Environmental Problems And Human Behavior:

Environmental Problems and Human Behavior Gerald T. Gardner, Paul C. Stern, 1996 This book examines the behavioural dimensions of global and regional environmental problems such as the greenhouse effect ozone depletion deforestation air pollution and water pollution The book asks What does our knowledge of human behaviour tell us about the root causes of environmental problems and about strategies for solving them Gardner and Stern seek to answer these questions by presenting a new synthesis of relevant research findings and theories from psychology the other behavioural and social sciences and other disciplines

Psychology and Environmental Change Raymond S. Nickerson, 2002-12-18 This book stimulates thinking on the topic of detrimental environmental change and how research psychologists can help to address the problem In addition to reporting environmentally relevant psychological research the author identifies the most pressing questions from an environmental point of view Psychology and Environmental Change focuses on ways in which human behavior contributes to the problem deals with the assessment and change of attitudes and with studies of change of behavior proposes ways in which psychological research can contribute to making technology and its products more environmentally benign and introduces topics such as consumption risk assessment cost benefit and tradeoff analyses competition negotiation and policymaking and how they relate to the objective of protecting the environment

Human Behavior and Environmental Sustainability Charles Vlek, Linda Steg, 2007-03-20 Environmental sustainability is a necessity for all countries worldwide and it is strongly related to human quality of life Given that sustainability problems largely result from human environment interactions social and behavioral research is developing as a necessary complement to natural science and technological studies of environmental problems To demonstrate this the various authors address key theoretical methodological and policy making questions about the behavioral dimensions of environmental sustainability Successively considered are the appreciation of environmental risk citizens annoyance from environmental noise the evaluation of urban environmental quality the restorative significance of nature experiences fundamental behavioral processes and environmental motivations and unsustainable behavior change and the roles of technology therein The usefulness of multidisciplinary research is emphasized Finally explicated is psychology's drive and potential for analyzing and supporting environmental sustainability as a long term human social and economic interest

Behavior and Environment T. Garling, R.G. Golledge, 1993-01-28 Active researchers in the areas of geography and psychology have contributed to this book Both fields are capable of increasing our scientific knowledge of how human behavior is interfaced with the molar physical environment Such knowledge is essential for the solution of many of today's most urgent environmental problems Failure to constrain use of scarce resources pollution due to human activities creation of technological hazards and deteriorating urban quality due to vandalism and crime are all well known examples The influence of psychology in geographical research has long been appreciated but it is only recently that psychologists have recognized they have

something to learn from geography In identifying the importance of two way interdisciplinary communication a psychologist and a geographer have been invited to each write a chapter in this book on a designated topic so that close comparisons can be drawn as to how the two disciplines approach the same difficulties Since the disciplines are to some extent complementary it is hoped that this close collaboration will have synergistic effects on the attempts of both to find solutions to environmental problems through an increased understanding of the many behavior environment interfaces

Environmental Problems/behavioral Solutions John D. Cone, Steven C. Environmental Law from the Policy Perspective Chad J. McGuire,2014-03-17 Most books on environment law focus on the law first and then look at how environmental problems are dealt with in relation to the law Taking a fresh approach *Environmental Law from the Policy Perspective Understanding How Legal Frameworks Influence Environmental Problem Solving* examines environmental problems first followed by an examination Essentials of Human Behavior Elizabeth D. Hutchison,Leanne Wood,2025-07-08 *Essentials of Human Behavior* by Elizabeth D Hutchison and Leanne Wood integrates the key framework of time person and environment into a single streamlined text The Fourth Edition is updated to address equity and inclusion trauma and resilience environmental justice and gender identity and expression **Human Behavior and Environment** Irwin Altman,Joachim F. Wohlwill,2012-12-06 The papers comprising this second volume of *Human Behavior and the Environment* represent as do their predecessors a cross section of current work in the broad area of problems dealing with interrelationships between the physical environment and human behavior at both the individual and

the aggregate levels Considering the two volumes as a unit we have included papers covering a broad spectrum of problems ranging from the theoretical to the applied and from the disciplinary based to the interdisciplinary and professional Approximately half of the papers are written by psychologists with the remainder coming in part from such other disciplines as sociology geography and from such diverse applied and professional fields as natural recreation landscape architecture urban planning and operations research The volumes thus provide an overview of work on current topical problems Yet as the field is developing specialization is inevitably increasing apace and the editors as well as the publisher have become convinced of the desirability for future volumes in this series to be organized along topical lines with successive volumes devoted to different aspects of this rather sprawling field Thus Volume 3 currently in the planning stage will be devoted exclusively to the interaction of children with the physical environment considered from diverse viewpoints again including authors from diverse fields of specialization
