Environmental Stewardship Critical Perspectives Past And Present:

The Cambridge Companion to Christianity and the Environment Alexander J. B. Hampton, Douglas Hedley, 2022-08-04 Christianity has understood the environment as a gift to nurture and steward a book of divine revelation disclosing the divine mind a wild garden in need of cultivation and betterment and as a resource for the creation of a new Eden This Cambridge Companion details how Christianity one of the world s most important religions has shaped one of the existential issues of our age the environment Engaging with contemporary issues including gender traditional knowledge and enchantment it brings together the work of international scholars on the subject of Christianity and the Environment from a diversity of fields Together their work offers a comprehensive guide to the complex relationship between Christianity and the environment that moves beyond disciplinary boundaries To do this the volume explains the key concepts concerning Christianity and the environment outlines the historical development of this relationship from antiquity to the present and explores important contemporary issues Post-Sustainability John Foster, 2018-10-22 The sustainability discourse and policy paradigm have failed to deliver In particular they have failed to avert the dangerously disruptive climate change which is now inevitable So if there is still a case for some transformed or revitalised version of sustainability that case must now surely be made in full acknowledgment of deep seated paradigm failure to date But if we really take ourselves to be living in a post sustainable world the issue of what next must be faced and the hard questions no longer shirked What options for political and personal action will remain open on a tragically degraded planet How will economic and community life political and social leadership and education be different in such a world What will the geopolitics of crisis migration and conflict look like Where does widespread denial come from how might it be overcome and are there any grounds for hope that don t rest on it The urgent challenge now is to confront such questions honestly This collection of essays by thinkers from a diversity of fields including politics philosophy sociology education and religion makes a start This book was originally published as a special issue of Global Discourse Rawls and the Environmental Crisis Dominic Welburn, 2016-12-08 The liberal political theorist John Rawls despite remaining largely silent on green concerns was writing during a time of increasing awareness that the ecological stability of the earth is being compromised by human activity Rawls s reluctance to engage with such concerns however has not stopped several scholars attempting to extend or expand his works to incorporate this newfound fear for the ecosystems that support human life But why Rawls What is to be gained from developing the ideas of a theorist whose primary aim was to establish a system of justice for contemporaneous rational and reasonable citizens of a liberal polity This research monograph offers a critical consideration of the contextual framework within John Rawls s Political Liberalism and considers its compatibility with the conceptual process of greening Rawls and the Environmental Crisis argues that Rawls s perceived neutrality on green concerns is representative of a widespread societal indifference to environmental degradation and describes the plurality of methodological and ethical approaches undertaken by green

political theorists in analyzing the contribution Rawls's theory makes to environmental concerns Addressing a series of key debates within contemporary political philosophy regarding a wider frustration with liberal theory in general Rawls and the Environmental Crisis will be of great interest to researchers in contemporary political philosophy environmental ethics green political theory stewardship theory and those interested in renewing existing conceptions of deliberative democracy

Creation, Environment and Ethics Rebekah Humphreys, Sophie Vlacos, 2010-09-13 Creation Environment and Ethics aims to contribute to a critical understanding of ethics evolution and creation and to provide a pluralistic response to some of the most pressing issues facing the global environment today Following the example of Professor Robin Attfield this volume aims to reflect the diverse responses with which theological ethical and evolutionary discourses have contributed to the broad scope of environmental philosophy and also to ongoing debates about creation and evolution Critiques of the work of Attfield are provided by prominent philosophers and Attfield provides a clear and thorough response to each of these critiques in turn The broad ranging nature of this book will appeal to environmentalists ethicists theologians and students alike Some of the contributions also offer more pragmatic approaches to environmental issues such as climate change development and sustainability which will be of interest to a general as well as to an academic readership **Dusty**

Earthlings John Mustol, 2018-01-01 The Lord God formed a man from the dust of the ground Genesis 2:7 Made of dust we humans are thoroughly physical beings We are dusty earthlings As such we are also ecological beings or rather eco physical beings firmly embedded in and dependent upon God's earthly ecosystems which support and provide for us and constitute our earthly home Today we are living in ways that are damaging our home As Christian dusty earthlings we are called to oversee God's earthly creation and to follow Jesus Christ God incarnated as a dusty earthling How do we do this in the face of the array of ecological problems we face today How can we obey the ecological principles and limits that govern all of life on God's good earth Mustol argues that the virtues of humility voluntary self limitation and the principles of kenosis and justice will help as we seek to follow Jesus as dusty earthlings in today's world **God and the EU** Jonathan Chaplin, Gary

Wilton, 2015-12-14 The current political economic and financial crises facing the EU reveal a deeper cultural indeed spiritual malaise a crisis in the soul of Europe Many observers are concluding that the soul of Europe cannot be restored to health without a new appreciation of the contribution of religion to its past and future and especially that of its hugely important but widely neglected Christian heritage which is alive today even amidst advancing European secularization This book offers a fresh constructive and critical understanding of Christian contributions to the origin and development of the EU from a variety of theological and national perspectives It explains the Christian origins of the EU documents the various ways in which it has been both affirmed and critiqued from diverse theological perspectives offers expert theologically informed assessments of four illustrative policy areas of the EU trade finance environment science and also reports on the place of religion in the EU including how religious freedom is framed and how contemporary religious including Muslim actors relate

to EU institutions and vice versa The book fills a major gap in the current debate about the future of the European project and will be of interest to students and scholars of religion politics and European studies Environmental Thought Robin Attfield,2021-03-16 Environmental thought has a rich and extensive history Philosopher Robin Attfield guides readers through the key developments and debates that have defined the field from ancient times to the present Attfield investigates ancient medieval and early modern environmental contributions Darwin and his successors the debate in America involving Thoreau Marsh Muir and Pinchot the foundation of the science of ecology in the Western world and twentieth century trailblazers like Aldo Leopold and Rachel Carson Central themes of key environmentalist works of the 1970s and 1980s are discussed along with the major debates in environmental philosophy including Lovelock s Gaia hypothesis Attfield then turns to the current environmental emergency encompassing the crises of climate change air pollution and biodiversity loss exploring contemporary intellectual responses to it Each chapter concludes with a list of recommended readings selected to invite readers to explore the book s topics in greater depth Environmental Thought A Short History will become a pivotal text in its field of interest to students and scholars of history philosophy ethics geography religion biology and environmental studies **Hope in the Age of Climate Change** Chris Doran,2017-04-27 It is difficult to be hopeful in the midst of daily news about the effects of climate change on people and our planet While the Christian basis for hope is the resurrection of Jesus unfortunately far too many American Protestant Christians do not connect this belief with the daily witness of their faith This book argues that the resurrection proclaims a notion of hope that should be the foundation of a theology of creation care that manifests itself explicitly in the daily lives of believers Christian hope not only inspires us to do great and courageous things but also serves as a critique of current systems and powers that degrade humans nonhumans and the rest of creation and thus cause us to be hopeless Belief in the resurrection hope should cause us to be a different sort of people Christians should think purchase eat and act in novel and courageous ways because they are motivated daily by the resurrection of Jesus This is the only way to be hopeful in the age of climate change Is Anyone in Charge Here? Selwyn Yeoman,2020-12-22 What are our responsibilities as human beings in the exercise of our undoubted powers over all other creatures and the earth itself The idea that human beings have dominion over the rest of creation is often regarded as the chief source of the world s current environmental crisis From the universities to talk back radio this is a commonly repeated theme but how strong is its basis Is Anyone in Charge Here is a critical conversation with the seminal Lynn White paper The Historical Roots of Our Ecologic Crisis Easter Island New Zealand and ancient Mesopotamia biblical exegesis historical theology monastic movements and current environmental challenges are all explored It examines the roots of the idea of human dominion how the idea has been understood through the centuries how people have worked it into their living and how it might be constructively applied in our current crisis All this is theologically evaluated in the light of Jesus Christ being both the true human and God s way of involvement in the world as creative Word representative image and serving Lord

Christian hermeneutics in South Africa Hendrik Goede, Nico Vorster, 2024-02-26 Hermeneutics remains a divisive and polarizing topic within scholarly and ecclesiastical communities in South Africa. These tensions are not limited to theoretical differences but often crystallize on a grassroots level when local churches and church assemblies have to make important decisions on controversial ethical topics such as ordaining women in church offices, assessing the ethics of gay marriages, and taking a stance on the land debate in South Africa. This book makes a unique contribution in two ways: firstly, it focuses on the uniquely South African hermeneutical landscape; secondly, it relates theories to practical ethical application. The unique scholarly contribution of this consists in it relating hermeneutics to ethics within the South African landscape. A diverse group of scholars have been invited to partake in the project and the views expressed are often quite diverse. This allows readers to develop an understanding and sensitivity of the various angles employed and the interests at stake in addressing difficult societal problems.

Science and Religion Gary B. Ferngren, 2017-03-01 An essential examination of the historical relationship between science and religion. Since its publication in 2002, *Science and Religion* has proven to be a widely admired survey of the complex relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century. In the second edition, eleven new essays expand the scope and enhance the analysis of this enduringly popular book. Tracing the rise of science from its birth in the medieval West through the scientific revolution, the contributors here assess historical changes in scientific understanding brought about by transformations in physics, anthropology, and the neurosciences, and major shifts marked by the discoveries of Copernicus, Galileo, Isaac Newton, Charles Darwin, and others. In seeking to appreciate the intersection of scientific discovery and the responses of religious groups, contributors also explore the theological implications of contemporary science and evaluate approaches such as the Bible in science and the modern synthesis in evolution, which are at the center of debates in the historiography of science. The second edition provides chapters that have been revised to reflect current scholarship, along with new chapters that bring fresh perspectives on a diverse range of topics, including new scientific approaches and disciplines and non-Christian traditions such as Judaism, Islam, Asiatic religions, and atheism. This indispensable classroom guide is now more useful than ever before. Contributors: Richard J. Blackwell, Peter J. Bowler, John Hedley Brooke, Glen M. Cooper, Edward B. Agricultural and Climate Change Adaptation Law in Africa Habib Sani Usman, 2025-02-17 This book presents an analysis of climate change and agricultural laws in Kenya, Nigeria, and South Africa in order to determine whether they adequately addressed the concept of agricultural adaptation. Agriculture is one of the

sectors of the economy that is contributing to climate change and at the same time the sector is heavily impacted by climate change Therefore agricultural adaptation is required Focusing on three countries this book provides a novel comparative examination of how and to what extent the law promotes agriculture focused adaptation in these countries The role of the law in addressing issues such as water management strategies soil conservation methods and crop production methods is discussed This book identifies gaps in the regulatory frameworks for agricultural adaptation and highlights the lack of adaptive capacity of African agriculture due to weak or non existing legal frameworks It discusses ways to remedy these gaps through specific on farm adaptation strategies legislative amendments to consolidate all relevant national climate change related policies and laws with agricultural policies and laws that have relevant provisions on adaptation as medium term solutions and the development of a specific framework law for agriculture focused adaptation incorporating essential agricultural adaptation strategies could perhaps be enacted as long term solutions to the regulatory gaps This book will be of great interest to students and scholars of law climate change food and agriculture sustainable development and African studies

Creation David Fergusson,2014-09-21 This book explores anew the theme of creation in Scripture tradition and contemporary theology David Fergusson defends the classical account of creation out of nothing but gives more sustained attention than the Christian tradition typically has given to the holistic significance of the created world Offering both doctrinal exposition and apologetic argument Fergusson discusses creation in relation to the problem of evil and the fall divine providence deism Darwinian evolution environmental ethics animal rights and other matters Unusually the book also touches on the topic of extraterrestrial intelligence Concise and accessible Fergusson s Creation will be particularly useful to students and others seeking a well informed overview of this important subject

New Meanings for Ancient Texts Steven L. McKenzie,John Kaltner,2013-01-01 As newer approaches to biblical criticism become more established and influential it is essential that students and other serious readers of the Bible be exposed to them and become familiar with them That is the main impetus behind the present volume which is offered as a textbook for those who wish to go further than the approaches covered in To Each Its Own Meaning by exploring more recent or experimental ways of reading from the introduction This book is a supplement and sequel to To Each Its Own Meaning edited by Steven L McKenzie and Stephen R Haynes which introduced the reader to the most important methods of biblical criticism and remains a widely used classroom textbook This new volume explores recent developments in and approaches to biblical criticism since 1999 Leading contributors define and describe their approach for non specialist readers using examples from the Old and New Testament to help illustrate their discussion Topics include cultural criticism disability studies queer criticism postmodernism ecological criticism new historicism popular culture postcolonial criticism and psychological criticism Each section includes a list of key terms and definitions and suggestions for further reading

Issues in Science and Theology: Global Sustainability Michael Fuller,Mark Harris,Joanna Leidenhag,Anne Runehov,2023-10-26 This volume brings together contributions from the 2022

conference of the European Society for the Study of Science and Theology held in lesund Norway to address the many urgent questions raised by the concept of global sustainability Scholars from the fields of philosophy theology and the sciences offer a variety of perspectives on global sustainability and on how the need for it can best be effected and sustained The material assembled here covering the roots of the present ecological crisis as well as means for addressing it from ecological societal and both Christian and Islamic theological perspectives inform discussions of these questions both within the academy and in wider public fora This text appeals to students and researchers in the field

Current Trends in New Testament Study

Robert E. Van Voorst,2020-01-15 This book focuses on seven of the most important formal methods used to interpret the New Testament today Several of the chapters also touch on Old Testament Hebrew Bible interpretation In line with the multiplicity of methods for interpretation of texts in the humanities in general New Testament study has never before seen so many different methods This situation poses both opportunities and challenges for scholars and students alike The articles in this book introduce the latest methods and give examples of these methods at work The seven methods are as follows post colonial narrative historical performance mathematical analysis of style womanist and ecological

Rights of Nature in Europe Jenny García Ruales,Katarina Hovden,Helen Kopnina,Colin D. Robertson,Hendrik Schoukens,2024-04-09 This book addresses the recognition of the Rights of Nature RoN in Europe examining their conceptualisation and implementation RoN refers to a diverse set of legal developments that seek to redefine Nature s status within the law gradually emerging as a novel template for environmental protection Countries like Ecuador and New Zealand each with distinct histories and ways of dwelling in the world have pioneered a new era in environmental governance by legally acknowledging rights or personhood for nature ecosystems and more than human populations In recent years Europe has witnessed growing interest in RoN with academic legislative and political initiatives gaining momentum A significant development is the September 2022 passage of a law in the Spanish Parliament granting legal personhood and rights to the Mar Menor a saltwater lagoon severely affected by environmental degradation Given the diversity in interpretations and articulations of Rights of Nature this edited volume argues that their arrival in Europe fosters different kinds of interactions across distinct areas of law knowledge practices and societal domains The book employs a multidisciplinary approach exploring these interactions in law and policy anthropology Indigenous worldviews and jurisprudence philosophy spiritual traditions critical theory animal communication psychology and social work This book is tailored for scholars in law political science environmental studies anthropology and cultural studies as well as legal practitioners NGOs activists and policy makers interested in ecology and environmental protection

Ecological Hermeneutics

David G. Horrell,Cherryl Hunt,Christopher Southgate,Francesca Stavrakopoulou,2010-06-02 Leading scholars reflect critically on the kinds of appeal to the Bible that have been made in environmental ethics and ecotheology and engage with biblical texts with a view towards exploring their contribution to an ecological ethics The essays explore the kind of hermeneutic necessary for such engagement to be fruitful for contemporary

theology and ethics Crucial to such broad reflection is the bringing together of a range of perspectives biblical studies historical theology hermeneutics and theological ethics The thematic coherence of the book is provided by the running focus on the ways in which biblical texts have been or might be read This volume is not about ecotheology but is instead about ecological hermeneutics Indeed some essays show where biblical texts or particular approaches in the history of interpretation represent anthropocentric or even anti ecological moves One of the overall aims of the book is to suggest how and why an ecological hermeneutic might be developed and the kinds of interpretive choices that are required in such a development
