Global Development and the Environment Joel Darmstadter, 2016-03-17 In preparation for the United Nations

Conference on Environment and Development in Rio de Janeiro in June 1992 this study aimed to detail enduring environmental issues that might or might not have been considered at the conference Originally published earlier that year

Global Development and the Environment questions the compatibility of goals for environmental protection natural resource consequences and economic growth in relation to sustainability with essays on important topics such as biodiversity agriculture and population issues This title will be of interest to students of Environmental Studies and Economics

Environmental Concerns and Sustainable Development Vertika Shukla,Narendra Kumar,2019-04-30 The current global environmental crisis is primarily the result of non standardized parameters for environmental regulation and is impacting e g clean air safe drinking water and the quality of food particularly in developing nations Due to their poor lax execution of EIA protocols newly developing countries are preferred destinations for establishing pollution emitting industries which results in the degradation and depletion of their natural resources Lack of environmental policy intervention is another major incentive to base dirty industries in these nations In order to ensure sustainable development the highest priority issues include the monitoring and eradication of environmental problems stemming from economic development virtually every form of economic development primarily results in the loss of forests and thus biodiversity followed by declining air quality and the contamination of natural resources Sustainable development ensures responsible interactions with the environment so as to minimize the depletion or degradation of natural resources and preserve environmental quality It involves integrated approaches to understanding the importance of environmental management systems and policy measures that lead to improved environmental performance This book addresses the environmental concerns associated with economic development and with approaches to attaining sustainable economic development which include monitoring the quality of water resources soil erosion and degradation of the natural environment

Environment and Sustainable Development ,2022 **Defining Sustainable Development for Our Common Future** Iris Borowy,2013-12-04 The UN World Commission on Environment and Development chaired by former Norwegian Prime Minister Gro Harlem Brundtland alerted the world to the urgency of making progress toward economic development that could be sustained without depleting natural resources or harming the environment Written by an international group of politicians civil servants and experts on the environment and development the Brundtland Report changed sustainable development from a physical notion to one based on social economic and environmental issues This book positions the Brundtland Commission as a key event within a longer series of international reactions to pressing problems of global poverty and environmental degradation It shows that its report Our Common Future published in 1987 covered much more than its definition of sustainable development as development that meets the needs of the present without compromising the ability of future generations to meet their own needs for which it became best known It also addressed a long list of issues which remain unresolved today The book explores how the work of the Commission juggled contradictory expectations and world views which existed within the Commission and beyond and drew on the concept of sustainable development as a way to reconcile profound differences The result was both an immense success and disappointment Coining an irresistibly simple definition enabled the Brundtland

Commission to place sustainability firmly on the international agenda This definition gained acceptability for a potentially divisive concept but it also diverted attention from underlying demands for fundamental political and social changes Meanwhile the central message of the Commission the need to make inconvenient sustainability considerations a part of global politics as much as of everyday life has been side lined The book thus assesses to what extent the Brundtland Commission represented an immense step forward or a missed opportunity

Implementing Sustainable Development William M. Lafferty, James Meadowcroft, 2000-11-30 At the Rio Earth Summit in 1992 political leaders from more than a hundred countries made a formal commitment to intensify efforts to resolve global environment and development problems and to strive for sustainable development This volume examines how governments in the developed industrial world have responded to the challenge of sustainable development since it was catapulted into the international stage It focuses on the central government engagement with sustainable development in Australia Canada Japan Norway the Netherlands Sweden the United Kingdom the United States and the European Union The study shows that sustainable development has been integrated into governmental idiom in most jurisdictions and has come to be associated with a series of changes to the structures and approached deployed to manage environmental problems Yet it also reveals significant differences of interpretation and priority and in enthusiasm with which sustainable development has been received

Survival and Sustainability Hüseyin Gökçekus, Umut Türker, James W. LaMoreaux, 2011-03-23 The International Conference on Environment Survival and Sustainability held at the Near East University Nicosia Northern Cyprus 19 24 February 2007 dealt with environmental threats and proposed solutions at all scales The 21 themes addressed by the conference fell into four broad categories Threats to Survival and Sustainability Technological Advances towards Survival and Sustainability Activities and Tools for Social Change Defining Goals for Sustainable Societies Activities and tools that move the society towards greater sustainability were emphasized at the conference These included environmental law and ethics environmental knowledge technology and information systems media environmental awareness education and lifelong learning the use of literature for environmental awareness the green factor in politics international relations and environmental organizations The breadth of the issues addressed at the conference made clear the need for greatly increased interdisciplinary and international collaboration the survival and sustainability concept The exchanges at the conference represent a step in this direction
