Enriched Composition and Inference in the Argument Structure of Chinese Ren Zhang, 2005-10-20 As with many other languages Mandarin Chinese exhibits a rich variety of ways in expressing the arguments of the predicator in a sentence Unlike other languages such variation is typically devoid of any formal marking Previous attempts in explaining such phenomena usually focus on the syntax as an explanatory tool This book argues that a large majority of such argument structure phenomena are better accounted for by recourse to enriched representations in lexical semantics Drawing insights from conceptual semantics cognitive semantics Generative Lexicon construction grammar and formal syntax this book constitutes the first attempt at a comprehensive account of lexical semantic issues in Mandarin Chinese **Enriched**

New Explorations in Chinese Theoretical Syntax Andrew Simpson, 2022-04-15 This volume brings together 19 cutting edge studies written by some of the most prominent linguists working on Chinese formal syntax as a Festschrift volume dedicated to Yen Hui Audrey Li The contributions to the volume address a wide range of issues currently developing in the field of Chinese syntax grouped into five thematic sections on the structure of lexical and functional projections modal verb syntax syntax semantics interactions the syntax and interpretation of particles and the acquisition of syntactic structures With its rich descriptive content sourced from different varieties of Chinese and its theoretical orientation and analyses the book provides an important new resource both for researchers with a primary interest in Chinese and other linguists interested in discovering how properties of Chinese can inform the analysis of other languages *The Interfaces of Chinese Syntax with Semantics and Pragmatics* Yicheng Wu, 2017-02-17 4 1 Predicative construction 4 2 Emphatic construction 5 Summary 7 The cleft construction 1 Introduction 2 Previous analyses 3 A dynamic analysis 4 Summary 8 Semantic underspecification Cases of personal pronouns 1 Introduction 2 Previous analysis of expletive ta 3 A dynamic analysis 3 1 A dynamic analysis of the typical and non typical referential construal of ta 3 2 A dynamic analysis of the expletive construal of ta 3 3 Scope interpretation and expletive ta 3 4 Some implications 4 Summary 9 Conclusion 1 Contributions to Chinese

linguistics 2 Reflections on linguistic theorizing Bibliography Index Integrating Chinese Linguistic Research and Language Teaching and Learning Hongyin Tao, 2016-10-03 Linguistic research and language teaching have generally been viewed as two separate types of academic endeavor While linguists have been preoccupied with pattern finding and theory building language teachers often encounter issues that are not readily addressed by theoretical linguistic research This collection with eleven papers touching upon a wide range of issues stands out as one of the rare concerted efforts toward a meaningful integration of the two endeavors Subject matters include tone stress word structure grammatical categories e g classifiers syntactic structures including argument structure discourse particles implicit and explicit knowledge conversational repair and learner corpus With a diverse range of theoretical orientations this collection serves to showcase some of the productive ways to create synergy between Chinese linguistic research and language education **Structural Markedness and Syntactic Structure** Rodrigo Gutiérrez-Bravo, 2013-10-15 This book investigates a number of word order phenomena in Spanish concentrating on this language s unmarked word order and the perturbations of this order that result from topicalization and wh movement **The Syntax of Negation and the Licensing of Negative Polarity Items in Hindi** Rajesh Kumar, 2013-10-15 This book studies syntax of NPIs and their interaction with sentential negatives in Hindi It outlines the clause structure of Hindi and locates the syntactic position of sentential negatives as well as constituent negatives within the structure It is argued that sentential negative in Hindi negation marker heads its own maximal projection NegP which is immediately dominated by TP In addition to locating the position of negation markers in the clause structure it outlines the distribution of negative polarity items NPIs in Hindi and the structural constraints on their licensing by sentential negative The book argues that an NPI in Hindi is licensed overtly in the course of derivation by a c commanding negative marker The bulk of the evidence presented in this book argues against previous theoretical accounts that claim that NPI licensing involves covert syntactic operations such as LF movement or reconstruction With respect to the classification of NPIs this book also shows the existence of two different types of NPIs in Hindi namely strong NPIs and weak NPIs Strong NPIs require a clause mate c commanding negative licensor whereas weak NPIs are quantifiers and are similar to free choice any in English that are interpreted as NPIs in the presence of a c commanding negative licensor **Syllable Weight** Matthew Gordon, 2007-05-07 The book is the first systematic exploration of a series of phonological phenomena previously thought to be unified under the rubric of syllable weight Drawing on a typological survey of 400 languages it is shown that the traditional conception that languages are internally consistent in their weight criteria across weight based processes is not corroborated by the cross linguistic survey Rather than being consistent across phenomena within individual languages weight turns out to be sensitive to the particular processes involved such that different phenomena display different distributions in weight criteria The book goes on to explore the motivations behind the process specific nature of weight showing that phonetic factors explain much of the variation in weight criteria between phenomena and also the variation in

criteria between languages for a single process The book is unlike other studies in combining an extensive typological survey with detailed phonetic analysis of many languages The finding that the widely studied phenomenon of syllable weight is not a unified phenomenon contrary to the established view is a significant result for the field of theoretical phonology The book is also an important contribution to the field of phonetically driven phonology since it establishes a close link between the phonology of weight and various quantitative phonetic parameters

Reassessing the Role of the Syllable in Italian Phonology Kristie McCrary Kambourakis, 2020-11-25 This book evaluates the predictions of syllable based analyses of Italian in three domains native speaker intuition of consonant cluster syllabification definite article allomorphy and segment duration and tests the claimed convergence of multiple phenomena on the same syllable structure

Artificial Hearing, Natural Speech Joanna Hart Lowenstein, 2013-09-13 This book explores the interface between speech perception and production through a longitudinal acoustic analysis of the speech of postlingually deaf adults with cochlear implants electrode and computer prostheses for the inner ear in cases of nerve deafness The methodology is based on the work of Joseph Perkell at MIT replicating and extending analysis to subjects with modern digital cochlear implants and processor technology Lowenstein also examines how cochlear implants are portrayed in dramatic and documentary television programs the scientific accuracy of those portrayals and what expectations might be taken away by viewers particularly given modern society's view that technology can overcome the frailties of the human body

The Semantics of the Future Bridget Copley, 2009-01-13 This book builds a semantics for several kinds of future referring expressions including will sentences be going to sentences and futurates While there exists previous work on future referring expressions this is the first treatment of such a variety of expressions in a formal semantic framework Arguments presented herein explicate the meanings of these expressions and account for similarities and differences among them Shared is a future oriented model with a systematic alternation between inertial and bouletic ordering sources that provide a new way of understanding the age old future Law of the Excluded Middle evident in all of the future referring expressions A difference found among these meanings is the presence or absence of progressive or generic like aspect in a position higher than the future modal These very high aspectual operators affect the temporal argument of the modal's accessibility relation with detectable effects that can be used to determine scope relations in future conditionals Copley's analysis thus addresses a number of issues of great interest to formal semanticists from modal and aspectual semantics to the mapping of functional elements in the clause to the logical form of conditionals

Discourse Adjectives Gina Taranto, 2013-10-15 First Published in 2006 This volume introduces and provides a semantic analysis of Discourse Adjectives a natural class of adjectives that the author argues includes apparent clear evident and obvious among its prototypical members With a main claim that Discourse Adjectives do not provide information about the facts of the world Rather they are used by interlocutors to negotiate the status of propositions in a discourse

Telicity and Durativity Andrea Luise Wilhelm, 2007-01-22 This book studies the linguistic representation of

events by examining the relevance of two salient event characteristics telicity and durativity to the grammatical system of natural language The study of events and of event characteristics is an important testing ground for theories on the boundary between extralinguistic and linguistic knowledge and on the relation between semantics and syntax Telicity and durativity are notions which have become increasingly influential in both the semantic and the syntactic i e grammaticalized representation of events The book furthers the understanding of events through the comparison of two genetically and typologically distinct languages German and D ne Sulin Chipewyan Athapaskan an indigenous language of Northwestern Canada It contains the first in depth documentation of the aspectual system of D ne Sulin and a careful analysis of the aspectual behaviour of German particle verbs A stringent methodology considers semantic pragmatic and grammatical factors in both languages The data reveal that telicity and durativity belong to profoundly different semantic and grammatical domains and that neither notion is grammaticalized universally While both notions are represented semantically in German as well as in D ne Sulin telicity is grammaticalized only in the former and durativity is grammaticalized only in the latter

European and Chinese Cognitive Styles and their Impact on Teaching Mathematics Filippo

Spagnolo, Benedetto Di Paola, 2010-04-05 The book provides strong evidence that research on the cognitive processes from arithmetic thought to algebraic thought should take into consideration the socio cultural context It is an important contribution to the literature on linguistic structure in comparative studies related to Chinese student mathematics learning This book not only makes a great contribution to research in mathematics education the findings of this study also addressed insightful approaches and thoughts of understanding the development of algebraic thinking in cultural contexts for classroom teachers Using written Chinese language from different theoretical references provided wonderful approaches for understanding student algebra cognitive development in a different way and calls educators for to pay special attention to an epistemological and linguistic view of algebraic development The findings inform classroom teachers that the cultural context plays an important role in student learning mathematics A typical analysis of the cognitive dimension involved in some in the historical and cultural contexts is a great resource for classroom teachers I really enjoyed reading this book and learned a lot from its compelling analysis Shuhua An Associate Professor and Director of Graduate Program in Mathematics Education
