Understanding Society and Natural Resources Michael J. Manfredo, Jerry J. Vaske, Andreas Rechkemmer, Esther A. Duke, 2014-06-11 In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving The chapters provide an overview of the history vision advances examples and methods that could lead to integration The quest for integration among the social sciences is not new Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues Integration merits debate for a number of reasons First natural resource issues are complex and are affected by multiple proximate driving social factors Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations Complex problems are best explored across disciplines that examine social ecological phenomenon from different scales Second multi disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences Too frequently there is a belief that one social scientist on a multi disciplinary team provides adequate social science representation Third more complete models of human behavior will be achieved through a synthesis of diverse social

science perspectives **Environmental Sociology** John Hannigan, 2014-03-26 The third edition of John Hannigan's classic undergraduate text has been fully updated and revised to highlight contemporary trends and controversies within global environmental sociology. Environmental Sociology offers a distinctive balanced treatment of environmental issues reconciling Hannigan's much cited model of the social construction of environmental problems and controversies with an environmental justice perspective that stresses inequality and toxic threats to local communities **William R. Freudenburg, a Life in Social Research** Susan Maret, 2013-12-18 True to the nature of the Gedenkschrift this commemorative publication celebrates the work of sociologist Dr William Freudenburg one of the founding editors of RSPPP and Dehlsen Professor University of California Santa Barbara Encyclopedia of Anthropology H. Coy, 2013-07-01 This volume brings together multi method research on political mobilization in the USA rights in Peru peacebuilding in Croatia and Israel Palestine local forums in the Occupy movement and a crowd behaviors in the context of university party riots Ozone Connections Penelope Canan, Nancy Reichman, 2017-09-08 It is difficult to think of a more significant example of international cooperation to address a problem that threatened the health and wellbeing of the entire planet than the 1987 Montreal Protocol for the Elimination of Ozone Depleting Substances This breakthrough in international environmental governance has proved to be an extraordinary success beyond rhetoric or promises In a dozen years this international agreement went from an understanding of the need to act in a precautionary manner for mutual benefit to a successful worldwide effort to eliminate chemical substances harmful to our protective ozone layer The production and consumption of most ozone depleting substances has now been phased out in developed countries with developing countries not far behind What happened and why is of tremendous

importance for those looking for guidance in the future particularly those now involved in hugely complicated negotiations on climate change The success of the Montreal Protocol has been linked to many factors such as political will treaty flexibility and the recognition of equity issues raised by developing countries While comprehensively analysing all of these success factors Ozone Connections goes on to suggest that a social organization of global governance as typified by the protocol s Technical and Economic Assessment Panel TEAP was a unique but replicable decisive factor The book argues that we need to understand how the implementation of complex global environmental agreements depends on the construction and exploitation of social connections among experts who act collectively to define solutions to environmental problems This highly original and provoking thesis synthesises some of the more exciting social science concepts and methods while refining our basic understanding of environmental social change and providing policy makers with concrete success factors to replicate This book will be essential reading for academics in the fields of sociology political science international relations network studies human communication motivation collaboration and leadership as well as the burgeoning interdisciplinary field of environmental studies Businesses will also find many applications for practical use Finally the many directly transferable lessons from ozone layer protection make this book a key addition to the growing literature on climate change

Vulnerability Studies in the Americas Paula Mussetta, Margot Hurlbert, 2020-01-06 This book is the result of a seven year project that involved the countries of Chile Argentina Brazil Colombia and Canada in assessing climate change climate change vulnerability and adaptive capacity It employs a unique methodology for integrating the findings brought together here and fills a gap in academic literature in relation to case studies on South America in English comparative case studies of the global North and South and vulnerability assessment On the Cross Road of Polity, Political Elites and Mobilization

Barbara Wejnert, Paolo Parigi, 2016-12-21 This volume discusses the various interrelations that exist within and between social and political phenomena *Global solidarities against water grabbing* Caitlin Schroering, 2024-09-24 Conflicts over water are human caused events with socio political and economic causes From Brazil s Movimento dos Atingidos por Barragens MAB to environmental activists in Pittsburgh people are coming together to fight for control of their water This book examines how movements are communicating and organizing against water privatization and other forms of water grabbing and explores how movements engage with and learn from each other Water is at the heart of this book but Global solidarities against water grabbing is as much about collective struggle and popular organization as it is about water Based on extensive fieldwork with two movements fighting against water privatization the book uses anticolonial and feminist research methods to show how global communications and organizing are occurring around water and how Global North movements are engaging with and learning from the Global South and vice versa *Renegade Kids, Suburban Outlaws* Wayne S. Wooden, Randy Blazak, 2001 Topics covered include exploring boundary between deviance and criminality in the lives of young people who are deeply involved in the youth culture show how youth culture is not a set of categories so much

as it is a dynamic and creative response to the confusions of growing up in modern society *Environment, Energy, and Society* Craig R. Humphrey, Frederick H. Buttel, 1986 *Education, Environmental Attitudes and the Design Professions* Traci R. Rider, 2006 The Oxford Handbook of Energy and Society Dr. Debra J. Davidson, Dr. Matthias Gross, 2018-07-11
