The report reviews labor outcomes and evaluates the benefits of rapid growth to workers and the impact that the region's role in the global economy has had on them. It also examines labor market policies and institutions in the region, labor in the transition economies, and the outlook for East Asian workers in the 21st century. The Russian Labour Market Vladimir Gimpelson, Douglas Lippoldt, 2002-07-15
Labour markets are a central element of any transition from planned economy to market-oriented system. This groundbreaking book examines the plight of Russian workers and employers during the first decade of post-Soviet reforms. The authors argue that higher than expected labour market flexibility early in the transition provided an important cushion for workers who would have been displaced with little recourse to social protection. However, over time, this flexibility reduced pressure for enterprise restructuring and accommodated policy drift. Although many workers were quite mobile, often this translated into a loss of human capital for older enterprises, even potentially viable ones, and to churning in the labour market accompanied by only limited restructuring. There was little job creation, labour hoarding persisted, and many workers saw their wages eroded by inflation and late payment of wages. The authors show this situation was largely the result of insufficient structural reforms, poor institutional development, and misplaced incentives. First providing an overview of the economic situation, key labour market trends, and the institutional situation during the 1990s, the book then reviews labour market dynamics. The authors assess changes in old jobs at former state enterprises and evaluate new job creation, mostly in private businesses. They examine the evolution of wages and the availability of social protection to workers. A special thematic section considers the political economy of labour market policy that brought the Russian approach to labour market adjustment to life. The conclusion presents an integrated picture of the Russian labour market in the aftermath of the early transition period and highlights the implications of the experience for current policy.

Real and Financial Economic Dynamics in Russia and Eastern Europe Timothy Lane, Nina Oding, Paul J.J. Welfens, 2012-12-06
Russia and many other transition countries are now facing the challenges of opening up, restructuring, and modernizing their economies, which requires addressing numerous institutional weaknesses and supply-side distortions. From a regional perspective, drawing on the experience of other reforming countries, the papers examine these issues. Aspects addressed include the implications of trade and capital flows, the process of labor market reform, financial market development, productivity growth, and innovation dynamics. The dynamics of the reform process are also studied in the context of new political economy models.

Business in Post-Communist Russia Mikhail Glazunov,2013-12-04 It is a widely held idea that Russia has completed its revolution which brought down the Soviet economy and that many companies after privatisation work as typical western companies Another belief is that Russia has adopted a market economy but then reverted to authoritarianism With these two ideas in mind this book discusses the suggestion that the key element of post Soviet economic and political reforms in the last two decades was the redistribution of assets from the state to oligarchs and the new elite It looks at why most Russian companies could not achieve strong long run corporate performance by analysing in detail a range of different Russian companies The book is a useful tool for understanding the future prospects for Russian business

Transition, Taxation and the State Dr Gerard Turley,2012-10-01 In economic terms three of the most important and controversial issues of our times are transition taxation and the role of the state This book examines the core associated problems of tax payment and collection in the context of transition from a centrally planned economy to a market economy and the persistence of the soft budget constraint While differences between the experiences of transition states vary the attitude of the state towards the control of the tax discipline its efficiency and vulnerability to corruption is shown to be a key issue in particular when political constraints are often more pressing than tax design or economic constraints Transition Taxation and the State will prove detailed and

Lieberman, Stilpon Nestor, Raj M. Desai, 1997-01-01 IFC Discussion Paper No 32 Over the years demand for education at all levels in Kenya has greatly outpaced supply a gap that has been reduced by private schools catering to the needs of a wide range of socioeconomic groups This gap will widen further unless the private sectors role is expanded but private educational institutions face a number of serious constraints primarily stemming from lack of adequate finance and in many cases limited management skills This paper reviews the market and its constraints and focuses on conditions under which private financial institutions and the International Finance Corporation might play a useful role in the sector Annexes include 1996 operating costs of Kenya s academic technical and vocational schools **Time to Rethink Privatization in Transition Economies?** John R. Nellis, 1999-01-01 IFC Discussion Paper No 38 QUOTEIt is now universally acknowledged that ownership matters that private ownership in and of itself is a major determinant of good performance in firms Decent economic policy and well functioning legal and administrative institutions matter greatly as well QUOTEThis paper looks at what happens when the shift to private ownership gets far out in front of the effort to build the institutional underpinnings of a capitalist economy The emphasis is on what went wrong and why and what if anything can be done to be correct it Proposals include renationalization and or postponement of further privatization both to be accompanied by measures to strengthen the managerial capacities of the state Neither approach seems likely to produce short term improvements The regrettable fact is that governments that botch privatization are equally likely to botch the management of state owned firms In a number of Central European transition countries privatization is living up to expectations and there is no need for such measures For institutionally weak countries the less dramatic but reasonable short term course of action is to push ahead more slowly with case by case and tender privatization in cooperation with the international assistance community in hopes of producing some success stories that will lead by example Structural Change, Welfare Systems, and Labour Reallocation Tito Boeri, 2000-10-19 This book studies the interaction between labour and social policies showing the crucial role labour plays in both the scope and the speed of transition By including the influence of education systems institution building and policy enforcement mechanisms this book goes beyond previous studies of the transition experience to provide a detailed analysis of the many contributing factors to the success or failure of the transition process *Institutional Change in Transition Economies* Michael Cuddy, 2019-01-15 This title was first published in 2002 The importance of institutions for transition economies has so far been overlooked Michael Cuddy and Ruvin Gekker bring together leading experts in the field to fill this crucial void in the literature The

contributors concentrate on an ongoing tension between informal constraints and mechanisms and the new formal rules and mechanisms that have gradually evolved through the transition period. Experiences are primarily drawn from Russia. The book consists of three parts: the first comprising an analysis, synthesis and generalizations of the institutional adaptations as a market economy slowly emerges from a fog of shifting rules and varying interpretations. This is followed by the study of business and taxation authorities' behavior as they try to minimize or maximize the taxation take. The volume also analyzes the challenges facing central and regional governments in delivering equitable levels of public services across regions of vastly different development levels while at the same time trying to stimulate regional economic growth.

Tax Politics in Eastern Europe Hilary Appel, 2011-07-28. This is the first book to systematically examine the variation in policies of Eastern European countries. There is a theoretical contribution to understandings of variation in tax policies but just as impressive is the in-depth empirical analysis and in particular the data from interviews with key players in the process. Yoshiko Herrera, University of Wisconsin-Madison. Post-Communist tax reform, like institutional reform in other areas of the post-Communist transition, holds tremendous material consequences for different groups in society. Consequently, one would expect the allocation of resources and the distribution of the financial burden of that allocation to be highly sensitive to domestic politics. Indeed, the political stakes should be especially high since post-Communist tax reform requires not merely a simple adjustment at the margin but the fundamental reallocation of the responsibility for government revenue. In Eastern Europe, however, important areas of tax policy do not reflect traditional domestic variables, e.g., interest groups and partisanship, so much as the international imperatives associated with regional and global economic integration. In *Tax Politics in Eastern Europe*, Hilary Appel analyzes the domestic and international factors that drive tax policy. She begins with a review of the greatest challenges in the initial creation of the capitalist tax systems in former Communist states and then turns to the evolution of specific forms of taxation in order to gauge the relative impact of domestic politics on tax policy. Appel concludes that although some tax areas such as personal income taxes remain politicized, most other taxes such as corporate income taxes and all forms of consumption taxes have been less subject to domestic political pressures because of powerful constraints resulting from regional and global economic integration.

World Development Report 1996, 1996. Almost one third of the world's population has embarked on a transition from planned to market economies. Like economic reforms elsewhere, the long-term goal of this transition is to build a thriving market economy capable of delivering long-term growth in living standards. Now in its 19th annual edition, the *World Development Report 1996* takes an in-depth look at these transition countries, focusing on the key lessons that have taken place thus far. The introduction to the Report poses a number of key questions that are addressed in later chapters, including questions relating to initial challenges and how countries have tackled them from very different starting points and political conditions. The Report also focuses on the additional challenges these transition countries face with a final chapter that summarizes the main conclusion of the Report, creating a text that

will no doubt become the definitive source for students studying international economics and politics
