Abstract: *The purpose of this study is to illuminate the best way to become an ideal academic teacher today. Additionally, it examines the role of teachers in academic settings. The purpose of this research is to determine the importance of 21st century teachers' digital competence qualifications. Teachers' professional qualifications include professional knowledge, professional practice, the integration of ICT (information and communication technology) into the teaching profession, and professional learning ethics and values. In this paper, digital skills are assessed in relation to academic fields as a means of enhancing education. A teacher's success depends on a variety of general skills, including cognitive and social communication skills, deep thinking skills, more efficient thinking skills, professional attitudes, professional learning competences, and personality and ideology competences.*

Keywords: *cognitive skill, deep thinking skill, digital competence, general skill, perfect teacher*

Introduction:

A teacher is the artisan who builds the talent of a nation. Teachers are invaluable resources for the nation because of their intellectual labour. Even though it is difficult to give a definite definition of an ideal teacher, there are several characteristics that can be observed in an ideal teacher. A discussion of the characteristics of perfection is provided below.

Quality of a perfect teacher:

A set of sustainable qualities and qualifications, consisting of professional knowledge, practical skills, beliefs, values, and attitudes, makes the ideal teacher qualified and enables him/her to effectively perform the duties and responsibilities assigned to him/her in the field of education. However, teaching qualifications are primarily concerned with the role of the teacher in the classroom. In order to be an ideal teacher, one must master vision and attitude perfectly.

Digital competence to be a perfect teacher:

In today's world, digital competence has changed the way people live their lives; it has made their lives easier and happier. The use of information and communication technologies has also added a new dimension to education. Students at this village school also learn in the classroom on the computer as well as by reading books. In order to build sustainable education, digital technology must be used to improve the overall quality of education. In order to train skilled workers to international standards, particularly in technical education, digital technology must be utilised. By using digital technology in the classroom, learning and teaching activities have become easier, more enjoyable, and more effective. Digital technology focuses on sophisticated instruments and knowledge-based science. By using multimedia, students will be able to gain a deeper understanding of this subject since it can be presented on
