Environmental Psychology A Psycho Social Introduction:

Environmental Psychology Mirilia Bonnes, Gianfranco Secchiaroli, 1995-08-11 This textbook provides a clear and comprehensive introduction to the rapidly expanding field of environmental psychology. The authors start with a review of the history of environmental psychology highlighting its interdisciplinary nature. They trace its roots in architecture, ecology and geography and examine the continuing relationship of these subjects to the psychological tradition. The book then moves through key contemporary lines of research in the field contrasting models from perception and cognition such as those of Gibson and Brunswick with major social psychological approaches as represented by Lewin, Barker and others. The book concludes with an analysis of the most promising areas of research and practice. *Environmental Psychology*, 1979

Handbook of Environmental Psychology Robert B. Bechtel, Arza Churchman, 2003-01-17 An international team of leading scholars explores the latest theories, research and applications critical to environmental psychology. Featuring the latest research and concepts in the field straight from the world's leading scholars and practitioners, *Handbook of Environmental Psychology* provides a balanced and comprehensive overview of this rapidly growing field. Bringing together contributions from an international team of top researchers representing a myriad of disciplines, this groundbreaking resource provides you with a pluralistic approach to the field as an interdisciplinary effort with links to other disciplines. Addressing a variety of issues and practice settings, *Handbook of Environmental Psychology* is divided into five organized and accessible parts to provide a thorough overview of the theories, research and applications at the forefront of environmental psychology today. Part I deals with sharpening theories, Part II links the subject to other disciplines, Part III focuses on methods, Part IV highlights applications and Part V examines the future of the field. Defining the ongoing revolution in thinking about how the environment and psychology interact, *Handbook of Environmental Psychology* is a must reading for anyone coping directly with the attitudes, beliefs and behaviors that are destroying our environment and putting our lives in jeopardy. Topics include: Healthy design, Restorative environments, Links to urban planning, Contaminated environments, Women's issues, Environments for aging, Climate, weather and crime, The history and future of disaster research, Children's environments, Personal space in a digital age, Community planning. Environmental Psychology Tony Cassidy, 2013-10-31 This text contains an up to date survey of theory, research and practice in environmental psychology drawing on international literature. It adopts the perspective that physical and social factors are inextricably linked in their influence on human behaviour and experience and that the world in which we live is changed and often damaged by human action. Throughout the text the issues which are important in contemporary psychology such as levels of explanation, methodological diversity and the relationship between psychology and other disciplines are brought to the fore. The text covers established areas of environmental concern and also brings together research on rarely covered topics such as the effects of smell, colour and light and the way in which physical environments

from different types of annoyances such as pollution and noise while at a global level there is the central question of climate change with its harmful consequences for humans and the planet How can the impact on well being of environmental nuisances and threats for example natural risks pollution and noise be reduced How can the quality of life within daily living spaces home cities work environments be improved Why is it important to understand the psychological issues of our relationship with the global environment climatic warming ecological behaviours This Handbook is intended not only for students of various disciplines geography architecture psychology town planning etc but also for social decision makers and players who will find in it both theoretical and methodological perspectives so that psychological and environmental dimensions can be better taken into account in their working practices

Designing for the Museum Visitor Experience

Tiina Roppola, 2013-03-05 Exhibition environments are enticingly complex spaces as facilitators of experience as free choice learning contexts as theaters of drama as encyclopedic warehouses of cultural and natural heritage as two three and four dimensional storytellers as sites for self actualizing leisure activity But how much do we really know about the moment by moment transactions that comprise the intricate experiences of visitors To strengthen the disciplinary knowledge base supporting exhibition design we must understand more about what goes on as people engage with the multifaceted communication environments that are contemporary exhibition spaces The in depth visitor centered research underlying this book offers nuanced understandings of the interface between visitors and exhibition environments Analysis of visitors meaning making accounts shows that the visitor experience is contingent upon four processes framing resonating channeling and broadening These processes are distinct yet mutually influencing Together they offer an evidence based conceptual framework for understanding visitors in exhibition spaces Museum educators designers interpreters curators researchers and evaluators will find this framework of value in both daily practice and future planning Designing for the Museum Visitor Experience provides museum professionals and academics with a fresh vocabulary for understanding what goes on as visitors wander around exhibitions
