Enlightenment For The Very Logical A New Beginning:

Enlightenment for the Very Logical Jennifer Jaye, 2002-10-01 The Haitian Revolution Eduardo Grüner, 2019-11-19 It is impossible to understand capitalism without analyzing slavery an institution that tied together three world regions Europe the Americas and Africa The exploitation of slave labor led to a form of proto globalization in which violence was indispensable to the production of wealth Against the background of this expanding circulation of capital and slave labor the first revolution in Latin America took place the Haitian Revolution which began in 1791 and culminated with Haiti s declaration of independence in 1804 Taking the Haitian Revolution as a paradigmatic case Gr ner shows that modernity is not a linear evolution from the center to the periphery but rather a co production developed in the context of highly unequal power relations where extreme forms of conquest and exploitation were an indispensable part of capital accumulation He also shows that the Haitian Revolution opened up a path to a different kind of modernity or counter modernity a path along which Latin America and the Caribbean have traveled ever since A key work of critical theory from a Latin American perspective this book will be of great interest to students and scholars of critical and cultural theory and of Latin America as well as anyone concerned with the global impact of capitalism colonialism and race *Manorial Capitalism, Enslavement, and the Logic of Dividuation* Raphael Sassower, 2025-03-31 Manorial Capitalism Enslavement and the Logic of Dividuation proffers three perspectives on the plantation slave economy of the Antebellum South The first explores the paternal function as exemplified in the structural authority of the lord of the manor both symbolically and operationally This figure of masculine authority persisted from the Medieval period to orchestrate what is called here Manorial Capitalism The second examines the exploitation and alienation that epitomize the logic of capitalism from the plantation economy to the present And the third deploys retroactively the logic of dividuation to the plantation a logic that draws its inspiration from neoliberal financial capitalism as well as from anthropological accounts which distinguish the dividual from the Cartesian Kantian individual This book argues that reducing individuals to dividuated components continues to enable a dehumanizing capitalist mindset to fixate on abstracted labor power rather than seeing laboring individuals *The Logic of History* C. Behan McCullagh, 2004-03-01 The Logic of History reveals the rational basis for historians descriptions interpretations and explanations of past events C Behan McCullagh defends the practice of history as more reliable than has recently been acknowledged Historians he argues make their accounts of the past as fair as they can and avoid misleading their readers He explains and discusses postmodern criticisms of history providing students and teachers of history with a renewed validation of their practice McCullagh takes the history debate to a new stage with bold replies to the major questions historians face today **Religion and Retributive Logic** Carole M. Cusack, Christopher Hartney, 2010 Garry Winston Trompf b 1940 in his outstanding academic career has inspired scholars in the fields of Studies in Religion and the History of Ideas In this volume his colleagues and students critique and expand upon the world of this outstanding academic The book is divided into four

parts Melanesia Ancient World Studies Philosophical and Methodological Considerations and Historiography Authors address Trompf s research in works such as The Idea of Historical Recurrence in Western Thought Early Christian Historiography and themes of Melanesian religion that Trompf address in Payback No study in the religions of oceania or ideals of millenialism should ignore this critical assessment of Garry Trompf s work The God of Jesus Stephen J. Patterson,1998-04-01 This book is the result of the author s involvement with the Jesus Seminar The premise is that the quest for the historical Jesus has always been closely related to the Christian search for God and that this is both good and necessary provided that one properly understands the relationship between history and theology and does not confuse the two Patterson develops s theology that might properly be called a Jesus Theology and it is here that his contribution to the discussions of and about Jesus makes it a most distinctive contribution **The Politics of Postsecular Religion** Ananda Abeysekara,2008-05-08 Ananda Abeysekara contends that democracy along with its cherished secular norms is founded on the idea of a promise deferred to the future Rooted in democracy s messianic promise is the belief that religious political identity such as Buddhist Hindu Sinhalese Christian Muslim or Tamil can be critiqued neutralized improved and changed even while remaining inseparable from the genocide of the past This facile belief he argues is precisely what distracts us from challenging the violence inherent in postcolonial political sovereignty At the same time we cannot simply dismiss the democratic concept since it permeates so deeply through our modernist capitalist and humanist selves In The Politics of Postsecular Religion Abeysekara invites us to reconsider our ethical political legacies to look at them not as problems but as aporias in the Derridean sense that is as contradictions or impasses incapable of resolution Disciplinary theorizing in religion and politics he argues is unable to identify the aporias of our postcolonial modernity The aporetic legacies which are like specters that cannot be wished away demand a new kind of thinking It is this thinking that Abeysekara calls mourning and un inheriting Un inheriting is a way of meditating on history that both avoids the simple binary of remembering and forgetting and provides an original perspective on heritage memory and time Abeysekara situates aporias in the settings and cultures of the United States France England Sri Lanka India and Tibet In presenting concrete examples of religion in public life he questions the task of refashioning the aporetic premises of liberalism and secularism Through close readings of Nietzsche Heidegger Arendt Derrida Butler and Agamben as well as Foucault Asad Chakrabarty Balibar and Zizek he offers readers a way to think about the futures of postsecular politics that is both dynamic and creative **Myōe the Dreamkeeper** George J. Tanabe, Jr.,2020-05-11 In the Kamakura period Myoe Shonin 1173 1232 was a leader of Nara Buddhists who sought to revitalize traditional Buddhism in Japan In his teaching Myoe specially emphasized the value of the visions that could be achieved through meditation and in his practice he kept and occasionally illustrated a diary of his own visions and significant night dreams The autograph copy of this remarkable document still exists although some pages have been scattered among collectors George J Tanabe Jr here presents in English the most comprehensive compilation of the diary in any language

Moreover his study of Myoe's life and teachings provides both a context within which the diary can be understood and a view of the often doctrinally contentious world of Kamakura Buddhism

The Rise of Modern Logic: from Leibniz to Frege Dov M. Gabbay, John Woods, 2004-03-08 With the publication of the present volume the Handbook of the History of Logic turns its attention to the rise of modern logic The period covered is 1685-1900 with this volume carving out the territory from Leibniz to Frege What is striking about this period is the earliness and persistence of what could be called the mathematical turn in logic Virtually every working logician is aware that after a centuries long run the logic that originated in antiquity came to be displaced by a new approach with a dominantly mathematical character It is however a substantial error to suppose that the mathematization of logic was in all essentials Frege's accomplishment or if not his alone a development ensuing from the second half of the nineteenth century The mathematical turn in logic although given considerable torque by events of the nineteenth century can with assurance be dated from the final quarter of the seventeenth century in the impressively prescient work of Leibniz It is true that in the three hundred year run up to the *Begriffsschrift* one does not see a smoothly continuous evolution of the mathematical turn but the idea that logic is mathematics albeit perhaps only the most general part of mathematics is one that attracted some degree of support throughout the entire period in question Still as Alfred North Whitehead once noted the relationship between mathematics and symbolic logic has been an uneasy one as is the present day association of mathematics with computing Some of this unease has a philosophical texture For example those who equate mathematics and logic sometimes disagree about the directionality of the purported identity Frege and Russell made themselves famous by insisting though for

different reasons that logic was the senior partner Indeed logicism is the view that mathematics can be re expressed without relevant loss in a suitably framed symbolic logic But for a number of thinkers who took an algebraic approach to logic the dependency relation was reversed with mathematics in some form emerging as the senior partner This was the precursor of the modern view that in its four main precincts set theory proof theory model theory and recursion theory logic is indeed a branch of pure mathematics It would be a mistake to leave the impression that the mathematization of logic or the logicization of mathematics was the sole concern of the history of logic between 1665 and 1900 There are in this long interval aspects of the modern unfolding of logic that bear no stamp of the imperial designs of mathematicians as the chapters on Kant and Hegel make clear Of the two Hegel's influence on logic is arguably the greater serving as a spur to the unfolding of an idealist tradition in logic a development that will be covered in a further volume British Logic in the Nineteenth Century

The Cambridge Companion to Leo Strauss Steven B. Smith, 2009-05-11 Leo Strauss was a central figure in the twentieth century renaissance of political philosophy The essays of The Cambridge Companion to Leo Strauss provide a comprehensive and non partisan survey of the major themes and problems that constituted Strauss's work These include his revival of the great quarrel between the ancients and the moderns his examination of tension between Jerusalem and Athens and most controversially his recovery of the tradition of esoteric writing The volume also examines Strauss's complex relation to a range of contemporary political movements and thinkers including Edmund Husserl Martin Heidegger Max Weber Carl Schmitt and Gershom Scholem as well as the creation of a distinctive school of Straussian political philosophy

Ernst Mach's Vienna 1895-1930 J.T. Blackmore, R. Itagaki, S. Tanaka, 2013-03-14 Section Guide 1 Prolegomena 2 Biographical Sketch 3 Epistemology 4 Textbook Ontology 1 PROLEGOMENA While both philosophers and historians almost always love truth and the search for truth and both often carry out extensive research there can be noticeable differences when historians write about the history of philosophy and when philosophers write about it Philosophers often look at the past with categories and interests taken from the present or at the least from the recent past but many historians especially those who love research for its own sake will try to look at the past from a perspective either from that period or from even earlier Both camps look for roots but view them with different lenses and presuppositions This prolegomena has been added to prepare some philosophers for what will hopefully only be the mildest of shocks for seeing the history of philosophy in a way which does not treat what is recent or latest as best but which loves the context of ideas for its own sake a context which can be very foreign to contemporary likes and dislikes To be sure we historians can deceive ourselves as easily as philosophers but we tend to do so about different things
