Entrepreneurial Approach To Corporate Management:

International Entrepreneurship Education Alain Fayolle, Heinz Klandt, 2006-01-01 The importance of this volume is that it addresses the major pedagogical issues that inevitably arise in the context of entrepreneurship education. It represents a valuable source for those involved in the training and development of entrepreneurial skills and initiative. Economic Outlook and Business Review Can entrepreneurship be taught? Is it an art or a science? How is entrepreneurship learned? Another masterpiece by the European masters Fayolle and Klandt, this volume based on the 2003 Grenoble Conference will be useful for years to come among educators and policymakers alike, especially those open to the emerging paradigm. L o Paul Dana, University of Canterbury, New Zealand. This book discusses paradigmatic changes in the field of entrepreneurship education in response to economic, political, and social needs and the consequential need to reassess, redevelop, and renew curricula and methods used in teaching entrepreneurship. Traditional and new questions and concerns are addressed, including the development of business schools towards entrepreneurship education, best practice methods of learning and teaching entrepreneurship both inside and outside the classroom, the design of effective teaching frameworks and tools, the development of entrepreneurial behaviours and attitudes in students, teaching the design and launch of new businesses. The issue of assessing the effectiveness of entrepreneurship education is also raised. A theoretical and methodological framework is used to measure the impact and effectiveness of entrepreneurship education programmes on the attitudes and behaviours of students. Now more than ever, the book argues, research in the field of entrepreneurship education has to be encouraged and facilitated and should drive the activity of entrepreneurship education providers. As such, this fascinating book aims to provide researchers, practitioners, teachers, and advanced students engaged in the field of entrepreneurship with relevant and up-to-date insights into international research programmes in entrepreneurship education. Business Management Hannie Badenhorst-Weiss, Tersia Brevis, Mike Cant, 2008-02 The world is in a constant state of flux, and this influences the operations of every business and organisation. Business Management: A Contemporary Approach deals with these changes by covering the functions of a business or an organisation and then addressing the contemporary issues that affect them. These issues include globalisation, corporate entrepreneurship, and citizenship, credit, diversity, and HIV/AIDS. Every student of business and business manager needs to understand the importance of these issues and their influence on the operations of a business. Business Management: A Contemporary Approach also highlights the interdependency between the various business functions. This interdependency is very important for a business or organisation to operate as a whole. **Conceptual and Theoretical Approaches to Corporate Social Responsibility, Entrepreneurial Orientation, and Financial Performance** Paiva, Inna Sousa, Carvalho, Luísa Cagica, 2020-02-28 Over the last few years, we have witnessed the enormous success of corporate social responsibility and business all over the world.
