Link, 2009-05-18 This book establishes a chronological trace of the entrepreneur as treated in economic literature in order to give a more wholesome perspective to contemporary writings and teachings on entrepreneurship It focuses on the nature and role of the entrepreneur and of entrepreneurship as revealed in economic literature as early as the eighteenth century when Richard Cantillon first coined the term entrepreneur The authors then trace how Joseph Schumpeter s perspective among other s on entrepreneurship came to dominate the world s understanding of the term Due to Schumpeter s dominant influence entrepreneurship has come to occupy a primary role in the theory of economic development In this book Hébert and Link discuss various key topics including the German Tradition the Austrian and the English School of thought as well as individuals such as Alfred Marshall and Jeremy Bentham The historical survey also illustrates the tension that often exists between theory and practice and how it has been difficult for economic theory to assimilate a core concept that plays a vital role in social and economic change Finally the book exposes the many different facets of entrepreneurship as they have been perceived by some of the great economists throughout the ages

as Institutional Entrepreneurs Olivia Mettang, 2022-11-14 Introducing the institutional logics perspective to street level analysis this book examines how street level workers deal with the institutional logics that guide their organization whether they follow or challenge them While doing so the book develops a theoretical framework to study street level workers

institutional agency within organizations from different institutional backgrounds The book conceptualizes street level workers as institutional entrepreneurs and presents an original process model to capture deinstitutionalization efforts in street level discourse This ordinal model accounts for embedded agency and institutional entrepreneurship as well as for more gradual moves towards deinstitutionalization through the hybridization of institutional logics The author tests the model empirically using interview data and discusses how street level workers diverge from the institutional logic of their organization in almost two thirds of their statements indicating a tendency towards institutional entrepreneurship The book finally combines two literature strands institutionalism and implementation research showing how street level workers may be perceived as institutional entrepreneurs This book will appeal to students scholars and researchers of political science public policy public administration and organizational studies as well as to practitioners and policy makers interested in a better understanding of institutional entrepreneurs street work and the institutional logics perspective Handbook of Public Policy Agenda Setting Nikolaos Zahariadis, 2016-09-28 Setting the agenda on agenda setting this Handbook explores how and why private matters become public issues and occasionally government priorities It provides a comprehensive overview and analysis of the perspectives individuals and institutions involved in setting the government's agenda at subnational national and international levels Drawing on contributions from leading academics across the world this Handbook is split into five distinct parts Part one sets public policy agenda setting in its historical context devoting chapters to more in depth studies of the main individual scholars and their works Part two offers an extensive examination of the theoretical development whilst part three provides a comprehensive look at the various institutional dimensions Part four reviews the literature on sub national national and international governance levels Finally part five offers innovative coverage on agenda setting during crises Journal of Small Business and Entrepreneurship ,1986 Nascent Entrepreneurship and Learning Mine Karataş-Özkan, Elizabeth Chell, 2010-01-01 This work by Karataş-Özkan and Chell provide fresh insights on entrepreneurial learning and the entrepreneurship process Employing a well informed social constructivist perspective it combines theory with a richly grounded empirical analysis at three distinct but inter related levels the micro the meso all set in the macro context of the enterprise culture A strength of the work is the multiple levels of analysis which sheds new light on entrepreneurial learning as part of the entrepreneurial process The result is a processual view that captures conceptualises and explains the transitive process of becoming an entrepreneur Alistair R Anderson The Robert Gordon University UK In this book Karataş-Özkan and Chell show great clarity in dealing with a range of complex issues They articulate these in a manner which makes them interesting and comprehensible and in a fashion which impressively interweaves theory practice and method Sarah L Jack Lancaster University UK This informative book examines the process of nascent entrepreneurship from a learning perspective It offers a multi layered framework of nascent entrepreneurship through an inter disciplinary approach and sound application of Bourdieu's conceptual tools and also by generating practical

insights for nascent entrepreneurs enterprise educators and mentors Supported by an empirical investigation of two case studies the authors argue that it is not sufficient to study nascent entrepreneurship and concurrent process of entrepreneurial learning at just the individual entrepreneur or collective team or organisational level and examine the socio behavioural aspects of learning but that entrepreneurial learning should be understood by inter relating personal micro relational meso and macro contextual aspects of nascent entrepreneurship The comprehensive coverage of entrepreneurship theory and research will be of significant value for scholars researchers and students in the field *Entrepreneurs, Managers, and Leaders* A. Mayo,N. Nohria,M. Rennella,2016-05-23 This book reveals how leadership evolves through the story of the American airline industry across the 20th century Entrepreneurs dominate the industry s early history but as the industry evolved a new breed of managers emerged who built a dominant business model that enabled their companies to grow dramatically **Auber Bibliography 1980 Publications** Kloc&,1981-11 **Digital Entrepreneurship, Gender and Intersectionality** Wing-Fai Leung,2018-09-27 This book details qualitative research focusing on Internet startups digital entrepreneurship race and sex discrimination and the sharing economy Addressing the intersections between issues of gender age ethnicity and class the author interviews startup founders including many husband and wife teams in order to understand the working and private lives of digital entrepreneurs in and from Taiwan who utilise Internet and mobile technologies against a backdrop of the country s political social and economic history It investigates contemporary debates about entrepreneurship as they are experienced by new generations of start uppers who challenge existing social and cultural norms by becoming creative workers and embracing the precarity that exists in the volatile digital economy
