Entrepreneurship In The Region:

Entrepreneurship in the Region Michael Fritsch, Jürgen Schmude, 2007-10-23 Entrepreneurship in the Region approaches many different aspects of entrepreneurship from a regional perspective The regional influences on entrepreneurship analyzed entail regional peculiarities and disparities in new business formation processes the success and the employment effects of new firms the importance of social capital and of network structures as well as entrepreneurship education and training provided in the regions The articles in this book provide strong evidence for the importance of regional factors that shape entrepreneurship and new firm formation processes It is shown that regional differences of start up rates and entrepreneurial attitudes are not at all elusive but tend to be rather persistent and prevail over longer periods of time The evidence clearly suggests that the regional level can be an appropriate starting point for entrepreneurship policy and that research on the issue may considerably benefit from properly accounting for the spatial dimension

Entrepreneurship in a Regional Context Michael Fritsch, David Storey, 2017-08-17 Enterprise and entrepreneurship is of strong interest to policy makers because new and small firms can be a key contributor to job and wealth creation However this contribution varies spatially with some areas in a country having new firm formation rates that are up to three or four times higher than others The vast majority of these new firms begin in the geographical area in which the founder lives works or was born emphasising that entrepreneurship is a local event The book documents a diversity of research approaches to examining the regional determinants of entrepreneurship in countries as contrasting as India and Sweden The Editors call is for scholars to better understand the long run factors that influence enterprise at the local and regional level For policy makers the Editors challenge is for them to be much clearer about the targets for their policies Is it new firms new jobs productivity and does it matter where these targets are delivered This book was published as a special issue of Regional Studies

Enacting Regional Dynamics and Entrepreneurship Bengt Johannisson, Åsa Lindholm Dahlstrand, 2013-09-13 In present digital times the focus is on globalization and the dynamics and complexities that it creates However in spite of being dominated by technology the world remains populated by human beings practising a localized everyday life This contrast should challenge every researcher who is concerned with business and societal development and how that is contingent upon the institutional and cultural national context In this book Swedish researchers reflect upon entrepreneurship as a possible mediator between local and global economic and social concerns Using as a point of departure the tensions between a functional footloose rationale and a territorial rationale tied to place the authors provide different aspects on regional development in a globalised world A shared concern is the importance of recognizing the many appearances of entrepreneurship that brings it beyond being an innovative force in the market The book thus presents different strategies and tactics for pursuing localized economic development and it also critically reviews adopted public support programmes and measures of the local business climate The conclusive message is that only by bridging the functional and territorial views will it be possible to sustain and

possibly enhance economic and social life in local places as well as in our shared world This book was originally published as a special issue of European Planning Studies *Entrepreneurship in Emerging Regions Around the World* Phillip Hin Choi Phan, Sankaran Venkataraman, S. Ramakrishna Velamuri, 2008-01-01 The contributors to this book look at the phenomenon of entrepreneurship in emerging regions in India China Ireland Eastern Europe North and South America and North and South East Asia The organization is designed to take the reader from a general framework for understanding the relationship between economic development and entrepreneurship to more specific examples of how entrepreneurs and their firms respond to the opportunity and threats that are dynamically evolving in such places The book represents the first serious attempt to suggest new theoretical frameworks for understanding the emergence of entrepreneurship in regions that do not have all of the classical prerequisites such as financial and human capital favorable geography institutional infrastructures and so on predicted in extant development models **Entrepreneurship, Regional Development and Culture** Marta Peris-Ortiz, José M. Merigó-Lindahl, 2015-02-16 The aim of this book is to analyze the relationships among entrepreneurship regional development and culture in the current economy Using an institutional approach it examines the main theoretical issues and practices and their effect on different dimensions of society and the economy Business creation is considered a key element of economic growth innovation and employment In recent years entrepreneurial scholars have studied the factors that affect entrepreneurship and drive economic growth In doing so these scholars have aimed to understand what promotes entrepreneurial activity and also how to improve the development of regions or countries to increase wealth in society The institutional approach can be applied to the entrepreneurship field to understand the phenomenon of entrepreneurship This view considers the role of environment in the decision to create a company which is critical to entrepreneurship innovation and economic growth Environment relates to legal aspects public policy and support services formal institutions but is especially important in terms of sociocultural context informal institutions The creation of new ventures is greatly influenced by culture Furthermore it is important to highlight the influence of entrepreneurship on regional development specifically through job creation stimulation of economic growth and innovation Thus entrepreneurship regional development and culture are fundamental for understanding economic growth and development as well as other phenomena such as technology transfer or women s entrepreneurship Featuring contributions and cases studies from various countries and sectors this volume provides an essential reference for scholars academics and researchers in entrepreneurship business management innovation and economics **Handbook of Research on Entrepreneurship and Regional Development** Michael Fritsch, 2013-01-01 the book is an important reading in the field of entrepreneurship One of its main contributions is that it clearly shows that the process of new firm formation is a regional event The chapters are rich in theoretical insights and data and are valuable readings for students academics and policy makers interested in entrepreneurship and regional growth Christine Tam sy Regional Studies Entrepreneurship can have powerful effects on

local as well as national economies The chapters in this edited volume authored by well known experts in their fields explore various aspects of entrepreneurship and regional development The book provides an illuminating overview of the current state of knowledge while also sharing with the reader several new findings and insights on issues as diverse as globalization regional employment growth nascent entrepreneurs gazelles labor productivity government regulations and university entrepreneurship It is recommended reading for anyone interested in these topics Simon C Parker The University of Western Ontario Canada There is substantial evidence regarding the considerable regional variation in business creation Michael Fritsch has done a fine job of assembling the most recent analyses of the best scholars on the regional factors affecting firm creation and the consequences It is essential reading for any scholar or policy analyst seeking a state of the art overview of the current empirical status of research on this important topic Paul D Reynolds George Washington University US This Handbook examines the contribution of the entrepreneur and related processes to regional economic development The recognition that the indirect entrepreneurial effects on development are more significant than the direct is an important and under girding conclusion And further that entrepreneurial driven effects are often not felt immediately but in some cases only across decades as illustrated by the over two decade incubation of the entrepreneurial culture in Silicon Valley which only later resulted in it becoming the dominant icon of scientific and technology regional development that it is today Roger Stough George Mason University US This volume fills an important gap in the research literature on entrepreneurship Entrepreneurship is a localized phenomenon and all too many studies disregard this fact Thus the regional economic milieu is a critical factor determining not only the volume and type of entrepreneurship but also the effects of entrepreneurship in terms of value added growth employment growth etc The contributions in this book by a number of leading scientists in the field provide an excellent overview and understanding of the prerequisites for and the role of entrepreneurship in regional growth and development Charlie Karlsson J nk ping University Sweden Recent research has found pronounced differences in the level of entrepreneurship and new business formation across various regions and nations This timely Handbook reveals that the development of new ventures as well as their effects on overall economic growth are strongly shaped by their regional and national environment The expert group of contributors gives an overview on the current state of the art in this field and proposes avenues for further investigation Topics include the regional determinants of new business formation the effects of start ups on growth the role of globalization for regional entrepreneurship the effect of national and regional framework conditions as well as the role of universities as incubators of innovative new firms *Entrepreneurship and Innovation in Second Tier Regions* Heike Mayer,2011-01-01 Second tier high tech regions are taking a different path than their well known counterparts such as Silicon Valley or Route 128 around Boston They may lack many prerequisites of growth such as a world class research university or high levels of venture capital funding Often however they can successfully leverage anchor firms and entrepreneurial spinoffs This book explores the evolution of these regions in the

United States The author critically examines how they evolved as knowledge based economies how they leveraged entrepreneurship and innovation and ultimately how they employed public policy to support economic growth Filling a gap in the literature the book speaks to researchers and policymakers across the fields of entrepreneurship economic geography and economic development planning Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2010-01-01 This Handbook is essential reading for anyone with an interest in the explanation of economic growth in the space economy The editors and the individual contributors are to be congratulated on producing such an important collection of review essays which is destined to become one of the definitive reference books on the subject John McCombie Scienze Regionali offers a valuable up to date overview of many aspects of these important theoretical developments Peter Wood Environment development theories of innovation knowledge and space and regional production factors and growth theories and space This book will be a source of reference and information for both scholars and students in the area of regional economics Entrepreneurship, Human Capital, and Regional Development Rui Baptista, João Leitão, 2015-01-14 This book makes original contributions to the literature on clusters human capital and regional development by focusing on the link between entrepreneurship and economic growth aiming for a better understanding of the dynamics of growth determined by the entrepreneur's action in the regional space The focus is therefore on critical reflection and rethinking the articulation between three levels of analysis of economic systems namely entrepreneurship human capital and regional development which have not so far been perfectly articulated in the literature of reference on endogenous growth Although there has been significant research so far into the success and failure of clusters the implications of these multiple research efforts fail to provide political decision makers and company managers with critical information about which mechanisms lie behind cluster success and also about how clusters survive and prosper The innovative approaches presented in this book on entrepreneurship human capital mobility and regional development have considerable potential to create new and original implications for decision makers and managers In terms of value added this book contributes to the literature by seeking answers to the following questions i Is the growth and success of clusters over time due to concentration and transmission of business competences through spin offs located in a given regional space ii Does increased density of job options outside the workplace contribute to increased mobility of human capital between firms located within clusters and so improve coordination in the local labor market iii Do spin offs benefit from hiring workers from successful incumbents inasmuch as those workers are expected to perform better than other workers from different origins Integrating theoretical frameworks empirical research and regional case studies from Portugal Spain Norway and Turkey the editors and contributors demonstrate that the regional dynamics of industry growth are strongly influenced by the mobility of employees towards new firms Entrepreneurial Ecosystems in Cities and Regions Robert Huggins, Fumi Kitagawa, Daniel Prokop, Christina Theodoraki, Piers Thompson, 2024 Entrepreneurial Ecosystems in Cities and Regions assembles original contributions from
