Environmental Information Management And Analysis Ecosystem To Global Scales:

Environmental Information Management And Analysis W K Michener, J W Brunt, S G Stafford, 1994-08-08 Most environmental studies are based upon data collected at fine spatial scales plots sediments cores etc Furthermore temporal scales of these studies have been relatively short days weeks months and few studies have exceeded three years duration the typical funding cycle Despite this history environmental scientists are now being called **Environmental Monitoring** G. Bruce Wiersma, 2004-04-27 The current rate and scale of environmental change around the world makes the detection and understanding of these changes increasingly urgent Subsequently government legislation is focusing on measurable results of environmental programs requiring researchers to employ effective and efficient methods for acquiring high quality data Focusing on pollution issues and impacts resulting from human activities Environmental Monitoring is the first to bring together the conceptual basis behind the complex and specific approaches to the monitoring of air water and land Coverage includes integrated monitoring at the landscape level as well as case studies of existing monitoring programs such as the Chesapeake Bay Program The book also addresses the recent legislative focus on high quality data results and conducting monitoring programs in different ecosystems and environmental media High-Latitude Rainforests and Associated Ecosystems of the West Coast of the Americas Richard G. Lawford, Paul Alaback, Eduardo Fuentes, 2012-12-06 Regional intercomparisons between ecosystems on different continents can be a powerful tool to better understand the ways in which ecosystems respond to global change Large areas are often needed to characterize the causal mechanisms governing interactions between ecozones and their environments Factors such as weather and climate patterns land ocean and land atmosphere interactions all play important roles As a result of the strong physical north south symmetry between the western coasts of North and South America the similarities in climate coastal oceanography and physiography between these two regions have been extensively documented High Latitude Rain Forests and Associated Ecosystems of the West Coast of the Americas presents current research on West Coast forest and river ecology and compares ecosystems of the Pacific Northwest with those of South America Environmental Impact Assessment Shahid A. William K. Michener, James W. Brunt, 2009-04-01 Ecologists are increasingly tackling difficult issues like global change loss of biodiversity and sustainability of ecosystem services These and related topics are enormously challenging requiring unprecedented multidisciplinary collaboration and rapid synthesis of large amounts of diverse data into information and ultimately knowledge New sensors computers data collection and storage devices and analytical and statistical methods provide a powerful tool kit to support analyses graphics and visualizations that were unthinkable even a few years ago New and increased emphasis on accessibility management processing and sharing of high quality well maintained and understandable data represents a significant change in how scientists view and treat data These issues are complex and despite their importance are typically not addressed in database ecological and statistical textbooks This book addresses these issues providing a much needed resource for those involved in designing and implementing ecological research as well as students who are entering the environmental sciences Chapters focus on the design of ecological studies data management principles scientific databases data quality assurance data documentation archiving ecological data and information and processing data into information and knowledge The book stops short of a detailed treatment of data analysis but does provide pointers to the relevant literature in graphics statistics and knowledge discovery The central thesis of the book is that high quality data management systems are critical for addressing future environmental challenges This requires a new approach to how we conduct ecological research that views data as a resource and promotes stewardship recycling and sharing of data Ecological Data will be particularly useful to those ecologists and information specialists that actively design manage and analyze environmental databases However it will also benefit a wider audience of scientists and students in the ecological and environmental sciences Scientific, Environmental, and Political Issues in the Circum-Caspian Region
M.H. Glantz, Igor S. Zonn, 2013-11-11 On behalf of the Russian Federation Committee on Water Economy I would like to welcome the participants of the NATO sponsored Workshop on the Problems of the Caspian Sea and the Circum Caspian States The world's largest intercontinental sea lake is well known for its wealth mineral and fuel resources and sturgeon stocks the products of which oil and caviar are in constant demand on the world market During the last half century the Caspian Sea has been the focus of the scientific community concerned with its level fluctuations We were and still are solving a two faceted issue to rescue the Caspian Sea and to rescue the population from the Caspian Sea To rescue the Caspian Sea is to address a broad spectrum of environmental issues related primarily to water pollution by waste water and petroleum products To rescue the population from the Caspian Sea means that an almost 2.5 m sea level rise in the last two decades has resulted in flooding of vast coastal areas deteriorating economic and social spheres of activity Solutions to these issues are linked to the numerous mysterious aspects of recent Caspian Sea behavior Regrettably the collapse of the USSR has led to a decline of marine observations and control over the use of marine resources in the region

Coordinated international action on the protection of living marine resources have terminated generating disastrous consequences

Exploring Spatial Scale in Geography Christopher D. Lloyd, 2014-03-04 Exploring Spatial Scale in Geography provides a conceptual and practical guide to issues of spatial scale in all areas of the physical and social sciences Scale is at the heart of geography and other spatial sciences Whether dealing with geomorphological processes population movements or meteorology a consideration of spatial scale is vital Exploring Spatial Scale in Geography takes a practical approach with a core focus on real world problems and potential solutions Links are made to appropriate software environments with an associated website providing access to guidance material which outlines how particular problems can be approached using popular GIS and spatial data analysis software This book offers alternative definitions of spatial scale presents approaches for exploring spatial scale and makes use of a wide variety of case studies in the physical and social sciences to demonstrate key concepts making it a key resource for anyone who makes use of geographical information

Recent Issues on Fuzzy Databases Gloria Bordogna, Gabriella Pasi, 2000-09-14 First of all I would like to congratulate Gabriella Pasi and Gloria Bordogna for the work they accomplished in preparing this new book in the series Study in Fuzziness and Soft Computing Recent Issues on the Management of Fuzziness in Databases is undoubtedly a token of their long lasting and active involvement in the area of Fuzzy Information Retrieval and Fuzzy Database Systems This book is really welcome in the area of fuzzy databases where they are not numerous although the first works at the crossroads of fuzzy sets and databases were initiated about twenty years ago by L Zadeh Only five books have been published since 1995 when the first volume dedicated to fuzzy databases published in the series Study in Fuzziness and Soft Computing edited by J Kacprzyk and myself appeared Going beyond books strictly speaking let us also mention the existence of review papers that are part of a couple of handbooks related to fuzzy sets published since 1998 The area known as fuzzy databases covers a bunch of topics among which flexible queries addressed to regular databases the extension of the notion of a functional dependency data mining and fuzzy summarization querying databases containing imperfect attribute values represented thanks to possibility distributions

Geocomputation Robert J. Abrahart, Stan Openshaw, Linda M. See, 2003-09-02 Geocomputation is essentially the follow on revolution from Geographic Information Science and is expected to gather speed and momentum in the first decade of the 21st century It comes into use once a GIS database has been set up with a digital data library and expanded and linked to a global geographical two or three dimensional co ordinate system It exploits developments in IT and new data gathering and earth observing technologies and takes the notion of GIS beyond data and towards its analysis modelling and use in problem

solving This book provides pointers on how to harness these technologies in tandem and in the context of multiple different subjects and problem areas It seeks to establish the principles and set the foundations for subsequent growth L

Sustainable Development in the Southeastern Coastal Zone F. John Vernberg, Winona B. Vernberg, Thomas Siewicki, 1996
Rapid population growth in the southeastern coastal zone has had an important influence on both resource management policy at the federal state regional and local levels and the findings of environmental impact studies These twenty six papers represent a variety of disciplines and such topics as policy in its broadest sense environmental resources and population trends Jacket People and Pixels National Research Council, Division of Behavioral and Social Sciences and Education, Board on Environmental Change and Society, Committee on the Human Dimensions of Global Change, 1998-05-21
Space based sensors are giving us an ever closer and more comprehensive look at the earth s surface they also have the potential to tell us about human activity This volume examines the possibilities for using remote sensing technology to improve understanding of social processes and human environment interactions Examples include deforestation and regrowth in Brazil population environment interactions in Thailand ancient and modern rural development in Guatemala and urbanization in the United States as well as early warnings of famine and disease outbreaks The book also provides information on current sources of remotely sensed data and metadata and discusses what is involved in establishing effective collaborative efforts between scientists working with remote sensing technology and those working on social and environmental issues Transactions in International Land Management Robert W. Dixon-Gough, Reinfried Mansberger, 2018-04-27 *Transactions in International Land Management* is a new series of volumes which provides an arena for the debate of key topical issues on this subject In this first volume the subjects divide into three broad sections Firstly there are analyses of land reform and agrarian structure in Europe including case studies from Macedonia and Estonia and a comparative examination of land registration and agrarian reform in Austria and Great Britain Secondly there are chapters looking at various methodologies and tools used in developing and appraising land management including Geo information systems Finally there are a couple of chapters which study urban growth in Africa one examining a mining town in Zambia and the other focussing on housing in Zanzibar to discuss issues of informal land delivery and management *The Americas and Oceania: Assessing Sustainability* Ray C. Anderson, Sara G. Beavis, Michael L. Dougherty, Tirso Gonzales, Ricardo Braun, Muhammad Aurang Zeb Mughal, Mark Wilson, 2012-11-01 *The Americas and Oceania Assessing Sustainability* provides extensive coverage of sustainability practices in two regions linked culturally and historically by their relative isolation before the Columbian exchange by their colonization after it and by the challenges of pollution resource overuse and environmental degradation Regional experts and international scholars focus on environmental history in areas such as the South Pacific islands now particularly threatened by rising ocean levels due to climate change and on countries whose governments and corporations can play a major role in promoting or discouraging sustainable choices Brazil an emergent power on the world

stage the United States the world's third most populous nation and New Zealand seemingly on its way to becoming an enviable model of sustainable development

Coastal Monitoring through Partnerships Brian D. Melzian, Virginia Engle, Malissa McAlister, Shabeg S. Sandhu, 2013-03-14 As the coastal human population increases in the United States there will likely be increasing environmental and socioeconomic pressures on our coastal and estuarine environments Monitoring the condition of all our nation's coastal and estuarine ecosystems over the long term is more than any one program can accomplish on its own Therefore it is crucial that monitoring programs at all levels local state and federal cooperate in the collection sharing and use of environmental data This volume is the proceedings of the Coastal Monitoring Through Partnerships symposium that was held in Pensacola Florida in April of 2001 and was organized by the U S Environmental Protection Agency's EPA's Environmental Monitoring and Assessment Program EMAP and the Council of State Governments CSG It contains papers that describe various multi disciplinary coastal and estuarine environmental monitoring programs designed and implemented by using regional and national partnerships with federal and state agencies academia Native American tribes and nongovernmental organizations In addition it includes papers on modeling and data management monitoring and assessment of benthic communities development of biological indicators and interlaboratory sediment comparisons microbiological modeling and indicators and monitoring and assessment of phytoplankton and submerged aquatic vegetation There are many components involved in determining the overall impacts of anthropogenic stressors on coastal and estuarine waters It will take strong partnerships like those described in this volume to ensure that we have healthy and sustainable coastal and estuarine environments now and in the future

Spatial Accuracy Assessment in Natural Resources and Environmental Sciences, 1996 This international symposium on theory and techniques for assessing the accuracy of spatial data and spatial analyses included more than ninety presentations by representatives from government academic and private institutions in over twenty countries throughout the world To encourage interactions across disciplines presentations in the general subject areas of spatial statistics geographic information systems remote sensing and multidisciplinary approaches were intermixed throughout the three days of sessions
