## **Environmental Challenge For Central European Economies In Transition:**

The Environmental Challenge for Central European Economies in Transition Jürg Klarer, Bedrich Moldan, 1997-04-21 In addition the roles of sustainability and human values the general public NGOs and the business sector are considered

Environmental Problems in East-Central Europe Frank Carter, David Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed The attempts to bring environmental legislation into line with West European norms is also described Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs European Union assistance civil society and the work of environmental NGOs are also discussed All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the bases of fair share of the earth's resources

*Environmental Transitions* Petr Pavlínek, John Pickles, 2002-09-26 Environmental Transitions is a detailed and comprehensive account of the environmental changes in Central and Eastern Europe both under state socialism and during the period of transition to capitalism The change in politics in the late 1980s and early 1990s allowed an opportunity for a rapid environmental clean up in an area once considered one of the most environmentally devastated regions on earth The book illustrates how transformations after 1989 have brought major environmental improvements as well as new environmental problems It shows how environmental policy economic change and popular support for environmental movements have specific and changing geographies associated with them Environmental Transitions addresses a large number of topics including the historical geographical analysis of the environmental change health impacts of environmental degradation the role of environmental issues during the anti communist revolutions legislative reform and the effects of transition on environmental quality after 1989 Environmental Transitions contains detailed case studies from the region which illustrate the complexity of environmental issues and their intimate relationship with political and economic realities It gives theoretically informed ideas for understanding

environmental change in the context of the political economy of state socialism and post communist transformations drawing on a wide body of literature from West Central and Eastern Europe     EU Enlargement and the Environment JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union assessing and challenging prevailing views about the outcomes and processes of this historic development Looking at four central themes capacity changes and limitations the EU s mixed messages and conflicting priorities non state actor roles and developments and the exchange of ideas and information the volume shows that enlargement will change the EU not just make it bigger and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable This book was previously published as a special issue of the journal Environmental Politics     *The Economics of Transition* Ichiro Iwasaki, 2020-04-28 In the last three decades since the fall of the Berlin Wall there has been a vast amount of study looking at transforming the planned economy to a market economy from both theoretical and empirical aspects This book provides an overview and insight into transition economies in the recent decades and looks at key economics topics from the so called transition strategy debate to environmental reform The book also includes an analytical review and meta analysis of the existing literature By integrating theoretical discussions and synthesizing empirical findings in a systematic manner this book may help to enlighten the debate on the timing speed and policy sequence of economic transition The book will particularly appeal to researchers policy makers other practitioners and under and post graduate students who are interested in transition economies in Eastern Europe the former Soviet Union Southeast Asia and China It aims to be read as an advanced reader

**Environmental Crises** Tatyana Saiko, 2014-09-19 Provides students with an in depth historic and contemporary understanding of the causes magnitude and implications of the different types of environmental crises in the countries of the former Soviet Union and Eastern Europe     The Economy of East Central Europe, 1815-1989 David Turnock, 2004-03 From an expert in the field this major survey includes new research and recent changes in the region and reviewing two centuries of modernization examines the history of Eastern European economies within a wider political and ideological context

**New Environmental Policy Instruments in the European Union** Ian Bailey, 2017-07-05 The use of legislation by EU governments to define environmental standards for industry has been criticised for its poor track record in arresting the decline in the quality of Europe s environment Environmental economists in particular have proposed that legislation should be supplemented or replaced by New Environmental Policy Instruments NEPIs such as eco taxes environmental charges tradable permits and voluntary agreements This book focuses on practical experiences with NEPIs in the EU and tests their application using the case study of the Packaging and Packaging Waste Directive It traces the ways in which member states have adapted NEPIs to suit their preferred styles of environmental policy then assesses their performance and how NEPIs have both assisted and hindered the EU environmental programme It suggests options for ensuring that the environmental

programme does not become fragmented by the use of NEPIs and discusses the implications of EU enlargement

**Environmental Leadership** Deborah Rigling Gallagher, 2012-09-19 This reference handbook tackles issues relevant to leadership in the realm of the environment and sustainability Central and South-Eastern Europe 2003 Europa Publications, 2002 An in depth survey of the region presenting the latest economic and political developments It includes expert comment on issues of regional importance up to date statistics a directory of institutes and companies and political profiles

**Central and South-Eastern Europe 2004** Europa Publications, 2003 Comprises a general survey of the region country surveys political profiles of the region and information on international and regional organizations and research institutes

**Ecological Modernisation Around the World** Arthur P.J. Mol, David A. Sonnenfeld, 2014-04-08 The idea of ecological modernisation originated in Western Europe in the 1980s gaining attention around the world by the late 1990s At the core of this social scientific and policy oriented approach is the view that contemporary societies have the capability of dealing with their environmental crises Experiences in some countries demonstrate that modern institutions can incorporate environmental interests into their daily routines Elsewhere economic and political interests dominate development trajectories and environmental deterioration continues challenging the premises of ecological modernisation This volume brings together research on ecological modernisation practices around the world Studies on Western Central and Eastern Europe the USA and Southeast Asia examine the applicability of this approach to advanced industrial countries transitional economies and developing countries respectively Authors critically examine the premises of ecological modernisation theory assess its value for understanding past and present environmental transformations and outline paths for designing future sustainable development Taken together the studies in collected this volume offer significant refinements extensions and critiques of ecological modernisation theory and suggest important directions for future research on social and policy dimensions of environmental change *East-Central European Economies in Transition* John P. Hardt, Richard F.

Kaufman, 2016-09-16 This volume makes JEC commissioned expert studies of economic developments in East Central Europe available to business people educators and students Coverage includes economic political and social reform issues regional relations and the impact of Western assistance programmes Evolving Practice In EU Enlargement With Case Studies In

Agri-Food And Environment Law Kirstyn Inglis, 2010-04-16 Following some ten years as a practicing lawyer and consultant Kirstyn Inglis has been researching the evolving legal practice of EU enlargement for over ten years This book succinctly introduces this evolving practice covering transitional arrangements in accession treaties the Treaty of Lisbon recent European Court case law the specific governance challenge of incorporating Bulgaria and Romania and the strategy for future enlargements to bring in the Western Balkans and Turkey In part two the examples of the environment and the agri food acquis are explored including the analysis of the transitional arrangements in practice Overall the diversity and complexity of the pre accession and post accession challenge of enlargement becomes apparent as do key challenges for the

evolution of the *acquis communautaire* in an enlarging Union at a time when Croatia is waiting to sign its own accession treaty *Finance & Development, September 2000* International Monetary Fund. External Relations Dept., 2000-01-01 For the latest thinking about the international financial system monetary policy economic development poverty reduction and other critical issues subscribe to Finance Development F D This lively quarterly magazine brings you in depth analyses of these and other subjects by the IMF's own staff as well as by prominent international experts Articles are written for lay readers who want to enrich their understanding of the workings of the global economy and the policies and activities of the IMF

**Transnational Politics of the Environment** Liliana B. Andonova, 2003-11-21 A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In *Transnational Politics of the Environment* Liliana Andonova examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards *Transnational Politics of the Environment* challenges the current focus on intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics

**Energy Poverty in Eastern Europe** Stefan Buzar, 2016-12-05 One of the consequences of the post socialist transformation of Eastern and Central Europe and the Former Soviet Union is the emergence of energy poverty a condition where households are living in inadequately heated homes This book provides the first full length examination of the causes consequences and patterns of energy poverty in former Communist countries Based on empirical evidence that spans different spatial contexts and scales and compares these with other parts of the world the book links household level deprivation with broader organizational and political dynamics The book also analyzes the lived experiences of scarcity and marginalization with the aid of two in depth country studies Furthermore it identifies the socio demographic factors that distinguish energy poor families from the rest of the population while stressing the need for a comprehensive range of policy

tools to address energy poverty As the issue of energy supply from the former Soviet Union is likely to become one of the most important economic and political problems across the whole of Europe within the next couple of decades the book argues that there is a direct link between the energy crises experienced by the region and the social aspects of energy use in households

**The Environment and Sustainable Development in the New Central Europe** Zbigniew Bochniarz, Gary B. Cohen, 2007-12-01 With the enlargement of the European Union the accession countries are coming under pressure to develop and meet EU standards for environmental protection and sustainable development In this ongoing process global economic liberalization regulatory policy conservation and lifestyle issues are all involved and creative solutions will have to be found Historians geographers economists ecologists business management experts public policy specialists and community organizers have come together in this volume and examine for the first time environmental issues ranging from national and regional policy and macroeconomics to local studies in community regeneration The evidence suggests that far from being mere passive recipients of instruction and assistance from outside the people of Central and East Central Europe have been engaged actively in working out solutions to these problems Several promising cases illustrate opportunities to overcome crisis situations and offer examples of good practices while others pose warnings The experiences of these countries in wrestling with issues of sustainability continue to be of importance to policy development within the EU and may serve also as examples for both developed and developing countries worldwide

**Green Budget Reform in Europe** Kai Schlegelmilch, 1999 This book on Green Budget Reforms GBR provides comprehensive insight into how forerunner countries such as Denmark the Netherlands Norway Sweden and Switzerland but also Hungary and Poland have designed and taken first steps toward GBR with emphasis on Ecological Tax Reform ETR The book covers the proceedings of an international seminar held in Slovenia with contributions from economists of the European Commission the OECD finance ministries and researchers It also includes the first comprehensive case study of Slovenia demonstrating the unique opportunities for GBR in Central and Eastern European Countries in particular The book is for policy makers consultants lecturers and scientists who wish to make and measure progress in sustainable development Readers can choose from a range of market based instruments applied in various countries and adapt them according to the requirements of their countries

From the Cult of Waste to the Trash Heap of History Zsuzsa Gille, 2007-04-04 Zsuzsa Gille combines social history cultural analysis and environmental sociology to advance a long overdue social theory of waste in this study of waste management Hungarian state socialism and post Cold War capitalism From 1948 to the end of the Soviet period Hungary developed a cult of waste that valued reuse and recycling With privatization the old environmentally beneficial though not flawless waste regime was eliminated and dumping and waste incineration were again promoted Gille s analysis focuses on the struggle between a Budapest based chemical company and the small rural village that became its toxic dump site
