Generation Digital Kathryn C. Montgomery, 2009-02-13 The role that children and youth play in the emerging digital media culture as consumers targeted by marketing campaigns as creators of their own digital culture and as political participants Children and teens today have integrated digital culture seamlessly into their lives For most using the Internet playing videogames downloading music onto an iPod or multitasking with a cell phone is no more complicated than setting the toaster oven to bake or turning on the TV In Generation Digital media expert and activist Kathryn C Montgomery examines the ways in which the new media landscape is changing the nature of childhood and adolescence and analyzes recent political debates that have shaped both policy and practice in digital culture The media has pictured the so called digital generation in contradictory ways as bold trailblazers and innocent victims as active creators of digital culture and passive targets of digital marketing This says Montgomery reflects our ambivalent attitude toward both youth and technology She charts a confluence of historical trends that made children and teens a particularly valuable target market during the early commercialization of the Internet and describes the consumer group advocacy campaign that led to a law to protect children s privacy on the Internet Montgomery recounts as a participant and as a media scholar the highly publicized battles over indecency and pornography on the Internet She shows how digital marketing taps into teenagers developmental needs and how three public service campaigns about sexuality smoking and political involvement borrowed their techniques from commercial digital marketers Not all of today s techno savvy youth are politically disaffected Generation Digital chronicles

the ways that many have used the Internet as a political tool mobilizing young voters in 2004 and waging battles with the music and media industries over control of cultural expression online Montgomery's unique perspective as both advocate and analyst will help parents, politicians and corporations take the necessary steps to create an open, diverse, equitable and safe digital media culture for young people

Brazilian Telenovelas and the Myth of Racial Democracy Samantha Nogueira Joyce, 2012-04-01 *Brazilian Telenovelas and the Myth of Racial Democracy* by Samantha Nogueira Joyce examines what happens when a telenovela directly addresses matters of race and racism in contemporary Brazil. This investigation provides a traditional textual analysis of *Duas Caras* 2007-2008, a watershed telenovela for two main reasons. It was the first of its kind to present audiences with an Afro-Brazilian as the main hero, openly addressing race matters through plot and dialogue. Additionally, for the first time in the history of Brazilian television, the author of *Duas Caras* kept a web blog where he discussed the public's reactions to the storylines, media discussions pertaining to the characters and plot, and directly engaged with fans and critics of the program. Joyce combines her investigation of *Duas Caras* with a study of related media in order to demonstrate how the program introduced novel ideas about race and also offered a forum where varying perspectives on race, class and racial relations in Brazil could be discussed. *Brazilian Telenovelas* is not a reception study in the traditional sense; it is not a story of entertainment education in the strict sense, and it is not solely a textual analysis. Instead, Joyce's text is a study of the social milieu that the telenovela and especially *Duas Caras* navigates, one that is a component of a contemporary progressive social movement in Brazil and one that views the text as being located in social interactions. As such, this book reveals how telenovelas contribute to social change in a way that has not been fully explored in previous scholarship.

New Deal Radio David Goodman, Joy Elizabeth Hayes, 2022-05-13 New Deal Radio examines the federal government's involvement in broadcasting during the New Deal period looking at the U S Office of Education's Educational Radio Project The fact that the United States never developed a national public broadcaster has remained a central problem of US broadcasting history Rather than ponder what might have been authors Joy Hayes and David Goodman look at what did happen There was in fact a great deal of government involvement in broadcasting in the US before 1945 at local state and federal levels Among the federal agencies on the air were the Department of Agriculture the

National Park Service the Works Progress Administration WPA and the Federal Theatre Project Contextualizing the different series aired by the Educational Radio Project as part of a unified project about radio and citizenship is crucial to understanding them New Deal Radio argues that this distinctive government commercial partnership amounted to a critical intervention in US broadcasting and an important chapter in the evolution of public radio in America *Storied Health and Illness* Jill Yamasaki, Patricia Geist-Martin, Barbara F. Sharf, 2016-07-01 Health and illness are storied experiences that necessarily entail personal cultural and political complexities For all of us communicating about health and illness requires a continuous negotiation of these complexities and a delicate balance between what we learn about the biology of disease from providers and our own very personal subjective experiences of being ill *Storied Health and Illness* brings together dozens of noteworthy scholars both established and emerging in a provocative collection that embraces narrative ways of knowing to think about analyze and reconsider our own and others health beliefs behaviors and communication Comprehensive content reflects the editors substantial research in integrative health narrative care and innovative ways of improving well being and quality of life in personal relationships healthcare the workplace and community settings Unique narrative approaches to the study of health communication include 14 chapters written by 22 contributors who use engaging stories from their own research or personal experience to introduce and ground foundational communication concepts in healthcare health promotion community support organizational wellness and other health related sites of interest Compelling stories of individuals living with the inherent challenges and unexpected opportunities of mental illness addiction aging cancer dialysis sexual harassment miscarriage obesity alopecia breastfeeding health threats to immigrant workers developmental differences and youth gun violence 36 Health Communication in Action HCIA sidebars that highlight applied research of innovative health communication scholars in their own words and then prompt readers to think more deeply about their own perspectives and experiences Theorizing Practice boxes that encourage readers to reflect on stories that describe significant experiences in their own and others lives as they consider assumptions and enlarge their viewpoints in previously unimagined ways **Eliminating Gender-Based Violence** Ann Taket, Beth R. Crisp, 2017-09-11 While promoting access to resources and systems of support for those affected by gender based violence is absolutely crucial this new book focuses attention on the important question of how communities can take action to prevent violence and abuse Using examples of current research and practice the book explores the actions that can be taken in individual sectors of society our schools faith communities campuses on our streets and using new popular technologies The contributors draw on global examples to highlight the importance of learning from the study of the interaction between socio political contexts and effective policies and strategies to address gender based violence Chapters take up the challenge of exploring the construction of effective programmes that address cognitive affective and behavioural domains They discuss what people know how they feel and how they behave and include the important challenge of how to engage men in working towards the elimination of gender based

violence offering positive messages which build on men's values and predisposition to act in a positive manner. Importantly such strategies place the responsibility for preventing gender based violence on the society as a whole rather than on vulnerable individuals. This book is essential reading for anyone interested in gender studies, women's studies, social work, sociology, law and health studies. Its unique approach focuses on the achievement of prevention at the earliest possible stage and examines the issue through a society wide but community focused lens.

Theatre for Women's Participation in Sustainable Development Beth Osnes, 2013-11-26 Though development researchers have proven that the participation of women is necessary for effective sustainable development, development practitioners still largely lack culturally appropriate gender sensitive tools for including women, especially women living in poverty. Current tools used in the development approach often favour the skill set of the development practitioner and are a mismatch with the traditional gendered knowledge and skills many women who are living in poverty do have. This study explores three case studies from India, Ethiopia and the Guatemala that have successfully used applied theatre for women's participation in sustainable development. This interdisciplinary book has the opportunity to be the first to bring together the theory, scholarship and practice of theatre for women's participation in sustainable development in an international context. This work will be of great interest to scholars and practitioners in a wide variety of fields who are looking for creative solutions for utilizing the contributions of women for solving our global goals to live in a sustainable way on this one planet in a just and equitable manner.

Broadcasting Birth Control Manon Parry, 2013-08-23 Traditionally the history of the birth control movement has been told through the accounts of the leaders, organizations and legislation that shaped the campaign. Recently historians have begun examining the cultural work of printed media including newspapers, magazines and even novels in fostering support for the cause. *Broadcasting Birth Control* builds on this new scholarship to explore the films and radio and television broadcasts developed by twentieth century birth control advocates to promote family planning at home in the United States and in the expanding international arena of population control. Mass media, Manon Parry contends, was critical to the birth control movement's attempts to build support and later to publicize the idea of fertility control and the availability of contraceptive services in the United States and around the world. Though these public efforts in advertising and education were undertaken initially by leading advocates including Margaret Sanger, increasingly a growing class of public communications experts took on the role, mimicking the efforts of commercial advertisers to promote health and contraception in short plays, cartoons, films and soap operas. In this way they made a private subject, fertility control, appropriate for public discussion. Parry examines these trends to shed light on the contested nature of the motivations of birth control advocates. Acknowledging that supporters of contraception were not always motivated by the best interests of individual women, Parry concludes that family planning advocates were nonetheless convinced of women's desire for contraception and highly aware of the ethical issues involved in the use of the media to inform and persuade.

Encyclopedia of Children, Adolescents, and

the Media Jeffrey Jensen Arnett, 2007 Publisher Description **The Art of Status** Jelena Subotic, Professor of Political Science Jelena Subotic, 2025-10-09 An illuminating exploration of the relationship between the restitution of looted art global status and the international construction of national cultural heritage Why is art restitution a matter of politics How does the artwork displayed in national museums reflect the international status of the state that owns it Why do some states agree to return looted art and others resist National art collections have long been a way for states to compete with each other for status prestige and cultural worth in international society In many former imperial nations however these collections include art looted during imperial expansions and colonial occupations While this was once a sign of high international standing the markers of such status particularly in the context of art have since significantly changed A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s Since then there have been national and global social movements demanding the return of looted art This shift has established not only that looting is wrong but more importantly that restitution is morally right As a result of this reframing of what it means to own art an artifact's historical provenance has become a core element of its value and the search for provenance and demands for restitution a direct threat to state status The same objects that granted states high international status now threaten to provoke status decline In *The Art of Status* Jelena Subotic examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles the Benin Bronzes and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum Subotic tells the story of these artworks how they were looted how they ended up on display in national museums and how the art restitution disputes have unfolded While these cases are different in terms of their historical context of looting and ownership claims the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states desire for international status and prestige An in depth and nuanced account of art restitution disputes *The Art of Status* illuminates the shifting political significance of art on the international stage from ownership to restitution **The Oxford Handbook of Media Psychology** Karen Dill-Shackleford, Nicholas D.
