*ISO 14001 and Beyond* Sheldon Christopher, 2017 On September 1st 1996 ISO 14001 was published worldwide Written over five years in consultation with international industrial experts non governmental organizations and regulators this environmental management systems standard will help organizations manage their impacts on the environment no matter what their size nature or location The implications for the future are enormous But what does the standard mean in the real world What changes do managers have to make to accommodate its principles What decisions need to be faced and when Is it really going to make a difference or is it just another case of global greenwash Will it be another missed opportunity for you your organisation or your market At the start of what promises to be a worldwide explosion of interest in standardised EMSs ISO 14001 and Beyond looks at their creation their use and their limitations attempting to discover the essential truth about this important management tool and where it will take industry ISO 14001 and Beyond assembles the leading thinkers and practitioners in the field to record their thoughts and experiences on the new standard its advantages and disadvantages The book is designed to provide the reader with enough information with which to form an opinion on the future and how that will influence subsequent actions It also provides reassurance that although the problems are real so are the solutions ISO 14001 and Beyond gives you the opportunity to read what some of the best minds have made of the standard so far and what they think lies ahead There are

reports covering a global spectrum of concern from the US Russia Japan Canada Germany the UK and more from multinationals small and medium sized enterprises local government universities and professional bodies All this material is gathered together in one book to give you the best most meaningful information for the crucial decisions that you will need to make in the coming months Provided by publisher *Environmental Management Systems* Luca Cagnazzo, 2015 In recent years since the widespread adoption of the ISO 14001 international standard and the continuous update of the European EMAS scheme along with the effects of many other environmental management schemes environmental management systems EMSs have gained increasing acceptance among companies In fact the latest 2010 ISO survey reports that as many as 250 000 ISO 14001 2005 certificates have been issued in 155 countries The ISO Survey of certifications 2010 The development of a basic environmental management system is based on An initial environmental analysis identifying the company status with respect to the environment The identification of an environmental policy providing guidance and setting company directions with respect to the environment The determination of objectives set coherently with the environmental policy The installation of a management system processes responsibilities documents data etc supporting the achievement of identified objectives The usage of feedback and control mechanisms such as a system of corrective preventive actions management reviews and internal external audits The instantiation of an EMS in a company requires interpretation of requirements and adaptation of the management system in relation to the application constraints As pointed out in Ghisellini and Thurston 2005 with respect to the ISO 14001 EMS the result is a management and not a performance standard because the continuous improvement requirement does not strictly imply reduction in environmental impacts
