Reference Services in the Humanities discusses the structure of literature in the humanities and how it matches or challenges mental images of the field. Chapters are infused with the issues of language names and meaning within a metaphoric genre. The book serves as a guide to humanists' use of metaphoric language and also as a bibliography of sources. Reference Services in the Humanities contains specific references for finding materials in areas that are not traditional mainstream arts. This sample of disciplines provides case studies depicting each field's particular idiosyncrasies. Chapters examine the challenge of referral reference and common problems encountered in searching for answers to patrons' questions. The book contains a theoretical framework for interacting with patrons and addresses options for humanities reference in an electronic age. This book brings together librarians and researchers who provide and manage reference services to a wide array of disciplines within the humanities. Authors come from all types of libraries and represent a broad spectrum of patrons from the young student curious about the movies to practicing musicians and craftspersons. This diversity provides an informative grounding for practitioners and library school students and faculty who wish to become effective reference librarians in the future. Reference Services in the Humanities is divided into four sections which address research questions and challenges in selected disciplines, descriptions from the field, political issues in the humanities, and theories and ideas for the future. Specific topics explored include access to special collections, censorship, library resources for theater artists, history research, vocabulary control, labeling of minorities, craft information sources, and much more.

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008. The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work. Although there has been extensive research on women in history by region, no text or reference work has comprehensively covered the role women have played throughout world history. The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected. The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies, geography and history, comparative culture and society, including adoption, abortion, performing arts, organizations and movements such as the Egyptian Uprising and the Paris Commune, women and gender studies, and topics in world history that include slave trade, globalization, and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued go-to resource for scholars, college and high school students, and general readers alike.
