Le Prestre, 2017-05-15 Predictions about the success of the Convention on Biological Diversity CBD are pessimistic It has now become commonplace

to bemoan the scope ambition and deeply political nature of a convention that addresses issues ranging from ecosystems protection to the exploitation of genetic resources from conservation to justice and from commerce to scientific knowledge Ten years after its adoption how can we assess the difference that the CBD has made Is it in danger of collapsing under its own weight or is it building the foundations of new patterns of relations between societies and nature What achievements can we record and what challenges does it face In this book which is unique in its scope diversity and the wealth of information it contains contributors from a variety of academic disciplines tackle an issue of enduring importance to the protection of biodiversity and enhance our understanding of humanity s capacity to reconcile its various aspirations and halt the destructive path upon which it is set

Thinking Through the Environment Mark J. Smith, 2005-09-30 This reader brings together material from ecological thought environmental policy environmental philosophy social and political thought historical sociology and cultural studies The extracts tell the story of the way the natural environment has been understood in the modern world and how this has recently been questioned as contemporary societies are seen as characterised by uncertainty and complexity The literature guides the reader through the conventional grounds for thinking about rights and obligations in relation to future generations non human animals and the biotic communities bringing each into question This then leads into a critical examination of social and political theories and their capacity for drawing on ecological thought Each of the seven sections of readings is introduced by the editor who locates the set of readings within the specific themes and issues at the heart of each section This broad reaching and thought provoking set of readings stresses the diversity of response to environmental problems both within and between anthropocentric and ecocentric approaches and will encourage the reader to examine how they are manifested in the areas of environmental ethics policy analysis and social and political theory

towards a simultaneously safe healthy and just world The book focuses for holistic solution of the systemic challenges and is ideally suited not only for all general and professional educational courses but also as lifelong learning process by all citizens and stakeholders The unique features of the book and why the book is suitable to everybody While the multi faceted issues of sustainability are widely discussed in isolated manner a blueprint for achieving a sustainable society nation and world in a single book is rare and this is an attempt to fill up this gap The figures of the book can be considered as its unique feature that will help public understanding of sustainability which in turn is crucial for participation of the world citizens in the process of achieving the Sustainable Development Goals SDGs or the Sustainable World as defined in the book as the simultaneously safe healthy and just world

Logjam David Humphreys, 2012-05-04 Winner of the International Studies Association's Harold and Margaret Sprout Award 2008 for the best book on international environmental problems This pioneering study examines the impacts of neoliberal global governance on forests and provides an exhaustive overview of international forest politics Intergovernmental Panel on Forests World Commission on Forests and Sustainable Development Intergovernmental Forum on Forests United Nations Forum on Forests Forest Certification New policies to address illegal logging World Bank's forests strategy Convention on Biological Diversity and other international forest related processes The book is an essential reference for students of global environmental politics and required reading for forest policy makers It concludes by arguing for a democratization of global governance and a fundamental restructuring of the regulatory environment so that final decision making authority is restored to the local level Driven by concern at what forest loss means for communities and future generations this is a book that stands to make a difference
