Environmental Politics And Liberation In Contemporary Africa:

Environmental Politics and Liberation in Contemporary Africa Mohamed Salih, 1999-03-31 Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate The debate has moved on from the earlier but still popular notions of power struggles class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources Where the state controls the distribution of resources itself inevitably becomes party to conflicts whose bone of contention is access to state power as the most efficient means of gaining access to resources The resources in question are social health education transportation communication recreation etc and material land water housing jobs contracts licenses permits etc In parts of the world and especially in Africa diminishing resources and authoritarian state rule exacerbate group competition leading to political confrontation This is the line I have followed in analysing conflict in the Horn of Africa Markakis 1987 1998 Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist He does it by bringing culture into the realm of resources not only as a resource in itself but also as the agency that assigns natural resources their value Culture thus becomes a contextual element in conflict over resources whose value is culturally determined

Environmental Politics and Liberation in Contemporary Africa Mohamed Salih, 2014-03-14 Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate The debate has moved on from the earlier but still popular notions of power struggles class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources Where the state controls the distribution of resources itself inevitably becomes party to conflicts whose bone of contention is access to state power as the most efficient means of gaining access to resources The resources in question are social health education transportation communication recreation etc and material land water housing jobs contracts licenses permits etc In parts of the world and especially in Africa diminishing resources and authoritarian state rule exacerbate group competition leading to political confrontation This is the line I have followed in analysing conflict in the Horn of Africa Markakis 1987 1998 Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist He does it by bringing culture into the realm of resources not only as a resource in itself but also as the agency that assigns natural resources their value Culture thus becomes a contextual element in conflict over resources whose value is culturally determined

Environmental Politics and Liberation in Contemporary Africa M.A. Salih, 2013-03-14 Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate The debate has moved on from the earlier but still popular notions of power struggles class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources Where the state controls the distribution of resources itself inevitably becomes party to conflicts whose bone of contention is access to state power as

the most efficient means of gaining access to resources The resources in question are social health education transportation communication recreation etc and material land water housing jobs contracts licenses permits etc In parts of the world and especially in Africa diminishing resources and authoritarian state rule exacerbate group competition leading to political confrontation This is the line I have followed in analysing conflict in the Horn of Africa Markakis 1987 1998 Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist He does it by bringing culture into the realm of resources not only as a resource in itself but also as the agency that assigns natural resources their value Culture thus becomes a contextual element in conflict over resources whose value is culturally determined *Understanding Namibia* Henning Melber, 2015-01-04 the book offers a frank account of an African state that shook off colonial rule but has yet to see the fruits of independence distributed evenly among its people Drawing on inside knowledge of SWAPO the anti colonial liberation movement the author provides a valuable case study of nation building in the modern era

African Pastoralism M. A. Mohamed Salih, Ton Dietz, Abdel Ghaffar Mohamed Ahmed, 2001-07-20 Although many countries in Africa are devastated by poverty and famine and are desperately in need of aid it is generally recognised that programmes of aid and development in Africa are imposed upon local communities with little regard for their traditional values and way of life This book provides a fresh look at these intricate issues and explores the way in which farming and traditional pastoral livelihoods have strengthened rather than weakened in the face of government reforms It reveals how traditional institutions and resource management strategies within local African communities continue to endure in spite of the enormous pressure that development programs assert as pastoralists resolve to confront coercive state policies designed to privilege the interests of the wealthy and powerful elite The book introduces thirteen case studies from Botswana Ethiopia Eritrea Kenya Somalia Sudan and Uganda and various other parts of the African continent *African Parliaments* M. Salih, 2005-12-10 This book offers in depth analysis of parliamentary development set in a historical context informed by Africa's post 1990s democratic resurgence In particular it illustrates how African parliaments are caught between the twin processes of being part of the machinery of government while exercising the function of holding government accountable

Environment and Conflict John Agbonifo, 2018-07-11 Environmental degradation is a fast growing problem that not only threatens to erode future development and undermine economic prosperity but also victimizes and displaces ordinary peoples and communities in some of the most fragile areas of the world Often grassroots opposition and mobilization is seen through a secular lens implying that collective action is merely material and provincial In this book John Agbonifo argues for a decolonization of the environment and to see the environment from the perspective of local communities He examines the case of the Ogoni struggle against the Shell oil company and asks how may we understand the struggle of the Ogoni against the state and Shell Was the conflict merely about a minority ethnic drive at securing provincial advantages in distributional matters or the legitimate actions of a local community aimed at preserving its environment and livelihood Exploring the

material and symbolic provincial and nationalist dimensions of Ogoni motivation Agbonifo s book is the first serious attempt to discuss these issues The book will appeal to scholars and students of the Niger Delta conflicts resource related conflicts and social movements in Africa and elsewhere Those researching in the fields of development studies political geography civil society and collective action will also find it useful

Environmental Movements around the World Timothy Doyle, Sherilyn MacGregor, 2013-12-09 An unprecedented study of environmentalism environmental movements and efforts at greening across the globe written by culturally embedded scholars with both academic expertise and first hand experience with grassroots advocacy Protection of our planet its people and its natural resources has been a topic of numerous debates in many nations for the past 50 years Each hemisphere continent and country has environmental challenges unique to the region giving birth to green movements all over the world Until now very few resources have compiled the political scientific economic philosophical and religious viewpoints of these programs in one place This two volume work provides a comprehensive collection of the ideas and actions that inform environmentalism at local national and regional levels across the globe Environmental Movements around the World Shades of Green in Politics and Culture includes viewpoints from experts in the fields of political science history international relations environmental studies and sociology that enable readers to compare and contrast different cultures attitudes and solutions towards environmental issues Providing both a broad view of international efforts to protect the earth while also spotlighting very specific examples of environmentally motivated strategies the set explores the political strategies and cultural perspectives behind conservation and environmental activism in countries worldwide

Coping with Water Deficiency Phoebe Koundouri, 2007-11-28 Research results discussed in this book demonstrate that effective water management tools and decision making practices are needed to support interventions to increase availability and manage demand for scarce water supplies Furthermore the book bridges the gap between ideas and actions endorsed in the research oriented environmental debate and their translation into policymaking structures and programs in developed and developing countries

Environmental Health Perspectives, 1999 Greening Society P.J. Driessen, P. Glasbergen, 2013-04-17 This book can be regarded as a monograph on the debates and developments in Dutch environmental policy It has been written with a specific perspective in mind First and foremost the line of approach we have taken was from a multidisciplinary social science point of view The trend in environmental policy is looked at from the angle of sociology policy studies and political science Secondly all analyses depart from the paradigm shift concept This particular paradigm shift is based on the fact that a radical change has taken shape over the years in the way environmental issues are handled Previously environmental policy had always been characterised by is top down approach in which government determined the actual objectives of policy and assumed that it could win over business non governmental organisations and citizens to act in line with those objectives There was also a great deal of faith in the technical solutions to environmental issues Today s environmental policy is based on a totally different philosophy

Environmental objectives are now reached in association with business non governmental organisations and citizens These actors are also involved in bringing environmental policy into practice In other words the implementation of policy has a more interactive nature New relationships emerge between government the market and civil society and policy discourses also become integrated The environmental interest is more often weighed against the economic interests the spatial development and against social justice

Institutional Dynamics in Environmental Governance Bas Arts, Pieter

Leroy, 2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives

The Handbook of Environmental Voluntary Agreements Edoardo Croci, 2005-10-06 EDOARDO CROCI

IEFE Universit Bocconi Milano Italy Voluntary approaches in environmental policy represent a third wave of regulation in the

environmental field Command and control was the first wave Its core is based on uniform emission standards the respect of which needs to be enforced through extensive monitoring and severe sanctions The expected cost of sanction for non compliance calculated as its amount multiplied for the probability to be caught must be superior to the benefits of non compliance in order to let the sanction be effective As the benefits of non compliance can vary among firms sanctions need to be very high in order to be effective In fact sanctions are ordinary correlated to environmental damage and not to the benefits of non compliance But very high sanctions can be difficult to enforce as they appear unfair and can lead to dramatic consequences on firms and workers up to shut downs of plants Ambient standards reduce these problems but oblige the regulator to know a huge amount of information regarding the specific contribution of each polluter to the polluted body Information is difficult to obtain because of asymmetric information and costly to produce because it requires large and skilled regulating and enforcing organizations Nevertheless complex regulation is the base of any environmental policy framework as it allows the policy maker to fully exercise its power of composition of various interests in a relatively transparent way Economic instruments were the second wave *An Institutional Basis for Environmental Stewardship* D.A. Fuchs, 2013-03-09 What is the role of government in environmental politics and policy The answer to this question used to be relatively clear Government was to regulate the environmental performance of state and non state actors to set standards impose charges and establish more or less stringent criteria of acceptable behavior With the increasing appearance of the issues of globalization and global governance in the political science literature however the focus has turned to the role of non state actors Academic research and the popular debate have identified business non governmental organizations NGOs and civil society as such as increasingly important and potentially powerful actors in the political arena At the same time some observers have proclaimed the influence of government to be declining Others have argued that the role of government primarily is changing rather than declining Those who adopt the latter perspective postulate that the new role for government in this changing political and socio economic context is to set the framework for action In this perspective government is still of fundamental importance for the functioning of the society the economy and political decision making but its role is different in that government merely provides the institutional framework facilitating desired outcomes

Implementing the Environmental Protection Regime for the Antarctic D. Vidas, 2012-12-06 When the Protocol on Environmental Protection to the Antarctic Treaty entered into force on 14 January 1998 a new phase commenced for the Antarctic Treaty System The parties to the Protocol are today confronting issues related to the implementation of a complex international environmental protection regime both in international and domestic contexts Several crucial implementation questions need to be solved in order to enhance and make possible the implementation of the Protocol What would be the consequences for the parties of a possible failure in resolving the pending implementation issues on what premises can the solutions be based and what then are the options available This book provides a systematic overview of the implementation

issues in sections on jurisdiction control and enforcement in the Antarctic Part I institutional support to the implementation of the Protocol Part II normative support to the implementation of the Protocol an Antarctic liability regime Part III relationship with other international instruments and arrangements Part IV and through a series of selected case studies issues involved in domestic implementation of the Protocol Part V This is a book that will appeal to Antarctic specialists and to all those interested in environmental law and policy *Political Modernisation and the Environment* J. van Tatenhove, B. Arts, P. Leroy, 2013-03-14 Recent years have witnessed a substantial change in both the organisation and substance of environmental policy both national and international Western societies have seen a change in the relationships between the state the market and civil society leading to new conceptions of governance a process here called political modernisation that gives rise to the institutionalisation of new policy arrangements An environmental policy arrangement refers to the organisation and substance of a policy domain in terms of policy coalitions policy discourses rules of the game and resources The book uses these theoretical notions to analyze changes in organisation substance and governance in several environmental policy domains such as infrastructure policies global policies on climate change and biodiversity green planning and agriculture policy Changing relationships between the state the market and civil society caused by processes of globalization privatisation and individualisation have resulted in a plurality of policy arrangements in different domains Despite the fact that environmental politics has been substantially renewed there is a delicate balance between traditional and new policy arrangements One of the main themes of the book is the explanation of this balance *Globalising Democracy* Peter Burnell, 2006-09-27 This volume brings together expert contributors to explore the intersection of two major contemporary themes globalization and the contribution that both domestic party politics and international party support make to democratization Globalising Democracy clearly shows what globalization means for domestic and international efforts to build effective political parties and competitive party systems in new and emerging democracies Contrasting perspectives are presented through fresh case studies of European post communist countries Africa and Turkey The reader is clearly shown how international party assistance is a manifestation and vehicle of globalization and explores how it may be assessed in terms of global economic integration the growth of global communications the development and implications for party politics of multi level governance This is the first book to analyze the impact of globalization on democracy and will be of great interest to all students of international relations governance and politics *Jerry John Rawlings* Felix Kumah-Abiwu, Sabella Ogbobode Abidde, 2022-11-25 This edited volume examines the leadership and legacy of Ghana's Jerry John Rawlings within the broader context of Africa's leadership and democratic governance The central purpose of the book is threefold First it examines the role and place of good and effective political leadership in the development of Africa Second it situates Jerry Rawlings political style and legacy in the annals of democratic governance in post independence Africa Finally the book adds to the knowledge and understanding of former President Rawlings as one of

Africa's preeminent and transformational political leaders Taking an interdisciplinary and Pan African approach this volume will be of great interest to scholars policymakers and students of African politics African studies governance political leadership democracy development studies and political economy Globalisation, Poverty and Conflict Max Spoor, 2005-12-29 Is development a by-product or a trickle down effect of economic growth spurred by globalisation Will poverty simply diminish with increased global markets This state of the art critical development reader deals with these and related questions Globalisation Poverty and Conflict examines the inter relationships between globalisation poverty and conflict It complements current debates in the field of development studies and in an era in which development fatigue seems to have become more profound than ever before it brings the importance of development once again to the forefront Achieving the Millennium Development Goals by 2015 is a concrete target which many governments have agreed to work towards Whether these goals can be realised is another issue Nonetheless the Millennium Development Goals have brought more focused attention to development in the past few years and renewed debate about the relationships between the process of globalisation and widespread poverty and the emergence of violent conflicts The authors in this edited volume discuss these inter related and highly controversial topical elements of development in a number of chapters organised around three sets of issues 1 globalisation inequality and poverty 2 governance civil society and poverty and 3 resource degradation institutions and conflict The contributions represent current thinking on and practice of development policy poverty reduction the need for multi level democratic institutions and the containing and prevention of conflicts The authors confront the predominant mainstream ideas on development and propose alternatives The chapters written by a select group of scholars and development practitioners will be of direct interest to those involved in this field of social sciences and in development practice but they are composed in such a way as to remain accessible for the generally interested reader
