Entrepreneurial Shift:

The Entrepreneurial Shift Robert R. Locke, Katja E. Schöne, 2004-09-09 This is a provocative and intelligent study of how high technology entrepreneurial developments have affected management education in the wider business context Responding to the growth of new technology businesses American business schools fostered entrepreneurship studies Not wishing to be left behind entrepreneurially in the Information Age France and Germany followed with their own innovative education programmes And The Czech Republic like other emerging economies has been caught up belatedly in this education ferment Original and containing new research data the book will appeal to academics students and practitioners

Entrepreneurial Alignment: Marion Ross, 2013-01-08 This book is a psychological primer for entrepreneurs who have either studied entrepreneurship spent thousands of dollars on courses from business gurus or read many business books and yet still struggle to achieve success or feel stuck Doctors Ross and Latz give you insightful information to help you understand why you have failed and how you may have inadvertently created your own worst business nightmare The authors openly discuss the art of psychological self sabotage and then give readers specific tools techniques and mindful exercises to assist with removing the roadblocks on your path to success Strategic Shifts between Business Types Katrin Susanne Mühlfeld, 2012-12-06 The range of products and services that are traded on business to business markets is very broad It encompasses such heterogeneous goods as standardized software machine tools and power stations Against this background of heterogeneity the development of undifferentiated one for all marketing programmes is neither promising from the practitioner's perspective nor consistent with an application oriented approach in marketing science Yet at the same time the pitfalls of overemphasizing the particularities of individual transactions which lead to a lack of generalizability are to be avoided As a response to this dilemma various conceptions for systematizing transactions on business to business markets have been developed in the past years Co on to all of these concepts which are rather varied in terms of their methodology are the objectives of identifying meaningful types of transaction processes usually referred to as transaction or business types and of deriving corresponding recommendations to guide marketing practice Co on to all of them is however also a deficit The approaches presented to date take into account only the heterogeneity that prevails at a certain point in time They do not capture the potential change of market offerings over time that is the heterogeneity that arises from shifts between the different types in the course of time The existent approaches are hence static in the sense that they treat the criteria that are used for categorization as given They do not interpret them as variables that are susceptible to the transaction parties design

Entrepreneurial Governance in the Neoliberal Era Oliver Cowart, 2021-09-30 Against the background of a growing tendency among state and local governments in the United States to vie against one another spending public funds and foregoing corporate tax revenues in order to attract private investment this book offers an analysis of local economic development and business recruitment in the automotive industry Asking why localities felt they could and more importantly

should make deals with private capital in the first place this book examines the shift toward entrepreneurial local governance from a global and historically informed perspective Through a study of the 19 greenfield automotive assembly plants constructed in the United States during the neoliberal era the author draws on interviews with corporate and government elites to chart the connections between increasingly global competitive industry pressures and changing attitudes toward incentivizing private investment Studying the development of an approach that has partially reoriented local governments away from managing localities and towards helping manage transnational capital flows by absorbing some of the increasing risk of long term capital investment Entrepreneurial Governance in the Neoliberal Era will appeal to scholars of sociology politics and urban studies with interests in globalization the sociology of work and industry the sociology of development and neoliberal governance
