Environmental Data Management Carl Oppenheimer,2012-12-06 Throughout the world a staggering amount of resources have been used to obtain billions of environmental data points Some such as meteorological data have been organized for weather map display where many thousands of data points are synthesized in one compressed map Most environmental data however are still widely scattered and generally not used for a systems approach but only for the purpose for which they were originally taken These data are

contained in relatively small computer programs research files government and industrial reports etc This Conference was called to bring together some of the world's leaders from research centers and government agencies and others concerned with environmental data management The purpose of the Conference was to organize discussion on the scope of world environmental data its present form and documentation and whether a systematic approach to a total system is feasible now or in the future This same subject permeated indirectly the Stockholm Conference on the environment where although no single recommendation came forth suggesting a consolidated environmental data pool bank or network each recommendation indicated that substantial environmental data needed to be obtained or needed to be pooled and analyzed from existing data sources
