21st Century Geography Joseph P. Stoltman,2012 This is a theoretical and practical guide on how to undertake and navigate advanced research in the arts humanities and social sciences *Multifunctional Agriculture* G. A. Wilson,2007 In a time of great agricultural and rural change the notion of multifunctionality has remained under theorized and poorly linked to the debates in the social sciences This book analyses the extent to which the proposed transition towards post productivist agriculture holds up to scientific scrutiny and proposes a new transition theory **An Integrated Approach to Environmental Management** Dibyendu Sarkar,Rupali Datta,Avinandan Mukherjee,Robyn Hannigan,2015-10-05 Covers the most recent topics in the field of environmental management and provides a broad focus on the theoretical and methodological underpinnings of environmental management Provides an up to date survey of the field from the perspective of different disciplines Covers the topic of environmental management from multiple perspectives namely natural sciences engineering business social sciences and methods and tools perspectives Combines both academic rigor and practical approach through literature reviews and theories and examples and case studies from diverse geographic areas and policy domains Explores local and global issues of environmental management and analyzes the role of various contributors in the environmental management process Chapter contents are appropriately demonstrated with numerous pictures charts graphs and tables and accompanied by a detailed reference list for further readings German Agriculture in Transition G. Wilson,2001-05-21 A much needed contemporary analysis of the Common Agricultural Policy and Germany s role within it The authors investigate the effect of reunification on German policy today and ask whether she has acted as leader partner or obstructor in the formation of policy Their analysis includes social and environmental aspects as well as the economic and political with a special focus on the green agenda in European agriculture Sustainable Urbanisation Adriana Allen,Nicholas You,2002 Third World Political Ecology Sinead Bailey,Raymond Bryant,2005-08-08 An effective response to contemporary environmental problems demands an approach that integrates political economic and ecological issues

Third World Political Ecology provides an introduction to an exciting new research field that aims to develop an integrated understanding of the political economy of environmental change in the Third World. The authors review the historical development of the field, explain what is distinctive about Third World political ecology, and suggest areas for future development. Clarifying the essentially politicised condition of environmental change today, the authors explore the role of various actors: states, multilateral institutions, businesses, environmental non-governmental organisations, poverty-stricken farmers, shifting cultivators, and other grassroots actors in the development of the Third World's politicised environment. Third World Political Ecology is the first major attempt to explain the development and characteristics of environmental problems that plague parts of Asia, Africa, and Latin America. Drawing on examples from throughout the Third World, the book will be of interest to all those who wish to understand the political and economic bases of the Third World's current predicament.

Design for Sustainability Janis Birkeland, 2012-05-04 With radical and innovative design solutions, everyone could be living in buildings and settlements that are more like gardens than cargo containers and that purify air and water, generate energy, treat sewage, and produce food at lower cost. Birkeland introduces systems design thinking that cuts across academic and professional boundaries and the divide between social and physical sciences to move towards a transdisciplinary approach to environmental and social problem solving. This sourcebook is useful for teaching as each topic within the field of environmental management and social change has pairs of short readings providing diverse perspectives to compare, contrast, and debate. *Design for Sustainability* presents examples of integrated systems design based on ecological principles and concepts and drawn from the foremost designers in the fields of industrial design, materials, housing design, urban planning, and transport, landscape, and permaculture, and energy and resource management.

The Emergence of Ecological Modernisation Mr Stephen C Young, 2018-10-24 *The Emergence of Ecological Modernisation* offers a wealth of empirical research material from an international perspective, bringing together previously scattered sources for the first time. It addresses a series of theoretical issues that are of key contemporary relevance, such as the relationship between ecological modernisation and sustainable development, strategies for promoting ecological modernisation, and the extent to which it is possible to green contemporary capitalism.

Environmental Management and Development Chris Barrow, 2004-03-01 The environment and its management has been and continues to be a very topical issue. Existing environment and development texts place emphasis on listing problems, making warnings, and voicing advocacy, but by focusing on environmental management, this informative book offers a very different perspective. Moving on from the usual much-discussed viewpoints, Barrow looks towards practical management and problem-solving techniques. He clarifies the definition, nature, and role of environmental management in development and developing countries, beginning with an introduction to the key terms, issues, and tools of environmental management, which are linked and developed in later chapters, and concluding by discussing who pays for environmental management and its future in developing countries.

Written by an experienced and well known author this clear user friendly book ideal for students of resource management geography and development studies makes excellent use of chapter summaries boxed case studies annotated further readings and websites discussion questions and illustrations

A History of Natural Resources in Asia G. Bankoff, P. Boomgaard, 2007-08-20 Much has been written about the wealth of nations the history of unequal distribution and zones of affluence and deprivation within and between societies This book explores why some Asian nations are more prosperous than others through an examination of how their interaction with and utilization of resources has changed over the centuries

Unravelling desertification M. Juntti, 2023-08-28 This book analyses processes of desertification from a social science perspective and unravels the policy related to drivers of desertification Desertification is addressed both as a concept surrounded by a multitude of different discourses and as a tangible unsustainable process that is connected to a complex set of policies and changing land management practices The focus is on Southern Europe where desertification has been a long standing problem in many areas and where in some places the loss of productive capacity has worsened considerably over the last few decades By focusing on four specific case study areas in Portugal Spain Italy and Greece the scope of the book will cover the human dimension of desertification exploring in particular how the framework of existing policies has affected land management decisions and desertification processes The emphasis will be on how policies may have contributed to desertification alleviation and mitigation as well as to a worsening of desertification processes By using an actor network approach the book specifically investigates the importance of networks of actors that shape the nature and direction of policies that affect desertification processes In this sense this book aims at providing a first glance into the complex policy economic and socio cultural networks that operate at the local regional and national levels in areas of Southern Europe affected by desertification and to analyse how these networks hinder or promote the implementation of policies aimed at alleviating the threat of desertification With its broad remit this exciting book will appeal to many different audiences not only including academics and students of various disciplines but also practitioners at the local regional Mediterranean and international e g EU spatial levels in a variety of fields such as environmental and agricultural policy making agricultural extension services farming organisations environmental NGOs media representatives and many other environmental stakeholder groups

Disaster and Development Andrew E. Collins, 2009-09-10 Development to a large extent determines the way in which hazards impact on people Meanwhile the occurrence of disasters alters the scope of development Whilst a notion of the association of disaster and development is as old as development studies itself recent decades have produced an

intensifying demand for a fuller understanding Evidence of disaster and development progressing together has attracted increased institutional attention This includes recognition through global accords of a need for disaster reduction in achieving Millennium Development Goals and of sustainable development as central to disaster reduction However varied interpretations of this linkage and accessible options for future human wellbeing remain unconsolidated for most of humanity This engaging and accessible text illuminates the complexity of the relationship between disaster and development It opens with an assessment of the scope of contemporary disaster and development studies highlighting the rationale for looking at the two issues as part of the same topic The second and third chapters detail development perspectives of disaster and the influence of disaster on development The fourth chapter exemplifies how human health is both a cause and consequence of disaster and development and the following chapter illustrates some of the learning and planning processes in disaster and development oriented practice Early warning risk management mitigation response and recovery actions provide the focus for the fifth and sixth chapters The final chapter indicates some of the likely future contribution and challenges of combined disaster and development approaches With an emphasis on putting people at the centre of disaster and development the book avoids confronting readers with no hope representations instead highlighting disaster reduction opportunities This book is an essential introduction for students from multiple disciplines whose subject area may variously engage with contemporary crises and for many other people interested in finding about what is really meant by disaster reduction They include students and practitioners of development environment sociology economics public health anthropology and emergency planning amongst others It provides an entry point to a critical yet diverse topic backed up by student friendly features such as boxed case studies from the geographical areas of America to Africa and parts of Europe to parts of the East summaries discussion questions suggested further reading and web site information

An Agenda of Science for Environment and Development Into the 21st Century James Dooge, Maureen Brennan, 1992-05-28 The world scientific community's definitive statement on strategies needed to safeguard the environment and promote development
