## **Environment Heredity And Intelligence:**

Intelligence, Heredity and Environment Robert J. Sternberg, Elena L. Grigorenko, 1997-01-28 The debate over nature versus nurture in relation to intelligence is not as clearly drawn as it was ten years ago when geneticists claimed that intelligence is innate while environmentalists claimed that culture is the major determining factor. Although the debate has not been resolved, it has been significantly refined. Robert Sternberg and Elena Grigorenko address the roles and interaction of nature and nurture in Intelligence Heredity and Environment. This book provides a comprehensive, balanced, current survey of theory and research on the origins and transmission of human intelligence. The book is unique in the diversity of viewpoints it presents and its inclusion of the very most recent theories and findings. It highlights the search for genes associated with specific cognitive abilities, interactionist theories, cultural relativism, educational strategies, developmental perspectives, and fallacies of previous intelligence research. *The Nature-Nurture Basis of Intelligence. The Roles of Genetics and Environment in Determining Intelligence* Patrick Kimuyu, 2017-12-07 Research Paper postgraduate from the year 2017 in the subject Medicine Human Genetics grade 1 Egerton University language English abstract In an attempt to determine the factors that influence intelligence in humans, psychologists have investigated the issue from two principal perspectives: nature and nurture. As a result, research studies on these aspects have confirmed that both nature and nurture influence the development of intelligence. According to Heffner, genetic factors have been identified as the influential forces of nature that shape intelligence, whereas environmental factors influence intelligence through exposure or, rather, nurture. In both schools of thought, it is apparent that tests for intelligence are aimed at determining the level of intelligence through the use of Intelligence Quotient (IQ) tests. Similarities and differences in IQ among individuals explain the degree at which genetics and environment influence the development of intelligence. Therefore, this research paper discusses the nature-nurture basis of intelligence. **Environment, Heredity, and Intelligence** Harvard Educational Review, Arthur Robert Jensen, James F. Crow, Lee J.
