Entrepreneurship, Productivity, and the Freedom of Information Act William L. Casey, John E.

Marthinsen, Laurence S. Moss, 1983 **The Entrepreneurship Dynamic** Claudia Bird Schoonhoven, Elaine Romanelli, 2001
New organizations do not emerge full blown from the idiosyncratic minds of individual entrepreneurs Their ideas for new organizations their ability to acquire capital and other essential resources and their likelihood of survival as entrepreneurs derive from the contexts in which they live and work The Entrepreneurship Dynamic explores the conditions that prompt the founding of large numbers of new organizations or entirely new industries and the effects on existing industries economies and societies **The Cambridge Handbook of Investment-Driven Intellectual Property** Enrico Bonadio, Patrick Goold, 2023-03-23 This handbook challenges the conventional wisdom that intellectual property is the law of creativity Traditionally IP has been instrumental for protecting creations of the mind with only inventors of original works enjoying exclusive rights Related sui generis and quasi IP rights which protect monetary investments and efforts rather than originality and inventiveness were considered exceptions to the general principles of IP But increasingly IP rights are being granted to safeguard corporate investments This handbook brings together an international roster of contributors to explore this emerging trend Why are investments the primary driver of legal protection and often the main requirement to obtain it Who benefits from such new forms of protection What should the scope of these new rights be And are they desirable in the first place In doing so the volume is the first to highlight and systematically critique the move from intellectual to investment property *Productivity: a Selected Annotated Bibliography*, 1990 *Bulletin of the Bureau of Labor Statistics*, 1990

Access to Non-Summary Clinical Trial Data for Research Purposes Under EU Law Daria Kim, 2021-10-19 This book draws a unique perspective on the regulation of access to clinical trial data as a case on research and knowledge externalities Notwithstanding numerous potential benefits for medical research and public health many jurisdictions have struggled to ensure access to clinical trial data even at the level of the trial results Pro access policy initiatives have been strongly opposed by research based drug companies arguing that mandatory data disclosure impedes their innovation incentives Conventionally access to test data has been approached from the perspective of transparency and research ethics The book offers a complementary view and considers access to individual patient level trial data for exploratory analysis as a matter of research and innovation policy Such approach appears to be especially relevant in the data driven economy where digital data constitutes a valuable economic resource The study seeks to define how the rules of access to clinical trial data should be designed to reconcile the policy objectives of leveraging the research potential of data through secondary analysis on the one hand and protecting economic incentives of research based drug companies on the other hand Overall it is argued that the mainstream innovation based justification for exclusive control over the outcomes of research and development can

hardly rationalise trial sponsors control over primary data from trials Instead access to such data and its robust analysis should be prioritised **Productivity** ,1990 **Area Wage Survey** ,1990 *The Freedom of Information Reform Act* United States.
