Business Modeling for Life Science and Biotech Companies Alberto Onetti, Antonella Zucchella, 2014-03-21 Most books on the biotechnology industry focus on scientific and technological challenges ignoring the entrepreneurial and managerial complexities faced by bio entrepreneurs The Business Models for Life Science Firms aims to fill this gap by offering managers in this rapid growth industry the tools needed to design and implement an effective business model customized for the unique needs of research intensive organizations Onetti and Zucchella begin by unpacking the often used business model term examining key elements of business model conceptualization and offering a three tier approach with a clear separation between the business model and strategy focus exploring the different activities carried out by the organization locus evaluating where organizational activities are centered and modus testing the execution of the

organization's activities. The business model thus defines the unique way in which a company delivers on its promise to its customers. The theory and applications adopt a global approach offering business cases from a variety of biotech companies around the world.

Entrepreneurship in Africa Moses E. Ochonu, 2018-02-05 A tapestry of innovation ideas and commerce. Africa and its entrepreneurial hubs are deeply connected to those of the past. Moses E. Ochonu and an international group of contributors explore the lived experiences of African innovators who have created value for themselves and their communities. Profiles of vendors, farmers, craftspeople, healers, spiritual consultants, warriors, musicians, technological innovators, political mobilizers, and laborers featured in this volume show African models of entrepreneurship in action. As a whole, the essays consider the history of entrepreneurship in Africa, illustrating its multiple origins and showing how it differs from the Western capitalist experience. As they establish historical patterns of business creativity, these explorations open new avenues for understanding indigenous enterprise and homegrown commerce and their relationship to social, economic, and political debates in Africa today.

Against Entrepreneurship Anders Örtengren, 2020-10-28 This book explores whether there is reason to be against entrepreneurship. Just like literature on the darker sides of entrepreneurs and entrepreneurship, the book is an answer to the one-sided, overly positive and uncritical image of entrepreneurship. The twist in this book, in comparison with literature on the dark sides of entrepreneurship, is to explore being against entrepreneurship. From various perspectives such as lexical semantics, Marxism, philosophy of science, and psychology, the contributors contemplate on why there may be reason to be against entrepreneurship discourse as well as entrepreneurship practice. Some chapters are based on first-hand empirical data; others are conceptual. The main overall conclusion is that there are some strong arguments for being against entrepreneurship discourse as well as for being against certain aspects of entrepreneurship practice. Before it is reasonable to be against entrepreneurship practice in total, a convincing and practicable alternative needs to be developed. This book will be valuable reading for entrepreneurship scholars as well as academics working in the fields of business ethics, critical management, and international business.
