AIChE Symposium Series American Institute of Chemical Engineers, 1972 **Environmentally Responsible Food Processing** K. Niranjana, Martin R. Okos, Marshall Rankowitz, 1994 **American Book Publishing Record**, 1995 *Index of Conference Proceedings* British Library. Document Supply Centre, 1994 *Proceedings in Print*, 1995 *Who's who in Finance and Industry*, 1998 **Bioengineering and Food Processing**, 1966 **Environmentally-Friendly Food Processing** B Mattsson, U Sonesson, 2003-09-30 Environmental awareness in the food industry has become increasingly important in recent years as a result of consumer pressure and increasing regulation This book addresses how to achieve environmentally friendly food production reviewing the assessment of various food products and the ways in which the industry can improve their operations and become more environmentally responsible Part one evaluates the environmental impact of food processing operations in such areas as fruit vegetable meat and fish processing Part two moves on to address good practice in food processing reviewing packaging recycling and waste treatment as well as methods of improving energy consumption and environmental training for the food industry Environmentally friendly food processing is an essential reference for all those concerned with environmental awareness and responsibility in the food industry Addresses how to achieve environmentally friendly food production reviewing the assessment of various food products and how the industry can become more environmentally responsible Evaluates the environmental impact of food processing operations in such areas as fruit vegetable meat and fish processing Reviews packaging recycling and waste treatment as well as methods of improving energy consumption and environmental training for the food industry *Sustainable Food Processing* Brijesh K. Tiwari, Tomas Norton, Nicholas M. Holden, 2013-12-31 Sustainable Food Processing Food processors face numerous challenges from ever changing economic social and environmental conditions With global inequalities increasing ingredient costs climbing and global climate change becoming a major political issue food producers must now address environmental concerns social responsibility and economic viability when shaping their food processing techniques for the future Food production preservation and distribution contribute to greenhouse gas emissions from the agri food sector therefore food producers require detailed industrially relevant information that addresses these challenges The food industry as one of the world's largest users of energy must embrace new ways of meeting the needs of the present without compromising future viability It is important that the industry does not merely focus on simple indicators of sustainability that are relatively easy to calculate and hold appeal for governments and the public but which do not properly address the many dimensions of sustainability This book provides a comprehensive overview of both economic sustainability and the environmental concerns that relate to food processing It is divided into four sections Part one deals with principles and assessment of sustainability in the context of food processing Part two summarises sustainability in various food processing applications within the food industry Part three considers sustainability in food manufacturing operations that are vital in food production systems and

Part four addresses sustainable food distribution and consumption As the most comprehensive reference book for industry to date this book will provide engineers educators researchers policy makers and scientists working in the food industry with a valuable resource for their work Alternatives to Conventional Food Processing 2nd Edition Andrew Proctor,2018-01-17 This updated edition provides a review of the current major technologies that reduce energy cost and reduce environmental impact while maintaining food safety and quality Sustainable Food Processing and Engineering Challenges Charis M. Galanakis,2021-03-16 Sustainability is becoming a major item for the food industry around the world as resources become more restricted and demand grows Food processing ensures that the resources required producing raw food materials and ingredients for food manufacturing are used most efficiently Responding to the goals of sustainability requires the maximum utilization of all raw materials produced and integration of activities throughout all the production to consumption stages To maximize the conversion of raw materials into consumer products food engineering and food processing challenges should be met Sustainable Food Processing and Engineering Challenges covers the most trend topics and challenges of sustainable food processing and food engineering giving emphasis in engineering packaging for a sustainable food chain food processing technologies Industry 4 0 applied to food food digestion engineering sustainable alternative food processing technologies physico chemical aspects of food cold plasma technology refrigeration climate control non thermal pasteurisation and sterilization nanotechnology and alternative processes requiring less resources sustainable innovation in food product design etc Edited by a multiple team of experts the book is aimed at food engineers who are seeking to improve efficiency of production systems and also researchers specialists chemical engineers and professionals working in food processing Covers the most trend topics and challenges of sustainable food processing and food engineering Brings developments in methods to reduce the carbon footprint of the food system Explores emerging topics such as Industry 4 0 applied to food and Food digestion engineering Green Technologies in Food Production and Processing Joyce I.
