*Enterprise Information Systems VII* Chin-Sheng Chen, Joaquim Filipe, Isabel Seruca, José Cordeiro, 2007-09-20. This book contains the best papers of the Seventh International Conference on Enterprise Information Systems ICEIS 2005 held in Miami USA and organized by INSTICC Institute for Systems and Technologies of Information Communication and Control in collaboration with FLORIDA INTERNATIONAL UNIVERSITY who hosted the event. Following the route started in 1999 ICEIS has become a major point of contact between research scientists, engineers and practitioners on the area of business applications of information systems. This conference which is now one of the largest annual conferences in the Information Systems area has received an increased interest every year especially from the international academic community. This year five simultaneous tracks were held covering different aspects related to enterprise computing including Databases and Information Systems, Integration, Artificial Intelligence and Decision Support Systems, Information Systems Analysis and Specification, Software Agents and Internet Computing and Human Computer Interaction. The sections of this book reflect the conference tracks. ICEIS 2005 received 459 paper submissions from 41 different countries in all continents. 89 papers were published and orally presented as full papers, i.e. completed work. 110 position papers reflecting work in progress were accepted for short presentation and another 90 for poster presentation. These numbers leading to a full paper acceptance ratio below 20% show the intention of preserving a high quality forum.

*Electronic Government* Roland Traunmüller, 2012-02-02. The EGOV Conference Series intends to assess the state of the art in e Government and to provide guidance for research and development in this fast moving field. The annual conferences bring together leading research experts and professionals from all over the globe. Thus EGOV 2003 in Prague built on the achievements of the 1st EGOV Conference Aix en Provence 2002 which provided an illustrative overview of e Government activities. This year the interest even increased nearly 100 contributions and authors coming from 34 countries. In this way EGOV Conference 2003 was a reunion for professionals from all over the globe. EGOV 2003 brought some changes in the outline and structure of the conference. In line with the broadening of the field and a growing number of submissions it became necessary to decentralize the reviewing process. So reviewing was done via stream chairs who deserve high praise for their dedicated work. In addition a workshop part was included to cover some subjects of emerging significance such as dissemination, networking and regional developments. Further a subtitle of the conference was chosen that would mirror the expansion of e Government to e Governance. Consequently in this year's conference governance democratic

deliberation and legal issues occupied a growing share Last but not least GIS was incorporated as a topic due to the increasing importance of geographical information systems for planning and operations Advances in Information Systems Development Alberto Rodrigues da Silva,Miguel Mira da Silva,Jacinto Estima,Chris Barry,Michael Lang,Henry Linger,Christoph Schneider,2024-07-17 This volume is a collection of papers on emerging concepts significant insights and novel approaches to Information Systems Development ISD It delves into the latest trends in ISD and examines how organizational goals structure and the business environment including regulations and societal trends can impact the creation and implementation of information systems The book draws on invited papers selected from the proceedings of the 31st International Conference on Information Systems Development hosted by Instituto Superior Técnico Lisbon Portugal on August 30 September 1 2023 ISD2023 The general theme of ISD2023 was Information Systems Development Organizational Aspects and Societal Trends This volume is specifically designed for researchers who are interested in exploring the methodological and operational perspectives of Information Systems Development as well as the impact of organizational aspects and societal trends The primary target audience for this volume is those who want to deepen their understanding of ISD from both theoretical and practical perspectives **Integrating ERP Systems and Knowledge Management** Lejla Turulja,Amer Celjo,Mirjana Pejić Bach,Nijaz Bajgoric,2024-12-05 This book combines the Technology Acceptance Model TAM and empirical analysis to investigate the adoption of integrated enterprise business information systems ISs TAM has been used extensively in the study of ERP acceptance as well as factors in the success or failure of ERP To date the adoption of information systems has been studied using various approaches including Theory of Reasoned Action TRA and Theory of Planned Behaviour TPB both of which have roots in cognitive psychology Nicolas et al 2008 Even though these models have been used in research the TAM has succeeded in capturing the attention of the information systems community The book also analyses Knowledge Management Systems KMSs illustrating their function as information technologies for storing improving and distributing intra and intercompany knowledge Knowledge management systems are presented as likely the most debated and polemicized topic in the field of knowledge management Even though these systems are not a crucial aspect of knowledge management it is evident that all major players in the ERP industry have cloud and installation based KMS solutions that they integrate with their ERP modules After discussing and analysing these topics the book illustrates how the respective systems can impact business processes and performance Given its scope it appeals not only to researchers but also to practitioners working in these areas of IT
