Environmental Organizations in Modern Germany William T. Markham, 2008-08-01 German environmental organizations have doggedly pursued environmental protection through difficult times hyperinflation and war National Socialist rule postwar devastation state socialism in the GDR and confrontation with the authorities during the 1970s and 1980s The author recounts the fascinating and sometimes dramatic story of these organizations from their origins at the end of the nineteenth century to the present not only describing how they reacted to powerful social movements including the homeland protection and socialist movements in the early years of the twentieth century the Nazi movement and the anti nuclear and new social movements of the 1970s and 1980s but also examining strategies for survival in periods like the current one when environmental concerns are not at the top of the national agenda Previous analyses of environmental organizations have almost invariably viewed them as parts of larger social structures that is as components of social movements as interest groups within a political system or as contributors to civil society This book by contrast starts from the premise that through the use of theories developed specifically to analyze the behavior of organizations and NGOs we can gain additional insight into why environmental organizations behave as they do

judicialization of international law is often lauded for bringing effective global governance upholding the rule of law and protecting the right of individuals Yet at what point does the omnipresence of the international judiciary shackle national sovereign freedom And can the lack of political accountability be justified Follesdal and Ulfstein bring together the crime de la crime of the legal academic world to ask the big questions for the international judiciary whether they are there for mere dispute settlement or to set precedent and how far they can enforce international obligations without impacting on democratic self determination
