Entrepreneurial Wage Dynamics In The Knowledge Economy:

Entrepreneurial Wage Dynamics in the Knowledge Economy Adam K. Korobow, 2012-12-06 The role that small firms and entrepreneurship play in economic development has been particularly contentious Joseph Schumpeter 1911 in his early work argued that through a process of creative destruction small and new firms would serve as agents of change and a catalyst for innovation and growth But he later rescinded this view instead concluding that large corporations were the engines of growth Just as it seemed that a consensus had emerged among scholars and policy makers that small business was at best superfluous and at worst a drag on growth and economic development David Birch provided evidence that in fact small firms were the engines of job creation The early skepticism of challenge to Birch s findings revolved around methodology and measurement However a wave of subsequent studies by different authors spanning different time periods sectors and even countries generally confirmed Birch s original findings for most developed countries and in most time periods small business has provided most of the job creation

Shaping Science and Technology Policy David H. Guston, Daniel Sarewitz, 2007-02-01 With scientific progress occurring at a breathtaking pace science and technology policy has never been more important than it is today Yet there is a very real lack of public discourse about policy making and government involvement in science remains shrouded in both mystery and misunderstanding Who is making choices about technology policy and who stands to win or lose from these

choices What criteria are being used to make decisions and why Does government involvement help or hinder scientific research Shaping Science and Technology Policy brings together an exciting and diverse group of emerging scholars both practitioners and academic experts to investigate current issues in science and technology policy Essays explore such topics as globalization the shifting boundary between public and private informed consent in human participation in scientific research intellectual property and university science and the distribution of the costs and benefits of research Contributors Charlotte Augst Grant Black Mark Brown Kevin Elliott Patrick Feng Pamela M Franklin Carolyn Gideon Ten N Hamilton Brian A Jackson Shobita Parthasarathy Jason W Patton A Abigail Payne Bhaven Sampat Christian Sandvig Sheryl Winston Smith Michael Whong Barr

Entrepreneurship and Dynamics in the Knowledge Economy Charlie Karlsson, Börje Johansson, Roger Stough, 2006-09-27 In this book the authors argue that there are analytically distinct forms of entrepreneurship They provide a contemporary overview of current research and summarize the policy conclusions that can be drawn

The Geography of Small Firm Innovation Grant Black, 2006-03-30 It has long been recognized that advances in science contribute to economic growth While it is one thing to argue that such a relationship exists it is quite another to establish the extent to which knowledge spills over within and between sectors of the economy Such a research agenda faces numerous challenges Not only must one seek measures of inputs but a measure of output is needed as well to estimate the knowledge production function The identification of such a measure was a compelling goal for Zvi Griliches if not the holy grail The dream of getting hold of an output indicator of inventive activity is one of the strong motivating forces for economic research in this area Griliches 1990 p 1669 Jaffe 1989 made a significant contribution to estimating the knowledge production function when he established a relationship between patent activity and R D activity at the state level Feldman and coauthors 1994a 1994b added considerably to this line of research focusing on innovation counts as the dependent variable instead of patent counts This work was particularly important given that many innovations are never patented Feldman s work also differentiated by firm size and showed that knowledge spillovers from universities play a key role as sources of knowledge for small firms

Knowledge Intensive Entrepreneurship Frederic Delmar, Karl Wennberg, 2010-01-01 How and

why are firms created expanded and terminated by entrepreneurs in the knowledge intensive economy The authors show these entrepreneurship processes are firmly embedded in a given social and economic context that shapes the process by which some individuals discover entrepreneurial opportunities creating new firms that sometimes grow to remarkable size but more often stay mundane or eventually exit The authors expertly provide a theoretical and empirical examination of new knowledge intensive firms over their whole life cycle using a unique set of matched employee employer data containing over three million individuals and over 200 000 firms With theoretical pillars anchored in industrial organization economics evolutionary organization theory and entrepreneurship research this book presents a detailed investigation of the entrepreneurial processes of firm entry growth and their eventual demise This insightful book will prove to be invaluable for business policymakers as well as postgraduate students and researchers in management economics and entrepreneurship

Charlie Karlsson, Börje Johansson, Roger Stough, 2013-06-26 In recent years policy makers have given much credence to the role of entrepreneurship in the transformation of regions As a result a new set of policy responses have emerged that focus on the support of new venture creation small business growth and idea generation and commercialization While there is a wealth of research about entrepreneurship in general less attention has been given to the development of new tools and programs in support of entrepreneurial activities and to the ways in which the emergence the character and the types of entrepreneurship policies might differ between countries In particular the transatlantic perspective is of special interest because of the pioneering role of the United States in this area and also due to the European Union's focus on economic competitiveness The contributions included in this book explore the emergence of entrepreneurship policies from a transatlantic comparative perspective and address different aspects of entrepreneurship policies including local entrepreneurship policies and the relationship between knowledge based industries and entrepreneurship policies
