Masculinities in Twentieth- and Twenty-first Century French and Francophone Literature Edith Biegler Vandervoort, 2011-05-25 The study of masculinities and gender identity in contemporary literature is relatively new and with each year of this millennium gains momentum Indeed as the women s movement becomes forceful in developing nations the question of tolerance to gays lesbians bisexuals and transvestites undergoes a similar process At a time when women refuse to be subjected to war crimes when they begin entering the workforce and realize the need to support their families independently and when they refuse to remain in abusive marriages or remain silent in countries where governments ignore their needs men and women are questioning the meaning of gender in their culture and often seek alternatives to established gender roles In some countries this entails organized demonstrations for additional civil rights while in others the expression of sexual freedom remains a question of remaining silent or risking public execution Thanks to the scholarly commitment of its authors this book examines the range of masculine expression on three continents Europe Africa and the Americas In this collection they write about men s past and present challenges male friendships and male immigrants and outcasts Paralleling the independence movement of France s former colonies the goal of this collection is to continue the expression of freedom toward understanding and tolerance of all variances of sexuality
