Integration in Practice Katarina Eckerberg, Mans Nilsson, 2013-09-05 Environmental values and concerns are meant to be reflected through environmental policy which is then integrated into mainstream economic and social policy that serves to govern society and the economy in different sectors Yet effective environmental policy integration has proved to be very difficult in practice and it remains largely an elusive aspiration This groundbreaking volume presents the first ever detailed examination of EPI at the national policy level focusing on the key sectors of energy and agriculture within Sweden a country that is widely recognized as a front runner in environmental management The authors deconstruct EPI look at what it means in policy formation and examine how environmental priorities are treated in relation to other political priorities The final section of the book lays out the major findings and presents key lessons for international application including institutional recommendations on how to enhance the potential for EPI Most fundamentally the book answers the questions of what works for EPI why it works and how it can be achieved in practice across sectors The result is a rich and indispensable guide for all those involved in environmental and sustainable development policy issues *Policy Integration for Complex Environmental Problems* Helen Briassoulis, 2017-07-05 The quest for policy integration crystallized in the 1990s as awareness was growing that the current supply of narrow sectoral and little coordinated or even overlapping and conflicting policies could not cope efficiently and effectively with contemporary complex cross cutting and interdependent socio environmental problems

Combining and coordinating policies properly promises to address this institutional misfit add value to policies support planning at national and sub national levels and facilitate the transition to sustainable development more generally This book proposes a comprehensive conceptualization of policy integration and negotiates pertinent theoretical methodological and applied issues from the perspective of selected EU policies rural development regional development transport social economic environmental water resources and biodiversity policy Mediterranean desertification an exceptionally complex socio environmental problem is used as an illustrative example as the idea for this book transpired while researching the topic of policy making to combat desertification in the context of MEDACTION an EU funded research project

Sustainability in European Environmental Policy Rob Atkinson, Terizakis Georgios, Karsten Zimmermann, 2010-10-18 This book examines sustainability in European environmental policy and explores the related challenges of governance and knowledge featuring cross national and comparative case studies on nine European countries

Innovation in Environmental Policy? Andrew Jordan, Andrea Lenschow, 2009-01-01 offering an enjoyable read in comparative politics and policy it offers a point of reference for understanding the conceptual and empirical possibilities for further research in EPI

Darren McCauley West European Politics a bank of internationally based case studies written by leading environmental experts The Environmentalist The organisation of this book is exemplary particularly for an edited volume A n impressive intellectual contribution to the understanding of EPI I strongly recommend it to scholars and students and crucially also to politicians and civil servants who have attempted or half attempted the task of remedying the historical neglect of environmental issues

Ian Bailey Environment and Planning C Good social science may not raise our spirits but it should improve our policy understanding Andrew Jordan and Andrea Lenschow have produced a volume that provides a subtle and empirically informed understanding of environmental policy integration using a design that looks both at the full policy cycle and at cross national comparisons From the foreword by Albert Weale FBA University of Essex UK Policy coordination is normally studied in hierarchical and institutional terms This volume demonstrates the power of an idea to function as a framework for coordination It offers an innovative study of policy coordination as well as a thorough study of environmental policy

Guy Peters University of Pittsburgh US This book deals with a critical challenge facing modern governments how to integrate environmental thinking into all policy areas It provides fascinating insights into the progress made in realizing this objective and is a must read for anyone interested in understanding how far we have come and how far we still have to go in greening government for sustainable development

James Meadowcroft Carleton University Canada This collection brings together leading scholars in the field to explore the origins and applications of different instruments of environmental policy integration from a comparative perspective This book is a must read for environmental policy practitioners and scholars with an interest in how environmental outcomes can and are being improved

Miranda A Schreurs Freie Universit t Berlin Germany Environmental Policy Integration EPI is an innovative policy principle designed to deliver sustainable development

This book offers an unrivalled exploration of its conceptualization and implementation drawing upon a set of interlinked case studies of the most common implementing instruments and the varied experience of applying them in six OECD states and the EU. Written by a team of international experts it identifies and explains broad patterns and dynamics in what is an important area of contemporary environmental policy analysis. This insightful account of the state of the art aims to offer a valuable resource for academics interested in environmental politics and policy analysis as well as the broader interdisciplinary theme of governance for sustainable development. It will interest advanced undergraduate and postgraduate students taking courses in comparative politics, public administration and environmental politics and policy making. Given the continuing political relevance of sustainability it should also appeal to NGOs, think tanks and international bodies attempting to coordinate policies across and within different levels of governance. Environmental Integration Ton Bührs, 2009-04-09

The environmental challenges facing humankind can most effectively be met through environmental integration incorporating environmental considerations into everyday human thinking, behavior and practices at both the individual and collective levels. Increasingly, people and organizations throughout the world are taking the environment into account, but at the same time there is insufficient integration of attitudes, policies and programs. People and groups have different and often conflicting views and interpretations of what is desirable or required to protect the environment. Environmental Integration looks at the ways that governments can play a crucial role in advancing, promoting and shaping a singular, integrated environmental policy. **Elgar Encyclopedia of European Union Public Policy** Paolo R. Graziano, Jale Tosun, 2022-12-13

A holistic and extensive exploration of both the dynamic and incremental changes in EU public policy and the decision processes surrounding them, this Elgar Encyclopedia is the definitive reference work in the field of EU public policy.

International Organizations in Global Environmental Governance Frank Biermann, Bernd Siebenhüner, Anna Schreyögg, 2009-01-28. This book provides a comparative study of the role of international organizations in environmental governance. Whilst a growing body of literature considers global governance in a number of policy areas, this volume delivers one of the first comprehensive accounts of international organizations in relation to environmental policy. Providing the reader with key insights within this area of global governance, the book focuses on policies developing in relation to climate change, biodiversity and international environmental funding. Presenting a compelling and up-to-date account of developments within this burgeoning policy area, the volume includes a range of case studies including the World Bank, UNEP and the OECD. Presenting quantitative and qualitative research that advances understanding of international organizations in the field of international relations, it delivers contributions from a range of internationally renowned academics and specialists within the field. International Organizations in Global Environmental Governance will be of interest to students and scholars of international relations, theory, international economics, environmental policy, organizational theory and environmental studies. European Energy Policy Francesc Morata, Israel Solorio Sandoval, 2012. This book analyses a highly important

topic It is based on a comprehensive and empirically rich assessment of European energy policy including both internal and external determinants Its encompassing approach and the thoughtful combination of different analytical perspectives makes the book an important and fresh contribution to the field Christoph Knill University of Konstanz Germany Energy was one of the founding pillars of European integration while environmental concerns have become an identity sign of today s European Union energy policy However notwithstanding the obvious links between both issues little attention has been devoted to the complex relationship between the EU s environmental performance and the Europeanization of its energy policy This book carefully edited by Morata and Solorio has come to fill this gap becoming a must to understand the interactions between these two fundamental drivers of EU policies Jos Mar a Mar n Quemada Universidad Nacional de Educaci n a Distancia and Member of the Governing Council of the Spanish Central Bank Spain This path breaking book explores the new European energy policy highlighting the significance of environmental policy concerns instruments and objectives vis vis competing security and market dimensions in order to achieve an all embracing EU energy policy perspective for the future While the past years have witnessed unprecedented development of EU energy policy the understanding of this process has lagged behind Alongside the scarce literature on this emergent policy there is also a gap regarding the attention paid to its different components The study stems from the perception of a mismatch between the valuable debate that certain dimensions of energy policy namely energy security and the market and competition framework have triggered and the neglect of its environmental and climate change dimensions European Energy Policy will prove to be insightful for academics and postgraduate students interested in European integration political science international relations public policy and environmental science Energy stakeholders and governmental policymakers will also find plenty of invaluable information in this enriching resource

Politics and the Environment James Connelly, Graham Smith, David Benson, Clare Saunders, 2012-03-15 Politics and the Environment has established itself as one of the most comprehensive textbooks in this area This new edition has been completely revised and updated whilst retaining the features and the theory to practice focus which made the first two editions so successful This text is designed to introduce students to the key concepts and issues which surround environmental problems and their political solutions The authors investigate the people movements and organisations that form and implement these policies and explore the barriers which hinder successful introduction of international environmental politics The 3rd edition has been expanded to include The shift in focus in environmental politics from sustainable development to climate change governance An extensive discussion on climate change including institutional national and global responses in the aftermath of the Kyoto protocol An increased international focus with more case studies from the UK Europe Australia and North America More discussion of global environmental social movements including the US environmental organisations in particular the Green Party and the environmental justice groups This textbook is an invaluable and accessible resource for undergraduates studying environmental politics Governance and

Politics in the Post-Crisis European Union Ramona Coman, Amandine Crespy, Vivien A. Schmidt, 2020-08-27 The European Union of today cannot be studied as it once was This original new textbook provides a much needed update on how the EU's policies and institutions have changed in light of the multiple crises and transformations since 2010 An international team of leading scholars offer systematic accounts on the EU's institutional regime policies and its community of people and states Each chapter is structured to explain the relevant historical developments and institutional framework presenting the key actors the current controversies and discussing a paradigmatic case study Each chapter also provides ideas for group discussions and individual research topics Moving away from the typical neutral account of the functioning of the EU this textbook will stimulate readers critical thinking towards the EU as it is today It will serve as a core text for undergraduate and graduate students of politics and European studies taking courses on the politics of the EU and those taking courses in comparative politics and international organizations including the EU

Strategic Environmental Assessment in International and European Law Simon Marsden, 2012 Strategic environmental assessment SEA is a regulatory requirement for development across Europe North America Australasia and elsewhere yet understanding the legal aspects is challenging This comprehensive guide provides that understanding in a clear and straightforward way The introduction considers SEA and the law explaining what SEA is why it is needed how it works and why it is required as well as examining the role of the law Part One provides an overview of international law environmental impact assessment EIA and international law including treaties customary international law and soft law relevant to SEA It analyses the Kiev SEA Protocol and related UNECE conventions the Espoo Convention on EIA in a Transboundary Context and the Aarhus Convention on Access to Information Public Participation and Access to Justice in Environmental Matters It also analyses the role of SEA in conservation conventions Part Two considers how the European legal system works including an overview of the current status of European law It examines the EIA Directive and SEA Directive together with other relevant directives and regulations such as the Habitats and Wild Birds Directives the Water Framework Directive the Public Participation for Plans and Programmes Directive and the Structural Funds Regulations Finally the volume draws conclusions about the relationship and comparisons between international and European law generally and in regulating SEA

Handbook on European Union Climate Change Policy and Politics Tim Rayner, Kacper Szulecki, Andrew J. Jordan, Sebastian Oberthür, 2023-07-01 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com Through detailed and wide ranging analysis the Handbook on European Union Climate Change Policy and Politics provides a critical assessment of current and emerging challenges facing the EU in committing to and delivering increasingly ambitious climate policy objectives Highlighting the importance of topics such as finance and investment litigation hard to abate sectors and negative emissions it offers an up to date exploration of the complexities of climate politics and policy making

The Europeanization of British Environmental Policy A. Jordan, 2002-06-25 Almost all aspects of modern politics have been

deeply Europeanized yet we know surprisingly little about how the EU affects the inner workings of national government This book conceptualizes the profound Europeanization of British environmental government and policy both as a lagged response to European integration and as an important determinant of Britain's contribution to that process By combining political theories of the EU with new empirical research Andrew Jordan offers a genuinely fresh perspective on the evolution of modern European governance Children's Environmental Rights Under International and EU Law Francesca

Ippolito, 2022-11-07 This book is dedicated to a topic which has for a long time lacked the attention it deserves within the academic world It intends to address in a coherent and comprehensive manner the problem of the environmental rights of the child which are not identical to the ones of adults whose environmental rights have been appraised from a general point of view In the absence of any international law instrument explicitly granting a child the right to a clean environment drawing on an extensive and original analysis of the UN Convention on the Rights of the Child and the practice of its monitoring body this book undertakes an assessment of the extent to which these challenges may be overcome through a greater engagement between international law on the rights of the child and international environmental law The result is the first comprehensive study on the manner in which these two mutually reinforcing legal regimes can interact to strengthen the protection of children's environmental human rights at stake in the increased strategic environmental and climate litigations at both the national and international level The book is recommended reading for amongst others policy makers international environmental lawyers and human rights lawyers and practitioners Additionally lecturers students and researchers from a range of disciplines will also gain from seeing how new legal scholarship and intertwined branches of international law contribute to the continual development of the living rights of the human rights conventions Francesca Ippolito is Associate Professor of International Law in the Department of Political and Social Science of the University of Cagliari Italy She holds the Jean Monnet Chair on European Climate of Change REACT for 2021-2024 **Handbook on**

Cohesion Policy in the EU Simona Piattoni, Laura Polverari, 2016-08-26 This Handbook covers all major aspects of EU Cohesion policy one of the most significant areas of intervention of the European Union Over five parts It discusses this policy's history and governing principles the theoretical approaches from which it can be assessed the inter-institutional and multi-level dynamics that it tends to elicit its practical implementation and impact on EU member states its interactions with other EU policies and strategies and the cognitive maps and narratives with which it can be associated An absolute must for all students of the EU Sustainable Development and Governance in Europe Pamela M. Barnes, Thomas C.

Hoerber, 2013-06-26 This book analyses the evolution of the sustainability discourse in the European Union exploring the conditions necessary for sustainable development to move from a conceptual model into a model for action for strategic decision makers at all levels of governance This book questions the extent to which the discourse on sustainability has become embedded into governance structures in Europe It focuses on the importance of the nature of the language of the

political discourse on sustainability and how ideas are communicated amongst the actors and stakeholders in the policy making process as well as assessing the conceptual political institutional and operational barriers apparent across the European geographic region Drawing case studies from numerous policy areas including climate change EU emissions trading scheme renewable energy nuclear energy the European integrated energy market transport mobility and environmental protection expert contributors unveil a narrowing of the discourse on sustainability that has taken place in Europe However a considerable discontinuity remains between the economic and environmental objectives of sustainable development and the authors argue that it is essential that conditions for a dynamic discourse open to multiple participants are developed Sustainable Development and Governance in Europe will be of strong interest to students and scholars of comparative politics governance sustainable development and environmental politics and studies

Governmentality in EU External Trade and Environment Policy Jessica Lawrence, 2018-02-07

Governmentality and EU External Trade and Environment Policy applies theories drawn from Foucauldian governmentality studies to investigate the ideological and political roots of the European Union EU s external trade and environmental policy and their effects on the transnational legal landscape The EU s desire to spread environmental norms abroad is viewed in the book as a significant feature of contemporary EU trade policy The EU s activities in this area have not been uncontroversial for other transnational legal actors States individuals and organizations have challenged the EU s various trade and environment policies arguing that they are coercive unfair over reaching or inefficient Meanwhile these policies have also raised a number of questions from the perspective of legality and political theory This book considers what the practice of EU external trade and environment policy and international resistance to it tells us about the way the EU perceives the role and limits of transnational government the means and ends of politics and the drivers of human and institutional behavior Jessica Lawrence examines the legal and political discourse of the EU and those affected by its policies By studying legal cases statements by officials legislative texts press releases and other representative documents the book identifies the rationalities technologies and subjectivities that underlie contemporary EU activity in this area The overall effect paints a more complicated and nuanced picture of the EU s vision of itself and its goals one that ultimately seeks to provide a better understanding of the functioning of power in this area
