Environmental Stewardship Dorothy J. Howell, 1997-07-23 This work addresses the cultural background of stewardship as a progression from individual personal aesthetics to a deeply informed environmental ethic that could become a national environmental policy Howell begins by assessing our personal cultural background and our philosophical notions of our role in the natural world She looks at the evolution of Western civilization and changing worldviews in relation to nature examining especially early conceptions of a more appealing simpler life closer to nature in contrast to the perceived civilized world that is portrayed as decadent Howell examines archetypes from literature and the popular arts finding examples in Jungian psychology and in contemporary film and television that support the Wild Man image and promote the Simple Life yearning She then looks at the early 20th century conservation and preservation writers as the most direct ancestors of today's environmental movement and an immediate source of inspiration

Latin American Popular Culture Since Independence William H. Beezley, Linda Ann Curcio, 2012 This unique reader offers an engaging collection of essays that highlight the diversity of Latin America s cultural expressions from independence to the present Leading historians explore funerals dance and music letters

and literature spectacles and monuments and world's fairs and food. These themes and events highlight the ways in which a wide range of individuals with copious at times contradictory motives attempted to forge identity, turn the world upside down, mock their betters, forget their troubles through dance, express love in letters and altogether enjoy life. The authors analyze case studies from Argentina, Brazil, the Dominican Republic, Ecuador, Mexico, Nicaragua, Peru, and Trinidad Tobago, tracing how their examples resonate in the rest of the region. They show how people could and did find opportunities to escape if only occasionally their daily drudgery, making lives for themselves of greater variety than the constant quest for dominance, drive for profits or knee-jerk resistance to the social or economic order so often described in cultural studies. Instead, this rich text introduces the complexity of motives behind and the diversity of expressions of popular culture in Latin America.

Sustainability Management and Strategy

Igazeuma Adikema Okoroba, Enoch Opare Mintah, Robert Ebo Hinson, 2025-06-30

With Africa predicted to emerge as a leading market in the coming years, the debate on sustainability, especially on the mitigation of business impact on the continent's environment and society, cannot be underestimated. Prior to the worsening impact of climate change, the continent has historically been struggling to consolidate sustainability efforts in driving social and environmental protection caused by both foreign major and local business activities in the region. To capture current social and environmental injustice plaguing the African continent, Secretary General Prof. Petteri Taalas of the World Meteorological Organization (WMO) opined that Africa is responsible for less than 10 percent of global greenhouse gas emissions, but it is the continent which is the least able to cope with the negative impacts of climate change. Heatwaves, heavy rains, floods, tropical cyclones, and prolonged droughts are having devastating impacts on communities and economies, with increasing numbers of people at risk. Sustainability Reporting Frameworks have empowered sustainability leaders, most especially Chief Sustainability Officers (CSOs) in organizations, to develop practical strategies for leading sustainability-related issues while driving systemic change for collective thinking towards mitigating the impact of climate change on society and the environment. While there is undoubtedly a plethora of standards, codes, and toolkits to help frame the sustainability drive, with leading CSOs around the globe sharing their lived experiences, the narrative for best practices and what the content of sustainability initiatives and reporting should be have been skewed to the Western or advanced economies narrative. This reporting has drowned out other continent-specific narratives that offer a diverse pool of perspectives and locally rich content on some sustainability actions and achievements, especially from CSOs. The role of business sustainability leaders and CSOs in Africa in positioning the continent as the market of tomorrow, with sound and robust sustainability practices, needs to be spotlighted. Owing to the gap, this book brings the urgency to light through case studies and stories from leading African businesses while capturing their sustainability strategies and

achievements This book moves beyond the experience and context of business in advanced economies and responds to the need for an alternative narrative of sustainability leadership in Africa The focus of this book is on the role of sustainability leadership over the last decade and discusses the contributions and challenges of navigating this multi disciplinary function in different sectors The authors share their insight into this under researched and under reported perspective highly relevant to business and sustainability and environmental social and governance ESG reporting in a growing region like Africa

A Case Study in Thomistic Environmental Ethics Robert L. Grant, 2007 This original study applies the philosophical theological thought of Thomas Aquinas to issues of environmental ethics specifically in relation to the restoration and preservation of the plains of the Loess Hills in Iowa This study should appeal to scholars working in environmental ethics philosophy theology and ecology Thomas Aquinas Summa Theologiae to a particular environmental region namely the Loess Hills of Iowa The book begins by telling the ecological story of the Loess Hills and then proceeds to summarize the development of environmental ethics through the legacy of Henry David Thoreau thereby revealing certain tensions that exist in contemporary environmental debates Then after considering the strengths and weaknesses of anthropocentric and ecocentric ethical systems the author provides an exposition of Aquinas understanding of the bonum naturalis the bonum connaturalis and the bonum supernaturalis as these are found in the Summa Theologiae flourishing only in ways that simultaneously save the contextualizing ecosystems This ethic is then applied to the particular case of the Loess Hills producing an eudaimonistic ecoregionalism

Environmental Values in American Popular-culture Narratives Kelly Christine Ball-Stahl, 2005

Bibliographic Index ,1997 Interpreting Energy at Museums and Historic Sites Leah S. Glaser,2022-12-13

Experts all agree that human beings can mitigate climate change by changing how we use energy for heat light movement and production Stewards of heritage sites and collections can engage the public at the grassroots level to raise awareness about the cultural and socioeconomic reasons for past choices that have contributed to climate change This book will help cultural institutions identify ways to interpret new stories through historic places and resources especially if staff have made the commitment to go green Without place based context discussions about energy focus primarily on the science and not the human experience By reminding us of our past practices and values regarding energy production and use historic places can inspire different ways of thinking about transitioning to different energy sources and question the doctrine that high energy use is necessary for progress Public interpretation can expose the vast energy infrastructure and the impact of energy extraction production and use on place Historic sites offer place based contexts for visitors to interact with and think critically about the processes and the impact of energy development in for example a maritime village This book synthesizes science with the humanities outside of popular media and other politicized spaces to identify different kinds of energy resources in many historic collections or sites It supplements current calls for economic and policy changes because as stewards of historic places we need to do what we can in this all hands on deck moment to prepare for shared stewardship of our future Planting Nature Shaul E. Cohen,2004-05-11 Trees hold a powerful place in American constructions of what is good in nature and the environment As we attempt to cope with environmental crises trees are increasingly enlisted with great fervor as agents of our stewardship over nature In this innovative and impassioned book Shaul E Cohen exposes the way that environmental stewardship is undermined through the manipulation of trees and the people who plant them by a partnership of big business the government and tree planting groups He reveals how positive associations and symbols that have been invested in trees are exploited by an interlocking network of government agencies private timber companies and nongovernmental organizations to subvert the power of people who think that they are building a better world Planting Nature details the history of tree planting in the United States and the rise of popular sentiment around trees including the development of the Arbor Day holiday and tree planting groups such as the National Arbor Day Foundation and American Forests Drawing from internal papers government publications advertisements and archival documents Cohen illustrates how organizations promote tree planting as a way of shifting attention away from the causes of environmental problems to their symptoms masking business as usual agendas Ultimately Planting Nature challenges the relationships between a green public the organizations that promote their causes and the powers that be providing a cautionary tale of cooperation and deception that cuts across the political spectrum Current Contents.
