Brown,2006-01-03 Rev ed of Global environmental politics Gareth Porter Janet Welsh Brown and Pamela S Chasek 3rd ed 2000      The Global Politics of the Environment Lorraine M. Elliott,1998-01 Human activity is changing the global

environment on a scale unlike that of any other era Environmental deterioration is now a global issue ecologically politically and economically that requires global solutions Yet there is considerable disagreement over what kinds of strategies we should adopt in order to halt and reverse damage to the global ecosystem What kinds of international institutions are best suited to dealing with global environmental problems Why are women and indigenous peoples still marginalized in global environmental politics What are the consequences of the global ecological crisis for economic and security policies The Global Politics of the Environment makes sense of the often seemingly irreconcilable answers to these questions It focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet      *Understanding Global Environmental*

*Politics* Matthew Paterson,2001-12-14 This book develops a new critical approach to global environmental politics Instead of simply advocating the construction of new international institutions to respond to such challenges it argues that the construction of alternative social and political structures is necessary After an examination of policy making surrounding sea defenses which challenges the notion that political institutions are neutral regarding environmental change it examines the political dynamics of car culture and of the meat centered fast food industry      **Environmental Politics** Norman

Miller, 2017-12-19 At every stage environmental policy is the result of the combat of stakeholders interested in and affected by the problem being addressed and the range of possible solutions The combatants include any or all of the following the federal government environmental advocacy groups and business the media the scientific community think tanks NGOs of every stripe trade associations and professional organizations and even state and local governments each of whom have their own interests in the resulting policy Environmental Politics Interest Groups the Media and the Making of Policy discusses political battles over the environment from ground level as they are fought in legislative chambers the daily newspaper on television and increasingly on the Internet The text explores environmental politics as a clash of interests not ideologies and environmental policy as a result of the reconciliation of those interests The author covers not only the conventional aspects of the policymaking process but more recent and less recognized elements and developments such as Proliferation of legislative riders and monument designations as major environmental strategies Evolving role of the media from science popularizer to agenda setter Growing influence on both Congress and the public of conservative and libertarian foundations and think tanks Devolution of environmental power from the Federal to state governments Metamorphosis of EPA in a business driven regulatory revolution Effect of globalization on US environmental policy Newly emerging role of the precautionary principle in marrying science and politics Increasing role of the Internet in promoting populist issues and promoting the decentralization of the environmental power structure No other book covers the politics of the environment the way this one does Written by an expert with 25 years of experience in environmental policymaking Environmental Politics Interest Groups the Media and the Making of Policy gives you an insider's view of how policies are forged By examining these issues through an interest group lens this book not only accounts for what policies have been adopted but also shows how you can influence policy and effect change Global Environmental Politics Hayley Stevenson, 2017-11-02 Concern about humanity's impact on the planet has never been greater but what are the drivers of environmental change This wide ranging introductory textbook outlines the competing explanations of why environmental problems occur and examines the different political approaches taken to address them Adopting a case study approach Hayley Stevenson enables students to gain a detailed understanding of how theories and concepts are applied in practice Diverse perspectives on a variety of contemporary environmental challenges from climate change to hazardous waste as well as various responses from multilateral diplomacy to consumer focused campaigns provide students with an in depth understanding of the merits and limitations of different forms of political action Refined on the basis of classroom feedback features include textboxes key points a glossary of key terms questions further reading suggestions and supplementary online resources This lively book is an essential resource for advanced undergraduate and postgraduate courses on global environmental politics and environmental policy Global Environmental Politics Ronnie D. Lipschutz, 2003-07-30 Traditional views of global environmental politics take the structures and relations of international politics as a given Solutions to environmental problems then must be products of concession

negotiation and inevitable compromise a world of top down planetary management Lipschutz challenges students to question these conventional approaches He argues that much light can be shed on global environmental degradation if we look beyond the politics of conflict and cooperation and explore environmental problems from their very roots Using a framework that accounts for the ontologies material conditions and power relations that structure global environmental problems Lipschutz is able to more effectively question attempts to clean up the globe and sustain the world s natural resources Throughout the text the author uses compelling cases to illustrate the effects of globalization and capitalism yet is careful to make the link between the local and the global to show how we as individuals are both consumers of goods and producers of pollution A powerful new approach How is the financing of a water system in Bolivia linked to long standing forestation practices in India Taking nothing for granted the root causes of major global environmental problems are exposed and subjected to rigorous analysis Lipschutz shows for instance how privatization operates in different global contexts with strikingly similar consequences In what ways are liberalism and realism actually two sides of the same coin Both make self interest of the individual and of the state key operating terms In a revealing comparison Lipschutz explores the limits of these dominant political models to effectively frame and solve environmental problems What kinds of political social and environmental practices bring about meaningful change By emphasizing the global impacts of local actions the text shows how attempts to control environmental problems may actually reproduce the very systems they are meant to ameliorate Combined with practical pedagogy Rich historical background helps contextualize contemporary issues Extensive suggested reading lists at the end of each chapter guide students to further research while tables and figures elegantly show data and concepts The emphasis on assessing the root causes of global environmental problems and models encourages critical thinking Students are also encouraged to rethink their own role in the global environmental system and to get involved in effective forms of social change
