**Environmental Health** From Global to Local offers students a comprehensive introduction to environmental health It provides an overview of methods and paradigms used in this exciting field ranging from ecology to epidemiology from toxicology to environmental psychology from genetics to ethics to religion The authors survey the major issues in contemporary environmental health ranging from global issues such as climate change and war to regional issues such as air water transportation and energy to local issues such as food safety pest control and occupational health The book includes a strong focus on the real world practice of environmental public health offering chapters on such applied topics as risk assessment risk communication health services regulations and legal remedies While Environmental Health is grounded in the U S experience it emphasizes global issues and perspectives on such topics as economic development population urbanization and sanitation Prize or Award AAP Awards for Excellence in Professional and Scholarly Publishing 2006      **Toxic Safety** Alissa Cordner, 2016-03-29 Initially marketed as a life saving advancement flame retardants are now mired in controversy Some argue that data show the chemicals are unsafe while others continue to support their use The tactics of each side have far reaching consequences for how we interpret new scientific discoveries An experienced environmental sociologist Alissa Cordner conducts more than a hundred interviews with activists scientists regulators and industry professionals to isolate the social scientific economic and political forces influencing environmental health policy today Introducing strategic science

translation she describes how stakeholders use scientific evidence to support nonscientific goals and construct conceptual risk formulas to shape risk assessment and the interpretation of empirical evidence A revelatory text for public health advocates Toxic Safety demonstrates that while all parties interested in health issues use science to support their claims they do not compete on a level playing field and even good intentions can have deleterious effects **The Body Toxic** Nena

Baker,2008-08-05 We are running a collective chemical fever that we cannot break Everyone everywhere now carries a dizzying array of chemical contaminants the by products of modern industry and innovation that contribute to a host of developmental deficits and health problems in ways just now being understood These toxic substances unknown to our grandparents accumulate in our fat bones blood and organs as a consequence of womb to tomb exposure to industrial substances as common as the products that contain them Almost everything we encounter from soap to soup cans and computers to clothing contributes to a chemical load unique to each of us Scientists studying the phenomenon refer to it as chemical body burden and in The Body Toxic the investigative journalist Nena Baker explores the many factors that have given rise to this condition from manufacturing breakthroughs to policy decisions to political pressure to the demands of popular culture While chemical advances have helped raise our standard of living making our lives easier and safer in many ways there are costs to these conveniences that chemical companies would rather consumers never knew about Baker draws back the curtain on this untold impact and assesses where we go from here *A New Paradigm for Environmental*
