part Chapters 4 9 demonstrates the application and benefits of AIDAF and related models involving the above new ones for AI and Digital Transformation process as shown in more than six case studies I found this book to be a very nice contribution to the EA community of practice I can recommend this book as a textbook for digital IT strategists practitioners EA practitioners students in universities and graduate schools From the Foreword by Scott A Bernard In this new age of the digital information society it is necessary to advocate a new EA framework This book provides state of the art knowledge and practices about EA frameworks beneficial for IT practitioners IT strategists CIO IT architects and even students It serves as an introductory textbook for all who drive the information society in this era From the Foreword by Jun Murai   New Perspectives in Information Systems and Technologies, Volume 2 Álvaro Rocha,Ana Maria Correia,Felix . B Tan,Karl . A Stroetmann,2014-03-19 This book contains a selection of articles from The 2014 World Conference on Information Systems and Technologies WorldCIST 14 held between the 15th and 18th of April in Funchal Madeira Portugal a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences and challenges of modern Information Systems and Technologies research technological development and applications The main topics covered are Information and Knowledge Management Organizational Models and Information Systems Intelligent and Decision Support Systems Software Systems Architectures Applications and Tools Computer Networks Mobility and Pervasive Systems Radar Technologies Human Computer Interaction Health Informatics and Information Technologies in Education   Enterprise Architecture Turnaround Nagesh V. Anupindi,Gerard A. Coady,2011-12-22 To provide structure and transparency to the complex world of IT Enterprise Architecture was created However we created complexities within Enterprise Architecture with Frameworks that are not easily understandable and purposefully implementable In this book Nagesh and Gerry help to turnaround Enterprise Architecture organizations They introduce a simple IDEA Framework that is based on common practices and investments within IT organizations The Ten deliverables presented in this book bring structure and clarity to IT organizations that are 10 people IT shops and 1000 IT staff enterprises alike This book is not an ivory tower work it is actionable applied Enterprise Architecture It is also a healthy dose of EA tough love If you want to know why EA fails read the second chapter It is introspective it does not blame external forces the not my fault syndrome It also does not blame in fact it hardly mentions technology To be fair the Nagesh and Gerry do recognize external influences however they are viewed as risks that must be managed Most corporations focus on this years budget investments and rewards The same focus rolls downhill to the Information Technology department If the IT department has not successfully communicated the budget and managed to spend it within the limits 10% variance everything else may seem irrelevant Eventually Nagesh and Gerry started looking through current IT systems and IT assets to understand a where the current funds were being invested b how these investments jelled or were mandated because of the previous investments that had been made by IT and c how the companys business priorities aligned with future technology needs including the need to

meet compliance requirements Considering and discovering the answers to these three questions led Nagesh and Gerry to develop a definition of Enterprise Architecture that was based on technology investments Investment Driven Enterprise Architecture IDEA Framework The purpose of the IDEA Framework is to provide guidance on how the corporations future technology will be drafted and communicated Its method is to utilize actual systems hardware people and business functions in order to establish boundaries within which the IDEA Framework will work The structure of the IDEA Framework differs from that of many others because it consists of key deliverables that fit into day to day activities and it accommodates an enterprise wide strategic plan It also provides for the much needed interaction between these key deliverables and facilitates contributions from key stakeholders across Business Units and the various IT departments In essence the IDEA Framework takes the key deliverables stakeholders and organizations and demonstrates how they dynamically function together **Net Centricity and Technological Interoperability in Organizations: Perspectives and Strategies** Ghosh, Supriya,2009-11-30 This book provides understanding on the achievement of interoperability among organizations focusing on new structural design concepts Provided by publisher *Electronic Enterprise: Strategy and Architecture* Targowski, Andrew,2003-01-31 Electronic enterprise is the road map to well planned evolution of enterprise complexity with business and system strategies integration through standardized architectures of IT components This work provides a vision for IT leaders with practical solutions for IT implementation *Developing E-Government Projects: Frameworks and Methodologies* Mahmood, Zaigham,2013-06-30 The emergence of e government allows for effective governance increased transparency better management and efficient services through the use of the internet and information and communication technologies Therefore world governments are mobilizing large amounts of resources in order to implement and promote the use of e government Developing E Government Projects Frameworks and Methodologies presents frameworks and methodologies for strategies towards the design implementation and adoption of e government projects By providing best practices in the successful adoption of e government this book is essential for policy makers practitioners researchers and students interested in the approaches utilized for the successful implementation of e government projects **Advances in Artificial Intelligence: From Theory to Practice** Salem Benferhat,Karim Tabia,Moonis Ali,2017-06-10 The two volume set LNCS 10350 and 10351 constitutes the thoroughly refereed proceedings of the 30th International Conference on Industrial Engineering and Other Applications of Applied Intelligent Systems IEA AIE 2017 held in Arras France in June 2017 The 70 revised full papers presented together with 45 short papers and 3 invited talks were carefully reviewed and selected from 180 submissions They are organized in topical sections constraints planning and optimization data mining and machine learning sensors signal processing and data fusion recommender systems decision support systems knowledge representation and reasoning navigation control and autonome agents sentiment analysis and social media games computer vision and animation uncertainty management graphical models from theory to applications anomaly detection agronomy and

artificial intelligence applications of argumentation intelligent systems in healthcare and mhealth for health outcomes and innovative applications of textual analysis based on AI **Enterprise Architectures and Digital Administration** Ambrose Goikoetxea,2007 This is the first book that addresses all three main activities in improving business and technology decisions the planning design and assessment of enterprise architectures EAs Emphasis is on medium and large size organizations in the private sector such as banks airlines and auto industries and the public sector such as federal agencies local government organizations and military services in the Department of Defense The book addresses the challenges faced by EA builders through an organized presentation of the issues and a step by step approach The material is based on real life EA project experience and lessons learned over a decade working in multiple contractor multiple discipline teams and multiple agency environments **Exploration of Practices and Challenges in Enterprise Architecture** Hope, Thomas,2025-05-08 Enterprise architecture EA serves as a strategic framework that aligns an organization s business goals with its IT infrastructure enabling more effective decision making streamlined processes and agile adaptation to change As businesses face rapid digital transformation globalization and complexity in operations EA becomes a critical tool for achieving organizational coherence and resilience Implementing and maintaining EA practices comes with some challenges From securing stakeholders to managing new technologies and ensuring alignment across businesses organizations must navigate a range of technical organizational and cultural challenges Exploration of Practices and Challenges in Enterprise Architecture delves into the core practices of enterprise architecture for business governance It examines the key challenges that impact its successful adoption and sustainability in dynamic business environments This book covers topics such as e business software engineering and organizational development and is a useful resource for computer engineers business owners academicians researchers and scientists **Research and Practical Issues of Enterprise Information Systems II Volume 2** Li Xu,A. Min Tjoa,Sohail S. Chaudhry,2007-12-29 Enterprise information systems EIS have become increasingly popular over the last 15 years 1 2 EIS integrate and support business processes across functional boundaries in a supply chain environment 3 5 In recent years more and more enterprises world wide have adopted EIS such as Enterprise Resource Planning ERP for running their businesses Previously information systems such as CAD CAM MRPn and CRM were widely used for partial functional integration within a business organization With global operation global supply chain and fierce competition in place Acre is a need for suitable EIS such as ERP E Business or E Commerce systems to integrate extended enterprises in a supply chain environment with the objective of achieving efficiency competency and competitiveness As an example the global economy has forced business enterprises such as Dell and Microsoft to adopt ERP in order to take the advantage of strategic alliances within a global supply chain environment Today not only the large companies but also the medium companies are quickly learning that a highly integrated EIS is more and more a required element of doing business Businesses all over the world are investing bilhons of doUars in acquiring and implementing EIS in particular ERP systems

by SAP and Oracle As a result there is a growing demand for researching EIS to provide insights into challenges issues and solutions related to the design implementation and management of EIS **The Concept of Enterprise Architecture from Theory to Practice** Tiko Iyamu,2023-12-06 Even though the field of enterprise architecture EA has matured many organisations still struggle with its development and implementation particularly those organisations involved in continuous transformational cycles and subjected to different environmental trends This book is intended to assist organisations in getting a grip on the factors influencing EA implementation and gaining a deeper understanding of why things happen the way they do in the practice of EA It is a comprehensive and definitive resource that is useful to both business professionals and academics The book presents an approach for the development implementation or institutionalisation of EA that is independent of any method or other architecture frameworks It can be applied directly using a realistic selection of organizational variables The approach has two distinctive features that support EA even in complex environments From both technical and non technical perspectives it identifies influencing factors and how they manifest in the practice of EA in an organization It offers linear and practical mechanisms for developing and implementing EA to fortify the practice of the concept in an organisation This approach represents a significant contribution to EA Starting with descriptions for EA the book offers deepened models and frameworks for the development and implementation of EA at the domain level It also covers factors upon which a model is built for the institutionalisation of the concept Additionally the book discusses the implications of EA for sponsors architects and other stakeholders responsible for EA development implementation and institutionalisation *Advances in Information Systems and Technologies* Álvaro Rocha,Ana Maria Correia,Tom Wilson,Karl A.
