**An Agenda for Sustainable Development Research** Walter Leal Filho,Amanda Lange Salvia,Claudio Ruy Portela de Vasconcelos,2024-09-20 This book involves establishing a set of priorities and a roadmap that can guide scholarly and

practical efforts towards sustainability goals It encourages collaboration across disciplines to address complex sustainability issues that span social economic and environmental domains It also supports the development of robust methodologies for conducting research including quantitative qualitative and mixed methods approaches But despite the importance of and the need for an agenda for sustainable development research many efforts are isolated and thematically disconnected Also it is difficult to find information on how sustainability research is being undertaken and on the wide range of methods being used Against this backdrop and in order to facilitate a broad discussion on the contribution of sustainable development research this book is being produced The book gathers inputs from universities and research organisations working on matters related to sustainable development research in a variety of contexts It also provides a platform for the dissemination of information on the latest initiatives paving the way for technology transfer and networking Furthermore the book intends to provide a fertile basis upon which universities research centres and practitioners may cooperate more closely in this key area Last but not least a further aim of the book is to present methodological approaches and experiences deriving from case studies and projects which aim to show how sustainability research may be implementing across a range of disciplines Thanks to its scope and interdisciplinarity this books makes an excellent reading to everyone interested on sustainability research

**The Environment** Chris C. Park,2001 The second edition of this fully integrated introductory text for courses in environmental studies and physical geography builds on the resounding success of the first edition providing a comprehensive account of modern environmental issues and the physical and socio economic framework in which they are set It explains the principles and applications of the different parts of the Earth s system the lithosphere atmosphere hydrosphere and the biosphere and explains the interrelationships within and between these systems It explores the present environmental crisis examines how the planet Earth fits into the wider universe and explores human environment interactions

**Environmental Ethics** Kees Vromans,Rainer Paslack,Gamze Isildar,Rob de Vrind,Jürgen Simon,2017-09-08 As the destructive consequences of environmental problems such as global warming water scarcity and resource and biodiversity destruction have been felt ever more heavily people are becoming more aware of the importance of and their responsibilities towards environmental protection The causes of our problems are anthropogenic The number of people working in what might be termed environmental industries or with environmental responsibilities in their day to day work has mushroomed In many cases however individuals charged with protecting the environment have a set of empirical priorities what is done rather than moral priorities which consider what should be done The need to harmonize environmental knowledge with ethical behaviour and thus achieve behavioural change and the internalization of environmentally ethical values has never been more urgent This book developed as part of an EU programme to diffuse the application of environmental ethics to decision making on pollution control is a response to the need for a restatement of environmental ethics and for a code of behaviour and set of values that can be internalised and adopted to guide the actions by individuals at the sharp end of protecting the

environment decision makers and environmental experts executives staff working in municipalities and public government organisations throughout the EU and Turkey It is nothing short of an ethical training manual that will guide environmental experts decision makers in making sound judgements and decisions and will act as a bridge between environmental knowledge and environmental behaviour The book will be essential reading for decision makers and experts working in local authorities and governmental organisations with responsibility for environmental protection for both graduate and postgraduate students in environment related disciplines and for vocational education teachers with a focus on the environment

**A Companion to Environmental Geography** Noel Castree, David Demeritt, Diana Liverman, Bruce Rhoads, 2016-10-03 A Companion to Environmental Geography is the first book to comprehensively and systematically map the research frontier of human environment geography in an accessible and comprehensive way Cross cuts several areas of a discipline which has traditionally been seen as divided presenting work by human and physical geographers in the same volume Presents both the current state of the art research and charts future possibilities for the discipline Extends the term environmental geography beyond its traditional meanings to include new work on nature and environment by human and physical geographers not just hazards resources and conservation geographers Contains essays from an outstanding group of international contributors from among established scholars and rising stars in geography

**Innovating Strategies and Solutions for Urban Performance and Regeneration** Cristina Piselli, Haşim Altan, Osman Balaban, Peleg Kremer, 2022-07-01 This book focuses on enhancing urban regeneration performance and strategies that pave the way toward sustainable urban development models and solutions The book at hand thoroughly examines the latest studies on the regeneration of urban areas and attempts at alleviating the negative impacts associated with high population density and urban heat effects It gathers contributions that combine theoretical reflections and international case studies on urban regeneration and transformation with the single goal of tackling existing social and economic imbalances and developing new solutions The primary audience of this book will be from the field of architecture and urban planning offering new insights on how to address the myriad of problems that our cities are facing
