Environmental Overkill:

Environmental Overkill Dixy Lee Ray, 1993 challenges the environmental prophets of doom and gloom with penetrating searing truth Environmental Overkill is a bright light that exposes the fraud and deceit being perpetrated against an unknowing public Rush Limbaugh

Environmental Skepticism Peter J. Jacques, 2016-05-06 Environmental skepticism describes the viewpoint that major environmental problems are either unreal or unimportant In other words environmental skepticism holds that environmental problems especially global ones are inauthentic Peter Jacques describes both empirically and historically how environmental skepticism has been organized by mostly US based conservative think tanks as an anti environmental counter movement This is the first book to analyze the importance of the US conservative counter movement in world politics and its meaning for democratic and accountable deliberation as well as its importance as a mal adaptive project that hinders the world s people to rise to the challenges of sustainability Specific consideration is given to the threat of the counter movement to marginalized people of the world and its philosophical implications through its commitment to a deep anthropocentrism

Environmental Mafia Richard O'Leary, 2003 The author questions the validity of some or much of the agenda of the environmental movement in the U S and documents his case with detailed examples of the enormous dangers created by uncontrolled bureaucratic Kafka esque regulators operating in the name of the higher good Such regulations and actions sometimes have effects opposite to what was intended serving neither the environment nor society As more and more of suburban America is discovering re introduced or protected species bears deer geese etc that outstrip the available habitat create safety and sanitation problems for themselves and for humans O Leary weaves together a passionate narrative with news articles studies by the National Center for Public Policy Research and others and profiles of families whose homes and livelihoods have been destroyed for no apparent purpose in the name of environmental protection Most of the events occurred in the West but the lessons may apply nationwide He details the unbearable costs paid by individuals and communities and in some cases entire state economies when overblown concern for animals and plants takes precedence over concern for the well being of mankind Have the original objectives of well intentioned citizens been hijacked by others with different goals in mind He questions why decisions regarding preservation issues are not made more locally and observes that increased centralization is robbing citizens of the power of their votes Topics addressed include property rights wetlands the Endangered Species Act forest fires urban sprawl regulatory abuse and violence perpetrated in the name of environmentalism The book includes documentation sections that back up each chapter with case studies and statistics and offers lists of Internet links to Pro Rights Articles and Pro Rights Organizations

Canadian Issues in Environmental Ethics Wesley Cragg, Allan Greenbaum, Alex Wellington, 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such

as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided in to sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States

Environmental Politics Norman Miller, 2017-12-19 At every stage environmental policy is the result of the combat of stakeholders interested in and affected by the problem being addressed and the range of possible solutions The combatants include any or all of the following the federal government environmental advocacy groups and business the media the scientific community think tanks NGOs of every stripe trade associations and professional organizations and even state and local governments each of whom have their own interests in the resulting policy

Environmental Politics Interest Groups the Media and the Making of Policy discusses political battles over the environment from ground level as they are fought in legislative chambers the daily newspaper on television and increasingly on the Internet The text explores environmental politics as a clash of interests not ideologies and environmental policy as a result of the reconciliation of those interests The author covers not only the conventional aspects of the policymaking process but more recent and less recognized elements and developments such as Proliferation of legislative riders and monument designations as major environmental strategies Evolving role of the media from science popularizer to agenda setter Growing influence on both Congress and the public of conservative and libertarian foundations and think tanks Devolution of environmental power from the Federal to state governments Metamorphosis of EPA in a business driven regulatory revolution Effect of globalization on US environmental policy Newly emerging role of the precautionary principle in marrying science and politics Increasing role of the Internet in promoting populist issues and promoting the decentralization of the environmental power structure No other book covers the politics of the environment the way this one does Written by an expert with 25 years of experience in environmental policymaking

Environmental Politics Interest Groups the Media and the Making of Policy gives you an insider s view of how policies are forged By examining these issues through an interest group lens this book not only accounts for what policies have been adopted but also shows how you can influence policy and effect change

Managing the Environmental Crisis William Russell Mangun, Daniel H. Henning, 1999 Second edition With a new foreword by Lynton Keith Caldwell In *Managing the Environmental Crisis* William R Mangun and Daniel H Henning provide a balanced and comprehensive guide to the management of complex environmental and natural resource

policy issues Taking into account new developments trends and issues that have arisen in recent years the authors begin with the recognition often overlooked that it is not the environment that needs to be managed but human action relating to the environment The authors review issues associated with a range of environmental policy concerns including energy considerations renewable and non renewable resource management pollution control wilderness management and urban and regional policy The history of these issues recent actions pertaining to their management difficulties associated with their continued presence and the consequences of a failure to address these concerns are explored Though focused on specific political issues Mangun and Henning direct their attention to two large scale trends globalization and the political polarization of the environmental movement At the level of the decision making process the incorporation of values specifically addressed from multicultural and cross disciplinary perspectives is also discussed International in scope the book provides descriptions of the roles of both governmental and nongovernmental organizations in the formulations and implementation of national and global environmental policy This thoroughly revised second edition discusses various successes in the arenas of environmental cooperation and management strategy while pointing to the new challenges that have emerged in the last decade

Environmental Management in Practice: Vol 1 Paul Compton,Dimitri Devuyst,Luc Hens,Bhaskar Nath,2013-01-11 Focuses on the instruments and tools currently available to the environmental manager A theoretical background to the instruments is given together with an overview of those instruments that are in common use today with particular attention to the physical economic legislative and communication instruments

Global Warming in a Politically Correct Climate M. Mihkel Mathiesen,2004-01-04 Societies unravel when they lose the glue that holds them together The opening words of *Global Warming in a Politically Correct Climate* reveal author M Mihkel Mathiesen s passionate struggle to reveal how the truth has become controversial in the modern community Mathiesen explores the paralyzing effect political correctness has on society and the associated environmental scares the public has accepted as fact for 30 years Contrasting the exaggerations and glib explanations of politicians advocacy groups and bureaucracies Mathiesen provides a clear and revolutionary account of the actual science behind five major environmental campaigns As the title indicates Mathiesen s work culminates in a relentlessly objective analysis of the real causes of the present global warming Based on the latest scientific findings *Global Warming in a Politically Correct Climate* contains densely packed information never before published in a format accessible to the non scientist With the forgiving veil of political correctness lifted the roles of advocacy groups bureaucracies politicians industry the legal profession and career conscious scientists are examined Mathiesen particularly scrutinizes the media *Global Warming in a Politically Correct Climate* is an enlightening look at how the transfer of wealth from an unwitting public is justified by averting non existent threats and how greed rather than pure idealism is at work in environmental politics

Congressional Record United States. Congress, 1980 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 The Politics of Denial Michael A. Milburn, Sheree D. Conrad, 1996 What is the driving force behind the rage of America's white males Emotion appears to be playing a growing role in politics as evidenced by vociferous opposition to welfare abortion and immigrants as well as by the rise of the radical Religious Right antienvironmentalism and the increasingly neoconservative slant of American public opinion The Politics of Denial presents a compelling explanation of these phenomena providing solid empirical evidence for the role of rigid harsh child rearing practices in the creation of punitive authoritarian adult political attitudes The authors social psychologists show how both the political and the public policy processes in the United States are distorted by the unresolved negative emotions such as fear anger and helplessness that remain from punitive parenting and by the politicians and conservative religious leaders who exploit those emotions Among the many public figures discussed are Patrick Buchanan Newt Gingrich Ronald Reagan and Billy Graham Global Science John W.

Christensen, 2000 Shapers of the Great Debate on Conservation Rachel W. White, 2004-09-30 Through biographical examinations of some of the key figures in the debate on conservation this book seeks to explore a range of subjects such as the evolution of the conservation movement its implications for policy makers and how it impacts the daily lives of people everywhere The varying approaches taken by these individuals will serve to emphasize that there are many definitions of conservation and that many viewpoints are valid Detailed observations of important figures on both sides of the debate including some of the most famous and familiar and some less so provide readers with the knowledge they need to form their own opinions on this topic Major biographies include individuals such as Rachel Carson Dixie Lee Ray John Muir and James Watt An introductory essay an appendix of shorter entries on additional figures and a bibliography are also included

Nature: From nature to natures : contestation and reconstruction David Inglis,John Bone,Rhoda Wilkie,2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents **Environmental**

Movements in Asia Arne Kalland,Gerard Persoon,2013-10-31 This volume paints a general picture of the environmental

situation in Asia backing it up with several case studies Two major points are made in this general picture The first is that environmental campaigns in Asia tend to have a local focus they react to very concrete problems in the immediate neighbourhood and as such usually people are engaged in a cause for practical rather than idealistic reasons Such can be seen in case studies from the volume dealing with campaigns against logging and tree plantations tourist facilities and factories and in support or defence of nature reserves This pattern is in marked contrast to the profile of the most successful Western movements in terms of fund raising at least for whom the focus is on perceived problems in distant parts of the world The second point is evidence in several of the case studies in the volume namely that environmental campaigns cannot be understood in terms of environmental issues alone Rather they should be regarded as a form of cultural critique and frequently are a form of political resistance in situations where open political action is too risky
