Congress. House. Committee on Small Business. Subcommittee on Economic Growth, Capital Access, and Tax, 2013 **Stumbling Toward Sustainability** John C. Dernbach, 2002 In 1992 at the United Nations Conference on Environment and Development in Rio de Janeiro the nations of the world agreed to implement an ambitious plan for ecologically sustainable human development This book is a comprehensive review of U S efforts to achieve such development since Rio The U S has unquestionably begun to take steps toward sustainable development Yet the nation is now far from being a sustainable society and in many respects is farther away than it was in 1992 Nevertheless legal and policy tools are available to put the U S on a direct path to sustainability This book brings together 42 distinguished experts from a variety of backgrounds and academic disciplines It is among the

most thorough assessments ever conducted of U S law and policy concerning the environment

Managing the Business Case for Sustainability Stefan Schaltegger, Marcus Wagner, 2017-09-08 The difficulties in moving towards corporate sustainability raise the question of how environmental and social management can be integrated better with economic business goals Over the last decade the relationship between environmental and economic performance and more recently the interaction between sustainability performance and business competitiveness have received considerable attention in both theory and practice However to date only partial aspects of the relationship between sustainability performance competitiveness and economic performance have been studied from a theoretical as well as an empirical perspective And to date no unique relationship has prevailed in empirical studies A number of explanations have been put forward to explain this including methodological reasons such as the lack of statistical data the low quality of that data or the fact that such data is often available for short time periods only Other theoretical explanations have been developed such as the influence of different corporate strategies or the relatively small influence of environmental or sustainability issues as one factor among many on the economic or financial success of firms So how should the business case for sustainability be managed This is the starting point for this book which compiles insights on a large number of aspects of the link between sustainability performance business competitiveness and economic success in an attempt to provide a comprehensive and structured view of this relationship The book provides an unrivalled body of knowledge on the state of theory and practice in this field and identifies prospective future fields of work The book includes conceptual frameworks for the interaction of social environmental and economic issues in business environments case studies of companies that have successfully integrated social environmental and economic issues analyses of the causal and empirical relationship between environmental and or social performance business performance and firm level competitiveness concepts and tools useful for improving business value with proactive operational strategies assessment of the factors influencing operational sustainability strategies and their economic impact and comparisons of interactions between sustainability performance and firm competitiveness across industry sectors and countries Managing the Business Case for Sustainability is the definitive work in its field the most comprehensive book yet published on the theory and practice of managing sustainability performance competitiveness environmental social and economic performance in an integrated way It will be essential reading for managers academics consultants fund managers governments and government agencies NGOs and international bodies who need a broad and comprehensive overview of the business case for sustainability

Achieving Regulatory Excellence Cary Coglianese, 2016-12-20 Whether striving to protect citizens from financial risks climate change inadequate health care or the uncertainties of the emerging sharing economy regulators must routinely make difficult judgment calls in an effort to meet the conflicting demands that society places on them Operating within a political climate of competing demands regulators need a lodestar to help them define and evaluate success Achieving Regulatory Excellence provides that direction by offering

new insights from law public administration political science sociology and policy sciences on what regulators need to do to improve their performance **Achieving Regulatory Excellence** offers guidance from leading international experts about how regulators can set appropriate priorities and make sound evidence based decisions through processes that are transparent and participatory With increasing demands for smarter but leaner government the need for sound regulatory capacity for regulatory excellence has never been stronger In addition to chapters by editor Cary Coglianese and a foreword by Jim Ellis president and chief executive officer of the Alberta Energy Regulator contributors include Robert Baldwin London School of Economics and Political Science John Braithwaite Australian National University Angus Corbett University of Pennsylvania Daniel Esty Yale University Adam Finkel University of Pennsylvania and University of Michigan Ted Gayer Brookings Institution John Graham Indiana University Neil Gunningham Australian National University Kathryn Harrison University of British Columbia Bridget Hutter London School of Economics and Political Science Howard Kunreuther Wharton School at the University of Pennsylvania David Levi Faur Hebrew University of Jerusalem Shelley H Metzenbaum Volcker Alliance Donald P Moynihan University of Wisconsin Madison Paul R Noe American Forest and Paper Association Gaurav Vasisht Volcker Alliance David Vogel University of California Berkeley and Wendy Wagner University of Texas School of Law

International Organizations in Global Environmental Governance Frank Biermann, Bernd Siebenhüner, Anna Schreyögg, 2009-01-28 Provides a comparative study of the role of international organizations in environmental governance and features case studies on the World Bank OECD the UN Environment Programme and secretariats to environmental treaties and hybrid organizations

Regional Integration in the Asia Pacific Issues and Prospects OECD, The Bob Hawke Prime Ministerial Centre at the University of South Australia, 2005-04-28 This report published by the OECD s International Futures Programme in co operation with the Bob Hawke Prime Ministerial Centre in Australia aims to stimulate informed debate about the main integration issues facing the Asia Pacific region in the *Regional Competitiveness* Ron Martin, Michael Kitson, Peter Tyler, 2012-11-12 There is now a wide spread interest in regions as a key focus in the organization and governance of economic growth and wealth creation This important book considers the factors that influence and shape the competitive performance of regions This is not just an issue of academic interest and debate but also of increasing policy deliberation and action However as the readings in this book make clear the very idea of regional competitiveness is itself complex and contentious Many academics and policy makers have used the concept without fully considering what is meant by the term and how it can be measured Policy formulation has tended to rush ahead of understanding and analysis and the purpose of this book is to close this important gap in understanding This book was previously published as a special issue of *Regional Studies*

Strategy Maps Robert S. Kaplan, David P. Norton, 2004 The authors of *The Balanced Scorecard* and *The Strategy Focused Organization* present a blueprint any organization can follow to align processes people and information technology for superior performance

Unique Environmentalism Gunnar

Grendstad, Per Selle, Kristin Stromsnes, Oystein Bortne, 2006-11-28 their collective action The more unique the case the more we need to study it not only to understand the case itself but also to understand the structure and limits of environmentalism in general We hope that we have been able to show the value of this research strategy The way we have organized our study is different from the Rootes study 2003 This study emphasizes the importance of different environmental cultures and of political conjunctures in a single country of which different environmental groups take advantage We are not arguing against the fact that branches of environmentalism have features in common across countries e g animal rights and antinuclear movements However we would not go as far as the Rootes study We argue that looking at political conjunctures even if important does not tell the whole story Researchers need to understand the broader context in which political conjunctures and environmental culture operate

Ants, Galileo, and Gandhi Sissel Waage, Ray Anderson, 2017-09-08 Although sustainability efforts in business are still a work in progress it is increasingly clear that key elements of a new generation of enterprises will be radically different from those of our contemporary modern industrial economy The core distinctions between what currently exists and what is being created are communicated in this book through the compelling metaphor of Ants Galileo and Gandhi This collection developed from The Natural Step's conference on Sustainability and Innovation in 2002 provides radical ideas for generating a new perspective on the dynamics of business systems Ants symbolise the lessons to be learned from nature and the dependence of individual beings on broader complex systems Galileo embodies brilliance in perceiving and proving that the current paradigm is flawed Gandhi exemplifies exceptional compassion in fighting for fundamental change All of these attributes are increasingly relevant in a world where globally we are experiencing both a steady decline in life supporting resources and rising demands Recognition of these challenges is sparking innovation within the private sector where the first glimmers of systemic change can be seen The book examines the emergence of 21st century enterprises that recognise their reliance on broad social and ecological systems ants incorporate sparks of genius rooted in rigorous analyses Galileo and acknowledge the importance of compassion and determination within any endeavour Gandhi With contributions from Ray Anderson Gretchen Daily Karl Henrik Rob

administrative institutions and fragile legal and judicial systems mean that they lack the capacity to effectively investigate and punish corrupt behaviour. In addition, the sudden inflow of donor aid into post conflict countries and the desire of peacebuilding actors including the UN, the international financial institutions, aid agencies and non governmental organisations to disburse these funds quickly create incentives and opportunities for corruption. While corruption imposes costs and compromises on peacebuilding efforts, opportunities for exploiting public office can also be used to entice armed groups into signing peace agreements thus stabilising post war environments. This book explores the different functions of corruption both conceptually and through the lens of a wide range of case studies. It also examines the impact of key anti corruption policies on peacebuilding environments. The dynamics that shape the relationship between corruption and the political and economic developments in post conflict countries are complex. This analysis highlights that fighting corruption is only one of several important peacebuilding objectives and that due consideration must be given to the specific social and political context in considering how a sustainable peace can be achieved. This book will be of great interest to students of peacekeeping and peacebuilding, criminology, political economy, war and conflict studies, international security and IR.

Competition Policy in Network Industries Frank Fichert, Justus Haucap, Kai Rommel, 2007. The promotion of competition in Europe's network industries has been in the foreground of economic policy in recent years. Network industries have undergone dramatic changes involving privatisation, liberalisation and de as well as re regulation. But there are still many unresolved problems in both economic policy as well as economic research. Hence a vivid exchange between academics and policy makers has emerged to find the optimal framework for these industries. This volume contributes to this discussion containing several papers on various network industries.

A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen, K. Zoeteman, J. Pieters, Paul van Seters, 2012-01-01. Acclaim for the first edition. This is undoubtedly a useful collection of essays for environmental policy makers and anyone interested in the relationship between national government and transnational forces. The collection brings together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment. *International Sociology Review of Books*. The Handbook of Globalisation and Environmental Policy is a very important book. More than 40 experienced authors including some of the most important international thought leaders of our time have confronted a crucial question: How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability? Through close examination of numerous case studies, a balanced perspective that takes government, business and civil society into account and fresh interdisciplinary thinking about a range of policy tools. The Handbook offers a treasure trove of new concepts and new perspectives. The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the growing need to work together in supranational forums, national governments can in fact increase their capacity to shape their own destiny. Lawrence Susskind, Massachusetts Institute of

Technology US In an increasingly interdependent world global forces affect both the design and effectiveness of environmental policy This Handbook provides an unusually creative and comprehensive guide not only to the nature of these forces and their impacts but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy Tom Tietenberg Colby College US In the current era of globalisation national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies This comprehensive revised Handbook pushes the frontiers of theoretical and empirical knowledge and provides a state of the art examination of the multifaceted effects of globalisation on environmental governance Including substantially revised as well as new contributions from leading authorities the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy It covers themes including national regimes trade rules types of goods federalism innovation standards citizen consumers developing countries policy networks partnerships and carbon trading The Handbook s depth and scope will appeal to a broad and varied readership across academics students and policy makers interested in public and private governance environmental economics international relations environmental politics and law sociology and political science Business Process Management Workshops Michael zur Muehlen,Jianwen Su,2011-05-16 This book constitutes the thoroughly refereed post workshop proceedings of nine international workshops held in Hoboken NJ USA in conjunction with the 8th International Conference on Business Process Management BPM 2010 in September 2010 The nine workshops focused on Reuse in Business Process Management rBPM 2010 Business Process Management and Sustainability SusBPM 2010 Business Process Design BPD 2010 Business Process Intelligence BPI 2010 Cross Enterprise Collaboration People and Work CEC PAW 2010 Process in the Large IW PL 2010 Business Process Management and Social Software BPMS2 2010 Event Driven Business Process Management edBPM 2010 and Traceability and Compliance of Semi Structured Processes TC4SP 2010 In addition three papers from the special track on Advances in Business Process Education are also included in this volume The overall 66 revised full papers presented were carefully reviewed and selected from 143 submissions Accounting Information Systems for Decision Making Daniela Mancini,Eddy H.
