revelation and retrospective regulatory analysis The topics are organized and integrated by the book's 3R framework reconceptualizing governance to reflect ecological risks and interdependencies better reconnecting with stakeholders and reframing administrative rationality Extensive cross references pull the chapters together A broad reference list enables readers to pursue topics further Contributors Regina S Axelrod Robert F Durant Kirk Emerson Daniel J Fiorino Anne J Kantel David M Konisky Michael E Kraft Jennifer Kuzma Richard Morgenstern Tina Nabatchi Rosemary O Leary Barry Rabe Walter A Rosenbaum Stacy D VanDeveer Paul Wapner **Environmental Governance** James Evans, Craig Thomas, 2023-12-22 Climate change is prompting an unprecedented questioning of the fundamental bases upon which society is founded Businesses claim that technology can save the environment while politicians champion the role of international environmental agreements to secure global action Economists suggest that we should pay developing countries not to destroy their forests while environmentalists question whether we can solve ecological problems with the same thinking that created them As the process of steering society governance has a critical role to play in coordinating these disparate voices and securing collective action to achieve a more sustainable future Environmental Governance is the only book to discuss the first principles of governance while also providing a critical overview of the wide ranging theories and

approaches that underpin policy and practice today It places governance within its wider political context to explore how the environment is controlled manipulated regulated and contested by a range of actors and institutions This book shows how network and market governance have shaped current approaches to environmental issues while also introducing approaches such as transition management and adaptive governance In so doing it highlights the strengths and weaknesses of the different approaches currently in play and considers their political implications This second edition has been comprehensively updated to build upon the success of the acclaimed first edition with a new chapter on the environmental governance of outer space and updated analysis of international climate change summits It provides a ground breaking overview of dominant and emerging approaches of environmental governance forging critical links between them Each chapter has been updated with new case studies key debates and figures and includes questions for discussion and further reading It is essential reading for students of the environment politics and sociology and indeed anyone concerned with changing society to secure a more sustainable future

Can We Price Carbon? Barry G. Rabe, 2018-04-20 A political science analysis of the feasibility and sustainability of carbon pricing drawing from North American European and Asian case studies Climate change economists generally agree is best addressed by putting a price on the carbon content of fossil fuels by taxing carbon by cap and trade systems or other methods But what about the politics of carbon pricing Do political realities render carbon pricing impracticable In this book Barry Rabe offers the first major political science analysis of the feasibility and sustainability of carbon pricing drawing upon a series of real world attempts to price carbon over the last two decades in North America Europe and Asia Rabe asks whether these policies have proven politically viable and if adopted whether they survive political shifts and managerial challenges over time The entire policy life cycle is examined from adoption through advanced implementation on a range of pricing policies including not only carbon taxes and cap and trade but also such alternative methods as taxing fossil fuel extraction These case studies Rabe argues show that despite the considerable political difficulties carbon pricing can be both feasible and durable

Titans of the Climate Kelly Sims Gallagher, Xiaowei Xuan, 2019-02-05 How the planet's two largest greenhouse gas emitters navigate climate policy The United States and China together account for a disproportionate 45 percent of global carbon dioxide emissions In 2014 then President Obama and Chinese President Xi Jinping announced complementary efforts to limit emissions paving the way for the Paris Agreement And yet with President Trump's planned withdrawal from the Paris accords and Xi's consolidation of power as well as mutual mistrust fueled by misunderstanding the climate future is uncertain In *Titans of the Climate* Kelly Sims Gallagher and Xiaowei Xuan examine how the planet's two largest greenhouse gas emitters develop and implement climate policy Through dispassionate analysis the authors aim to help readers understand the challenges constraints and opportunities in each country Gallagher a former U S climate policymaker and Xuan a member of a Chinese policy think tank describe the specific drivers political economic and social of climate policies in both countries and map the differences

between policy outcomes They characterize the U S approach as deliberative incrementalism the Chinese meanwhile engage in strategic pragmatism Comparing the policy processes of the two countries Gallagher and Xuan make the case that if each country understands more about the other s goals and constraints climate policy cooperation is more likely to succeed

Networking the Bloc Klara Kemp-Welch,2019-02-12 The story of the experimental zeitgeist in Eastern European art seen through personal encounters pioneering dialogues collaborative projects and cultural exchanges Throughout the 1970s a network of artists emerged to bridge the East West divide and the no less rigid divides between the countries of the Eastern bloc Originating with a series of creative initiatives by artists art historians and critics and centered in places like Budapest Pozna and Prague this experimental dialogue involved Western participation but is today largely forgotten in the West In Networking the Bloc Klara Kemp Welch vividly recaptures this lost chapter of art history documenting an elaborate web of artistic connectivity that came about through a series of personal encounters pioneering dialogues collaborative projects and cultural exchanges Countering the conventional Cold War narrative of Eastern bloc isolation Kemp Welch shows how artistic ideas were relayed among like minded artists across ideological boundaries and national frontiers Much of the work created was collaborative and personal encounters were at its heart Drawing on archival documents and interviews with participants Kemp Welch focuses on the exchanges and projects themselves rather than the personalities involved Each of the projects she examines relied for its realization on a network of contributors She looks first at the mobilization of the network from 1964 to 1972 exploring five pioneering cases a friendship between a Slovak artist and a French critic an artistic credo an exhibition a conceptual proposition and a book She then charts a series of way stations for experimental art from the Soviet bloc between 1972 and 1976 points of distribution between studios private homes galleries and certain cities Finally she investigates convergences a succession of shared exhibitions and events in the second half of the 1970s in locations ranging from Prague to Milan to Moscow Networking the Bloc Kemp Welch invites us to rethink the art of the late Cold War period from Eastern European perspectives

The Resistance Dilemma George Hoberg,2021-08-17 How organized resistance to new fossil fuel infrastructure became a political force and how this might affect the transition to renewable energy Organized resistance to new fossil fuel infrastructure particularly conflicts over pipelines has become a formidable political force in North America In this book George Hoberg examines whether such place based environmental movements are effective ways of promoting climate action if they might inadvertently feed resistance to the development of renewable energy infrastructure and what other more innovative processes of decision making would encourage the acceptance of clean energy systems Focusing on a series of conflicts over new oil sands pipelines Hoberg investigates activists strategy of blocking fossil fuel infrastructure often in alliance with Indigenous groups and examines the political and environmental outcomes of these actions After discussing the oil sands policy regime and the relevant political institutions in Canada and the United States Hoberg analyzes in detail four anti pipeline campaigns examining the controversies over the Keystone XL the most well

known of these movements and the first one to use infrastructure resistance as a core strategy the Northern Gateway pipeline the Trans Mountain pipeline and the Energy East pipeline He then considers the resistance dilemma the potential of place based activism to threaten the much needed transition to renewable energy He examines several episodes of resistance to clean energy infrastructure in eastern Canada and the United States Finally Hoberg describes some innovative processes of energy decision making including strategic environment assessment and cumulative impact assessment looking at cases in British Columbia and Lower Alberta

Effective Advocacy Mary Alice Haddad,2021-03-23 An examination of successful environmental advocacy strategies in East Asia that shows how advocacy can be effective under difficult conditions The countries of East Asia China Japan South Korea and Taiwan are home to some of the most active and effective environmental advocates in the world And the governments of these countries have adopted a range of innovative policies to fight pollution and climate change Japan leads the world in emissions standards China has become the world's largest producer of photovoltaic panels and Taiwan and Korea have undertaken major green initiatives In this book Mary Alice Haddad examines the advocacy strategies that persuaded citizens governments and businesses of these countries to change their behavior

Carbon Captured Matto Mildenerberger,2020-02-18 A comparative examination of domestic climate politics that offers a theory for cross national differences in domestic climate policymaking Climate change threatens the planet and yet policy responses have varied widely across nations Some countries have undertaken ambitious programs to stave off climate disaster others have done little and still others have passed policies that were later rolled back In this book Matto Mildenerberger opens the black box of domestic climate politics examining policy making trajectories in several countries and offering a theoretical explanation for national differences in the climate policy process Mildenerberger introduces the concept of double representation when carbon polluters enjoy political representation on both the left through industrial unions fearful of job loss and the right through industrial business associations fighting policy costs and argues that different climate policy approaches can be explained by the interaction of climate policy preferences and domestic institutions He illustrates his theory with detailed histories of climate politics in Norway the United States and Australia along with briefer discussions of policies in Germany Japan the United Kingdom and Canada He shows that Norway systematically shielded politically connected industrial polluters from costs beginning with its pioneering carbon tax the United States after the failure of carbon reduction legislation finally acted on climate reform through a series of Obama administration executive actions and Australia's Labor and Green parties enacted an emissions trading scheme which was subsequently repealed by a conservative Liberal party government Ultimately Mildenerberger argues for the importance of political considerations in understanding the climate policymaking process and discusses possible future policy directions *Rethinking*

Environmental Justice in Sustainable Cities Heather E. Campbell,Yushim Kim,Adam M. Eckerd,2015-05-15 As the study of environmental policy and justice becomes increasingly significant in today's global climate standard statistical approaches to

gathering data have become less helpful at generating new insights and possibilities None of the conventional frameworks easily allow for the empirical modeling of the interactions of all the actors involved or for the emergence of outcomes unintended by the actors The existing frameworks account for the what but not for the why Heather E Campbell Yushim Kim and Adam Eckerd bring an innovative perspective to environmental justice research Their approach adjusts the narrower questions often asked in the study of environmental justice expanding to broader investigations of how and why environmental inequities occur Using agent based modeling ABM they study the interactions and interdependencies among different agents such as firms residents and government institutions Through simulation the authors test underlying assumptions in environmental justice and discover ways to modify existing theories to better explain why environmental injustice occurs Furthermore they use ABM to generate empirically testable hypotheses which they employ to check if their simulated findings are supported in the real world using real data The pioneering research on environmental justice in this text will have effects on the field of environmental policy as a whole For social science and policy researchers this book explores how to employ new and experimental methods of inquiry on challenging social problems and for the field of environmental justice the authors demonstrate how ABM helps illuminate the complex social and policy interactions that lead to both environmental justice and injustice
