Behavioral Problems in Geography Revisited Kevin R Cox,Reginald

Golledge,2015-12-22 This collection of papers originally published in 1981 reviews and evaluates past and possible future advances in a field of central importance to human geography behavioral geography The book includes critical studies which show how the approach has contributed substantially to work within four areas of amjor application in behavioral geography urban travel behavior environmental cognition residential mobility and spatial diffusion The final section of the book focuses on the shortcomings of the behavioral approach and considers the alternative modes of analysis available Environmental Policy, Assessment and Communication David Canter,Martin Krampen,David Stea,2024-11-07 Originally published in 1988 reissued now with a new series introduction Environmental Policy Assessment and Communication was the second in a trilogy of books to open the series Ethnoscapes Current Challenges in the Environmental Social Sciences These three titles brought together specially commissioned contributions that cover much of the range of topics that the series as a whole would cover Although the following volumes would not have the same format the opening trilogy gave an overview of what was to come while also providing a broad base for the future authors to build upon This volume has a practical orientation Its contributions deal directly with research on those environmental matters on which government agencies and other organisations formulate policies or develop design strategies This therefore covers the assessment and evaluation of designs and design proposals as well as background research to policy issues *Environmental Planning Resourcebook* Reg Lang,Audrey Armour,Canada. Lands Directorate,1980 Discusses the nature of environmental planning using a case study approach to illustrate issues and approaches *The Physical Environment and Behavior* Joachim F. Wohlwill,Gerald D. Weisman,2012-12-06 The field of Environment and Behavior This bibliography is aimed at the researcher and advanced student working in the field of environmental psychology as it has come to be designated over the past decade A more appropriate term might be environment behavior studies to suggest the important characteristic of this field as one that transcends the province of the psychologist and brings together workers as well as problems methods and concepts from a great diversity of disciplines and professional fields Among these we may include geography and sociology architecture landscape architecture and planning forestry natural resource management and leisure and recreation research to name only the most important of the diverse fields from which material for this bibliography has been drawn This is in fact one of the primary reasons for our belief in the value of such a volume The literature in the environment behavior field is scattered through the most diverse sources including not only the major periodical and monographic literature in each of the above mentioned disciplines and professions and others as well but also a variety of more specialized publications of varying

degrees of accessibility Thus it seemed to us helpful to the researcher teacher and student in this area to bring this far flung literature together in a single volume that might be used as a guide to the field We aimed at a comprehensive treatment including both basic and applied aspects and relations of behavior both to the man made or artificial and to the natural environment

People and Environment D.J. Walmsley,G.J. Lewis,2014-09-19 First published in 1994 This book comprises a second edition of Human Geography behavioural approaches first published in 1984 The first edition attempted to synthesize the massive volume of geographical literature to have appeared mainly since 1960 concerned with both how people come to know the environment in which they live and with the way in which such knowledge influences subsequent spatial behaviour As with the first edition the rationale for advantages of and shortcomings with behavioural approaches are explored at length in both substantive chapters and in a number of detailed examinations of particular aspects of life in advanced Western society

The Behavioural Environment F.W. Boal,D.N. Livingstone,2003-09-02 Placing human action and perception at the centre of the subject this book considers the effects of mankind on the environment drawing particularly from William Kirk s work on the behavioural environment model Reviewing Kirk s original model in light of recent ideological debate and extensive new evidence this collection of essays from leading names in the field shows that a behavioural approach is essential in understanding human geography and man s relationship with the ecological environment

Magnusson, David Magnusson, 2013-05-13 Published in the year 1981 *Toward a Psychology of Situations* is a valuable contribution to the field of Social Psychology *Perspectives on Environment and Behavior* Daniel Stokols, 2013-11-11 The inception of this volume can be traced to a series of Environmental Psychology Colloquia presented at the University of California Irvine during the spring of 1974 These colloquia were held in conjunction with Social Ecology 252 a graduate seminar on Man and the Environment Although the eight colloquia covered a wide range of topics and exemplified a diversity of research techniques they seemed to converge on some common theoretical and methodological assumptions about the nature of environment behavioral research The apparent continuities among these colloquia suggested the utility of developing a manuscript that would provide a historical overview of research on environment and behavior a representation of its major concerns and an analysis of its conceptual and empirical trends Thus expanded versions of the initial presentations were integrated with a supplemental set of invited manuscripts to yield the present volume of original contributions by leading researchers in the areas of ecological and environmental psychology Integrated Environmental Planning James K. Lein, 2008-04-15 This up to date and comprehensive reference presents the fundamentals of environmental planning incorporating theory practice and case studies The book includes balanced coverage and real world examples to illustrate the concepts Political ethical and societal considerations are all addressed Presents the fundamentals of environmental planning and methodological material for analysis Real world examples are provided to illustrate concepts Political ethical and societal considerations are addressed Coverage is balanced between theoretical and practical Children and the Environment Irwin Altman, 2012-12-06 In the first two volumes of the series we elected to cover a broad spectrum of topics in the environment and behavior field ranging from theoretical to applied and including disciplinary interdisciplinary and professionally related topics Chapters in these earlier volumes dealt with leisure and recreation the elderly personal space aesthetics energy behavioral approaches to environmental problems methodological issues social indicators industrial settings and the like Chapters were written by psychologists sociologists geographers and other social scientists and by authors from professional design fields such as urban planning operations research landscape

architecture and so on Our goal in these first two volumes was to present a sampling of areas in the emerging environment and behavior field and to give readers some insight into the diversity of research and theoretical perspectives that characterize the field Beginning with the present volume our efforts will be directed at a series of thematic volumes The present collection of chapters is focused on children and the environment and as much as possible we invited contributions that reflect a variety of theoretical and empirical perspectives on this topic The next volume in the series now in preparation will address the area of culture and the environment Suggestions for possible future topics are welcome Irwin Altman
 Joachim F Risk Evaluation and Management V.T. Covello, Joshua Menkes, J.L. Mumpower, 2012-12-06 Public attention has focused in recent years on an array of technological risks to health safety and the environment At the same time responsibilities for technological risk assessment evaluation and management have grown in both the public and private sectors because of a perceived need to anticipate prevent or reduce the risks inherent in modern society In attempting to meet these responsibilities legislative judicial regulatory and private sector institutions have had to deal with the extraordinarily complex problems of assessing and balancing risks costs and benefits The need to help society cope with technological risks has given rise to a new intellectual endeavor the social and behavioral study of issues in risk evaluation and risk management The scope and complexity of these analyses require a high degree of cooperative effort on the part of specialists from many fields Analyzing social and behavioral issues requires the efforts of political scientists sociologists decision analysts management scientists economists psychologists philosophers and policy analysts among others
