Environmentalism and the Mass Media Graham Chapman, Caroline Fraser, Ivor Gaber, Keval Kumar, 2003-06-24

Drawing on interviews with journalists media pictures and public opinion surveys in both UK and India the authors outline the differing cultural religious and political contexts which form the world views of North and South **Media, Politics and**

Environment Detlef Briesen, Sarada Prasanna Das, 2023-07-15 Environmental protection has not equally established itself as a permanent fixture in the political systems of all countries to date governments and entire societies have responded to environmental challenges in a variety of ways and concrete environmental policy is still a highly national matter Moreover the perception of environmental problems varies considerably on a global scale The reasons normally cited for these differences largely stem from the environmental policy debates themselves e g poverty ignorance capital interests etc In contrast this book shows that concrete environmental policy emerges from a complex interplay of mass media and political conflicts first the mass media provide the framework for national environmental policy through agenda setting framing and scandalization second the mass media thereby change values in the political and social discourse e g by altering the perception of global commons and expanding the possibilities of interest articulation and third this can lead to political decision making processes in which legal and other measures for environmental protection are enforced The book systematically compares industrialized countries such as Germany and Japan with several rapidly emerging countries in South and Southeast Asia *Environmental Risks and the Media* Barbara Adam, Stuart Allan, Cynthia Carter, 2013-01-11

Environmental Risks and the Media explores the ways in which environmental risks threats and hazards are represented transformed and contested by the media At a time when popular conceptions of the environment as a stable natural world with which humanity interferes are being increasingly contested the medias methods of encouraging audiences to think about environmental risks from the BSE or mad cow crisis to global climate change are becoming more and more controversial Examining large scale disasters as well as everyday hazards the contributors consider the tensions between entertainment and information in media coverage of the environment How do the media frame expert counter expert and lay public definitions of environmental risk What role do environmental pressure groups like Greenpeace or eco warriors and green guerrillas play in shaping what gets covered and how Does the media emphasis on spectacular events at the expense of issue sensitive reporting exacerbate the public tendency to overestimate sudden and violent risks and underestimate chronic long term ones **Communication and Environment: Sustainability and Risks (Penerbit USM)** Hamidah Abd.

Hamid, Azman Azwan Azmawati, Jamilah Hj. Ahmad, Nik Norma Nik Hasan, 2014-11-25 There is a dearth of literature on environmental communication within the non western world The few existing ones are scattered and not easily available Thus there is a dire need to document research and literature in the field The opportunity arose at the 2009 International Conference on Communication and Environment held in Penang Malaysia The international conference with the theme

Transformation for a Sustainable Tomorrow organised by the School of Communication Universiti Sains Malaysia USM attracted scholars practitioners and activists from around the world to listen and deliberate on various aspects of communication and environment The post conference review resulted in the selection of 24 papers to be compiled into this edited volume The escalating degradation of environment locally and globally was the main concern that prompted discussions on how sustainability can be advocated The development process in many countries economic activities and political decisions on issues such as deforestation for timber logging rapid urbanisation pertinently points out that environmental degradation and any communication on environmental change has to be grounded and located within the wider context of social politics and economics of the society Communication and environmental communication for that matter have also to be understood within these wider contexts Many would agree that a constant and consistent flow of information communicated through different channels to different stakeholders at the right time and destinations can help raise awareness and consciousness of environmental problems protection and preservation This vital information can enable the public and stakeholders to make informed choices and take actions whenever possible A lack of communication and information will inordinately exacerbate the situation of environmental degradation This book thus highlights how the environment is being treated in the media communicated to the society and impacted nations The chapters are grouped into the following sections Theoretical and conceptual issues Media content and the environment Politics communication and the environment Corporate social and environmental responsibility and Citizen participation human rights and the environment The editors acknowledge the excellent contributions of all the authors and are indebted to the members of the review panel the external reviewer USM Publications Committee and staff of Universiti Sains Malaysia Press for their help in ensuring the quality of this volume Most importantly we express our gratitude to USM for providing the financial support for the international conference and making it possible to publish this book The Editors January 2012 Universiti Sains Malaysia Penerbit Universiti Sains Malaysia

The Local and the Digital in Environmental Communication Joana

Díaz-Pont, Pieter Maesele, Annika Egan Sjölander, Maitreyee Mishra, Kerrie Foxwell-Norton, 2020-05-05 This volume interrogates the intertwining of the local and the digital in environmental communication It starts by introducing a wave metaphor to tease out major shifts in the field and situates the intersections of local places and digital networks in the beginning of a third wave Investigations that feature the centrality of place and digital communication platforms show how we today as researchers and practitioners communicate the environment Contributions identify the need for critical approaches that engage with the wider consequences of this changing media landscape unpacking local and global tensions in environmental communication research This empirical case study collection from different parts of the world shows that environmental activists and citizens creatively use digital technologies for campaign purposes It identifies new environmental communication challenges and opportunities as well as practices of environmental activists NGOs citizens and local

The Geopolitics of South Asia: From Early Empires to

the Nuclear Age Graham Chapman, 2018-10-22 Anyone who is planning on carrying out research in South Asia or indeed anyone who simply wishes to understand more about this cultural heartland should read this book. It shows how geological movements moulded the land of this unique cradle and how they still impact on it. Discussions are woven around the three major forces of integration. These are identitive forces: bonds of language, ethnicity, religion, or ideology; utilitarian forces; bonds of common material interest; and coercion, the institutional use or threat of physical violence. By studying these forces, Professor Chapman shows how the organization of territory has been central to the region's historic cultural, linguistic, and economic development. In addition to the material on the Northwest frontier, Afghanistan, and Kashmir, which was added for the second edition, the Northeastern borderlands are also now examined in this fully revised third edition. The current geopolitical state of the region is completely updated and greatly enhanced. *Environment, Media and Communication*

Anders Hansen, 2010-03-02 Communication about the environment in and through a broad array of news, advertising, art, and entertainment media is one of the major sources of public and political understanding of definitions, issues, and problems associated with the environment. *Environment, Media and Communication* examines the social, cultural, and political roles of the media as a public arena for images, representations, definitions, and controversy regarding the environment. The book starts by discussing and outlining a framework for analyzing media and communication roles in the emergence of the environment and environmental problems as issues for public and political concern. It proceeds to examine who and what drives the public agenda on environmental issues, addressing questions about how governments, scientists, experts, pressure groups, and other stakeholders have sought to use traditional as well as newer media for promoting their definitions of the key issues. The media are not merely an open public arena or stage but rather themselves a key gatekeeper and influence in the process of communicating about the environment; the role of news values, organizational arrangements, and professional practices are thus examined next. Recognizing the importance of wider popular culture narratives to public understanding and communication about the environment and nature, the book proceeds with a discussion of the messages and moral tales communicated about the environment, science, and nature in a range of media, including film and advertising media. It shows how this wider context provides important clues to understanding the successes and failures of selected environmental issues or campaigns. The book finishes with an examination of the key approaches and models used for understanding how the media influence and interact with public opinion and political decision making on environmental issues. Offering a comprehensive introduction to theoretical approaches and models for the study of media and communication roles regarding the environment and drawing on empirical research evidence and examples from Europe, America, Australia, and Asia, the book will be of interest to students in media communication studies, geography, environmental studies, political science, and sociology, as well as to environmental professionals and activists. **The Routledge Handbook of Environment and**
