The New Social Entrepreneurship Francesco Perrini, 2006-01-01 This book aims to define a novel conception of what social entrepreneurship SE actually is and what it is not starting from a sharp and focused vision of SE it entails innovations designed to explicitly improve societal well being housed within entrepreneurial organizations which initiate change in society In so doing it provides a critical and comprehensive framework for current and future research in the area Francesco Perrini adopts a novel approach to the SE phenomenon considering it as a dynamic process created and managed by innovative social entrepreneur an individual or team who strives to create new social values in the market and community at large By now SE has attained a wider and more enthusiastic acceptance in corporate thinking and practice than in the literature This double line of reasoning partly theoretical and partly practitioner based drives the bottom line of the book In the first part The New Social Entrepreneurship looks for a consistent answer to a muddle of still unresolved questions How can SE be defined How can SEVs be identified What are the main dimensions along which organizations vary and what factors lead to success What does success mean Does the way in which an SEV is designed matter Does it make sense to talk about a social business plan Is an SEV aligned with traditional sources of financing And so on In the second part the book

changes perspective examining several practical examples of how perspectives on SE are translated into concrete phenomena LocalFeed CafeDirect The Sekem Initiative Teleserinita the NYC Watershed Agreement and sustainable tourism in Turkey and so on They illustrate theoretical frameworks each enlightening specific aspects of SE and making theory and practice comparisons *Exporting Press Freedom* Craig L. LaMay, 2011-08-31 International media assistance is a small but important form of international democracy promotion aid Media assistance boomed after the 1989 transitions in Central Europe but now flows to virtually all regions of the world Today the media assistance industry is focused on the problem of sustainability How are free and independent public affairs media supposed to maintain their editorial mission while facing hostile political systems or the demands of the consumer marketplace Many media in developing countries have been or are grant dependent When grants are exhausted or withdrawn media that were funded to further democratic consolidation typically wither and die Some become mere grant chasers Others abandon public service to the demands of market competition or political patronage As a result governmental and non governmental grant makers now emphasize the need for sustainability in considering grants in the media sector Many grant recipients have grown frustrated sometimes bitter and have sought to take a much more active role in the way assistance programs are put together Just how is sustainability to be achieved while also ensuring a public service editorial mission *Exporting Press Freedom* examines the history and practice of media assistance and argues that the dilemma of media independence and sustainability is best understood as an economic problem rather than one of poor editorial standards or lack of will It includes profiles of news and public affairs media in developing and democratizing countries and also of two non governmental organizations that have pioneered the use of low interest loans in media assistance These profiles exemplify strategic and entrepreneurial approaches to developing and supporting public service media Such approaches may be of use not only in the developing world but in the consolidated Western democracies as well where concern has grown about poor journalistic performance and its consequences for democratic governance **Social Entrepreneurship and Business Ethics** Anica Zeyen, Markus Beckmann, 2018-09-03

Social entrepreneurs are change makers that aim to solve society's unsolved problems Not surprisingly social entrepreneurship has thus created high expectations To better understand the potential as well as the limitations of social entrepreneurship however a more nuanced approach is needed in two ways First social entrepreneurship is a multi level phenomenon It spans macro level questions as well as meso level questions and finally micro level questions If we really want to understand social entrepreneurship we need to bring together all three levels of analysis and see how they are connected Second while social entrepreneurship can certainly produce socially desirable outcomes we also need a critical perspective to capture potential undesirable effects that social entrepreneurship can cause often unintendedly in society in markets in organizations and for individuals To this end an ethical perspective can help complement the positive analysis of social entrepreneurship with a discussion of the normative implications of its potential dark side Looking at social entrepreneurship

from both a multi level analysis and an ethical perspective Social Entrepreneurship and Business Ethics takes the reader on a journey through the bright side as well as the potential dark side of social entrepreneurship for societies organizations and individuals Highlighting both this book not only seeks to provoke researchers and students to advance their understanding of social entrepreneurship It also hopes to help practitioners to better realize the positive contributions of social entrepreneurship for society
