Environmental Science High School:

High School Environmental Science Sterling Education, 2023-08-22 Thousands of students use Sterling to achieve academic success Comprehensive content book to master high school chemistry topics This book provides thorough coverage of high school environmental science topics teaching the foundational ideas and concepts necessary to master the core content The material is clearly presented and systematically organized for learning important principles and relationships providing comprehensive preparation From the foundations of Earth systems to the present day climate challenges students will develop a better understanding of ecosystems population dynamics use of natural resources as well as the political and social landscape of environmental challenges They will learn about Earth s biochemical cycles land and water use energy resources and their consumption the significance of the various environmental movements and global initiatives as well as how different human actions affect the overall balance within ecosystems Experienced science instructors prepared this learning material to build knowledge and skills crucial for understanding facts and events that shape the natural world Our editorial team reviewed and systematized the content for targeted and effective learning so students can significantly improve their understanding of the subject and succeed in class Many high school students find environmental science fascinating but a challenging discipline To earn a high grade in the subject they need to do well on tests and exams Understanding core material extracting and analyzing information and distinguishing between related concepts is more effective than memorizing terms With this book students master environmental science content and develop the ability to apply their knowledge on quizzes and tests *Environmental Science-High School Edition* G Tyler Miller, Scott Spoolman, 2010-01-02 Environmental Science Professor G Miller, 2002-05-16 ENVIRONMENTAL SCIENCE WORKING WITH THE EARTH Ninth Edition is a concise alternative to G Tyler Miller s best selling text LIVING IN THE ENVIRONMENT which redefines the environmental science course and sets the standard by which every other book for this course is judged This Ninth Edition is a significant all encompassing revision providing greater focus on the basic scientific content necessary to understand environmental issues in clear straightforward language It provides the latest developments and reflects several major shifts in environmental science education that are taking place in this century Designed as a foundational text for environmental science courses Miller s flexible book is adaptable to almost any approach and is the most widely embraced approach to environmental science in print today With fair and balanced coverage and Internet tools integrated throughout the book features an extensively developed art program writing that communicates scientific information clearly and effectively and the most current coverage of the subject The book s flexible organization means that it can be adapted to fit almost any syllabus Miller s more than thirty years of research and teaching expertise make this the definitive book on the subject A High School Environmental Science Curriculum Nancy J. Clark, Weber State University. School of Education, 1994 *The Development of a High School Environmental Science Curriculum* Winfield Augustine Peterson, 1974

Environment Peter H. Raven, Linda R. Berg, 2011-12-27 Raven's 8th edition of *Environment* offers more detailed content than the *Visualizing* text for a better understanding and integration of the core environmental systems and to view and analyze the role those systems play. Shorter but still comprehensive coverage focuses on ethical decision making and key local environmental science issues requiring readers to think critically about the course material outside of the classroom. Other features include brief text in the comprehensive segment, extensive chapter pedagogy to help reinforce the systems approach, more opportunities to think critically about how systems intersect and fit together, and new data interpretation questions at the end of each chapter. *A Course in Environmental Science for the High School* Neal Rappaport, 1973

Environmental Science, 2000-01-01 *Environmental Science* H. Hassenzahl, Linda R. Berg, Mary Catherine Hager, 2017-11-06 *Secondary Student Perceptions of Science Classroom Environment and Attitudes towards Sciences* Leona A. Candia, Lay Yoon Fah, 2019-11-18 Science education is important as it equips students with scientific knowledge that can enrich their everyday lives. It helps students to solve problems, learn to be rational as well as be critical in their thinking. However, science learning is deemed challenging as students see the subject as difficult and sometimes tedious to learn. Thus, interest in science is essential to ensure continuous learning in science. It is important to promote positive attitudes towards science among students. Positive attitudes towards science are associated with better achievement in science, increased cooperation as well as participation in class. Malaysia needs a generation who are creative and critical thinkers; thus, it is vital to enhance students' attitudes towards science. As students spend most of their time in a classroom, therefore, shaping students' perceptions of science classroom environment is crucial in enhancing their attitudes towards science. This book is adapted and modified from a master's degree thesis entitled *Relationship between Form 4 Students' Perceptions of Science Classroom Environment and Attitudes towards Science* of the first author. This book includes analysis of students' perceptions of science classroom environment and attitudes towards science. This book attempts to answer questions regarding the level of students' perceptions of science classroom environment, the level of students' attitudes towards the effect of gender and school locations on students' perceptions of science classroom environment and attitudes

towards science and the influence of perceptions of science classroom environment on students attitudes towards science
