

In 1990, the first United Nations (UN) intergovernmental report on climate change stated that “the gravest effects of climate change may be those on human migration as millions will be displaced”.<sup>17</sup> And in 1994, paragraph 10.7 of the Programme of Action of the International Conference on Population and Development (held in Cairo and widely understood as the first major occurrence of migration issues in international debates) stated that “Governments are encouraged to consider requests for migration from countries whose existence, according to available scientific evidence, is imminently threatened by global warming and climate change”.<sup>18</sup>

These early research and policy discussions were heavily embedded in a climate change agenda, characterised by a strategy to raise awareness surrounding the potential impact of climate change on migration – and on security at large. In this approach, “environmental migrants” were portrayed as forced to leave their country and as moving exclusively for climate change-related reasons, while the tone of the debate was future-oriented – hence favouring usually alarmist predictions rather than empirical analysis of already-existing flows. This clearly clashed with most migration researchers’ convictions and led to a long-standing divide between natural and social scientists: while the former took for granted the interrelation between environmental deterioration and migration and stressed the very high number of people concerned, the latter considered the environment as, at most, one driver of migration among many others and were very cautious regarding the estimates put forward.<sup>19</sup> Moreover, alarmist predictions that aimed at sensitizing Governments and public opinions rather contributed to further stigmatise migrants from less developed States, while migration researchers reacted in a very defensive way that did little to favour a sound debate between disciplines.

Today, it would seem that, although the debate still goes on, the disciplinary divide is gradually being overcome: environmental scientists tend to be more cautious while migration specialists do recognize the role of the natural environment in migration dynamics. On the whole, most scholars now dismiss the apocalyptic predictions that used to influence debates; there is also a consensus on the fact that available evidence regarding the processes at stakes is still far

*Documenting the Undocumented* Veronica P. Fynn, 2010 Proceedings of the annual conference held Apr 16 17 2009 at York University At Risk Piers Blaikie, Terry Cannon, Ian Davis, Ben Wisner, 2014-01-21 The term natural disaster is often used to refer to natural events such as earthquakes hurricanes or floods However the phrase natural disaster suggests an uncritical acceptance of a deeply engrained ideological and cultural myth At Risk questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration but as a signal failure of mainstream development Two analytical models are provided as tools for understanding vulnerability One links remote and distant root causes to unsafe conditions in a progression of vulnerability The other uses the concepts of access and livelihood to understand why some households are more vulnerable than others Examining key natural events and incorporating strategies to create a safer world this revised edition is an important resource for those involved in the fields of environment and development studies Conflict and the Environment N.P. There is growing political concern about the increasing numbers of people displaced both within the borders of their countries and internationally This volume explores the interrelated drivers of contemporary global displacement with a particular focus on low level conflict climatic and environmental change and infrastructure development The authors examine the governance of global displacement assessing the protection needs and responses of national governments and the international community It further considers options for improving the humanitarian and political management of this growing problem **Migration and Disruptions** Brenda J. Baker, Takeyuki Tsuda, 2018-03-19 In this groundbreaking

unifying theory of migration a group of researchers from various anthropological disciplines attempt to identify the social and environmental disruptions that led to migration regardless of its temporal space Never before has such a diverse group of scholars met to identify and codify across time the reasons humans migrate *Environment, Scarcity, and Violence* Thomas F. Homer-Dixon, 2010-07-01 The Earth's human population is expected to pass eight billion by the year 2025 while rapid growth in the global economy will spur ever increasing demands for natural resources The world will consequently face growing scarcities of such vital renewable resources as cropland fresh water and forests Thomas Homer Dixon argues in this sobering book that these environmental scarcities will have profound social consequences contributing to insurrections ethnic clashes urban unrest and other forms of civil violence especially in the developing world Homer Dixon synthesizes work from a wide range of international research projects to develop a detailed model of the sources of environmental scarcity He refers to water shortages in China population growth in sub Saharan Africa and land distribution in Mexico for example to show that scarcities stem from the degradation and depletion of renewable resources the increased demand for these resources and or their unequal distribution He shows that these scarcities can lead to deepened poverty large scale migrations sharpened social cleavages and weakened institutions And he describes the kinds of violence that can result from these social effects arguing that conflicts in Chiapas Mexico and ongoing turmoil in many African and Asian countries for instance are already partly a consequence of scarcity Homer Dixon is careful to point out that the effects of environmental scarcity are indirect and act in combination with other social political and economic stresses He also acknowledges that human ingenuity can reduce the likelihood of conflict particularly in countries with efficient markets capable states and an educated populace But he argues that the violent consequences of scarcity should not be underestimated especially when about half the world's population depends directly on local renewables for their day to day well being In the next decades he

writes growing scarcities will affect billions of people with unprecedented severity and at an unparalleled scale and pace Clearly written and forcefully argued this book will become the standard work on the complex relationship between environmental scarcities and human violence      **Global Justice and Sustainable Development** Duncan

*Nigeria's Resource Wars* Egodi Uchendu,2021-03-02 Nigeria s Resource Wars reflects on the diversity of conflicts over access to and allocation of resources in Nigeria From the devastating effects of crude oil exploration in the Niger Delta to desertification caused by climate change and illegal gold mining in Zamfara to mention a few Nigeria faces new dimensions of resource related struggles The ravaging effects of these resource conflicts between crop farmers and Fulani herders in Nigeria s Middlebelt and states across Southern Nigeria call for urgent scholarly interventions with the Fulani cattle

breeders onslaught altering the histories of many Nigerian families through deaths loss of homes and investments and permanent physical incapacity Currently there is an almost total breakdown of interethnic relations with political commentators acknowledging that Nigeria has never been so divided as it presently is in its history The struggles have now degenerated into kidnaps armed robbery and incessant targeted and random killings across the country compounding the already complex problem of insecurity in Nigeria The chapters in this volume engage with these issues presenting the different arguments on resource conflicts in Nigeria They draw insights from similar conflicts in Nigeria s colonial post independence past and events from around the world to proffer possible solutions to resource related confrontations in Africa By offering a collection of different intellectual perspectives on resource conflicts in Nigeria this volume will be an important reference material for understanding the diversity of thought patterns that underpin the struggle and policy approaches towards resolving conflict situations in Africa This volume will be of considerable interest to scholars of Africa researchers in the humanities social sciences and conflict studies and policymakers interested in understanding the resource crisis in Africa

**Cooperative Sovereignty** Franz Xaver Perrez, 2021-10-25 In the late 20th century it has become widely accepted that States need to cooperate in order to pursue effectively their interests within the increasingly interdependent world order At the same time the principle of sovereignty is still often invoked as a claim for independence and a justification for non cooperation This book goes beyond that traditional understanding to develop a new theory which holds that cooperation between States is not an independent principle supplementing State sovereignty or even a counterweight to State sovereignty Rather cooperation should be conceived an element of the very notion of sovereignty itself Sovereignty is not a negative principle meaning merely State independence and freedom but it also inherently includes a positive element which stresses a State s innate membership in the international community and its authority its responsibility its duty to participate actively in that community In short sovereignty not only means independence it also means a responsibility to cooperate The first part of the book traces the history of the principle of sovereignty from the theories of Grotius and Francisco de Vitoria to the modern understanding of the principle in the light of the United Nations system The second part of the book poses challenges to the traditional concept of sovereignty in the light

of the 20th century interdependence and the third part goes on to formulate a new theory which takes into account the principles of customary law and treaty law The conclusions drawn on by the author are refreshing but may also be controversial and this book will most definitely contribute to the discussion and development of the principle of sovereignty in international law

**The Refugee in International Law** Guy S. Goodwin-Gill, Jane McAdam, 2021-09-09 The status of the refugee in international law and of everyone entitled to protection has ever been precarious not least in times of heightened and heated debate people have always moved in search of safety and they always will In this completely revised and updated edition the authors cast new light on the refugee definition the meaning of persecution including with regard to gender and sexual orientation and the protection due to refugees and those affected by statelessness or disasters They review the fundamental principle of non refoulement as a restraint on the conduct of States even as States themselves seek new ways to prevent the arrival of those in search of refuge Related principles of protection non discrimination due process rescue at sea and solutions are analysed in light of the actual practice of States UNHCR and treaty monitoring bodies The authors closely examine relevant international standards and the role of UNHCR States and civil society in providing protection contributing to the development of international refugee law and promoting solutions New chapters focus on the evolving rules on nationality statelessness and displacement due to disasters and climate change This expanded edition factors in the challenges posed by the movement of people across land and sea in search of refuge and their interception reception and later treatment The overall aim remains the same as in previous editions to provide a sound basis for protection in international law taking full account of State and community interests and recognizing the need to bridge gaps in the regime which now has 100 years of law and practice behind it

**Migration and Development** Savina Ammassari, 2012-11-16 This book focuses on international migration and return of highly skilled Ghanaians and Ivorians and presents empirical research findings that demonstrate that under certain circumstances return migrants can act as key development agents in their home country It investigates the influence of a number of factors that condition their motivation to return and their capacity to stimulate change in their countries of origin The aim of the study is the assessment of policy implications related to returnees development impact in evolving socio economic contexts The comparative and multi method research strategy adopted revealed that migrants tend to return home with considerable savings financial capital new knowledge skills and ideas human capital as well as with valuable contacts social capital Besides their level of education work profile and particular life experience whether these migrants have worked abroad for a significant period proved the most critical factor influencing their acquisition of different kinds of capital However there seems to be an optimum work duration abroad approximately five years after which the benefits deriving from human and financial capital acquisition tend to stabilise At the micro level back home skilled migrants attained their goals improving their relative income levels expressing satisfaction with their work conditions and more generally enjoying a higher quality of life At the meso level they provided support to

others in line with expectations and pressures they faced They also introduced many kinds of new knowledge skills and ideas in their workplace At the macro level return migrants promoted economic and political transformations through among others the creation of new businesses and various community development initiatives The role of return migrants is influenced by many factors linked also to their situation back home Reintegration into their home context proved challenging especially for women and returning migrants need time to overcome initial hurdles and get settled before they can start to make any meaningful contribution That is one of the reasons why there is a need to facilitate their reintegration and create a conducive environment which can also foster return migration of the highly skilled lite More importantly however evidence is produced in favour of arguments and ideas about brain circulation a strategy that can help in maximising the positive effects stemming from migration and return
