Environmental Conservation Raymond F. Dashmann, 1968 *Environmental Conservation* Raymond F. Dashmann, 1984-02-24 Conservation the survival option The oldest ways The newer ways The nature of the environment The biotic regions Increase and multiply the population story Energy the devil's bargain Finding food Most of the planet water The wilder lands forest and range The wildest lands How to make the earth uninhabitable Ecodevelopment a different way to go **Environmental Conservation, the Oil and Gas Industries** National Petroleum Council. Committee on Environmental Conservation--the Oil and Gas Industries, 1972 African Philosophy and Environmental Conservation Jonathan Chimakonam, 2017-10-04 African Philosophy and Environmental Conservation is about the unconcern for and marginalisation of the environment in African philosophy The issue of the environment is still very much neglected by governments corporate bodies academics and specifically philosophers in the sub Saharan Africa The entrenched traditional world views which give a place of privilege to one thing over the other as for example men over women is the same attitude that privileges humans over the environment This culturally embedded orientation makes it difficult for stakeholders in Africa to identify and confront the modern day challenges posed by the neglect of the environment In a continent where deep rooted cultural and religious practices as well as widespread ignorance determine human conduct towards the environment it becomes difficult to curtail much less overcome the threats to our environment It shows that to a large extent the African cultural privileging of men over women and of humans over the environment somewhat exacerbates and makes the environmental crisis on the continent intractable For example it raises the challenging puzzle as to why women in Africa are the ones to plant the trees and men are the ones to fell them Contributors address these salient issues from both theoretical and practical perspectives demonstrating what African philosophy could do to ameliorate the marginalisation which the theme of environment suffers on the continent Philosophy is supposed to teach us how to lead the good life in all its forms why is it failing in this duty in Africa specifically where the issue of environment is concerned This book which trail blazes the field of African Philosophy and Environmental Ethics will be of great interest to students and scholars of Philosophy African philosophy Environmental Ethics and Gender Studies *Conservation and Environmentalism* Robert C. Paehlke, 2013-04-03 Focusing on both problems and solutions this authoritative reference work maintains a healthy balance between science and the social sciences in its coverage of all aspects of the environment The book is arranged alphabetically and is divided into three major sections Ecology Pollution and Sustainability The list of 240 contributors reads like a who's who of the world's leading conservation and environmental professionals Best Reference Source Outstanding Reference Source The Rise of the American Conservation Movement Dorceta E. Taylor, 2016-08-04 In this sweeping social history Dorceta E Taylor examines the emergence and rise of the multifaceted U S conservation movement from the mid nineteenth to the early twentieth century She shows how race class and gender influenced every aspect of the movement including the

establishment of parks campaigns to protect wild game birds and fish forest conservation outdoor recreation and the movement's links to nineteenth century ideologies Initially led by white urban elites whose early efforts discriminated against the lower class and were often tied up with slavery and the appropriation of Native lands the movement benefited from contributions to policy making knowledge about the environment and activism by the poor and working class people of color women and Native Americans Far ranging and nuanced The Rise of the American Conservation Movement comprehensively documents the movement's competing motivations conflicts problematic practices and achievements in new ways

Mahoney, Valerius Geist, 2019-09-10 The foremost experts on the North American Model of Wildlife Conservation come together to discuss its role in the rescue recovery and future of our wildlife resources At the end of the nineteenth century North America suffered a catastrophic loss of wildlife driven by unbridled resource extraction market hunting and unrelenting subsistence killing This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process not merely halting the extinctions but returning wildlife to abundance While there was great understanding of how to manage wildlife in Europe where wildlife management was an old mature profession Continental methods depended on social values often unacceptable to North Americans Even Canada a loyal colony of England abandoned wildlife management as practiced in the mother country and joined forces with like minded Americans to develop a revolutionary system of wildlife conservation In time and surviving the close scrutiny and hard ongoing debate of open democratic societies this series of conservation practices became known as the North American Model of Wildlife Conservation In this book editors Shane P

Mahoney and Valerius Geist both leading authorities on the North American Model bring together their expert colleagues to provide a comprehensive overview of the origins achievements and shortcomings of this highly successful conservation approach This volume reviews the emergence of conservation in late nineteenth early twentieth century North America provides detailed explorations of the Model s institutions principles laws and policies places the Model within ecological cultural and socioeconomic contexts describes the many economic social and cultural benefits of wildlife restoration and management addresses the Model s challenges and limitations while pointing to emerging opportunities for increasing inclusivity and optimizing implementation Studying the North American experience offers insight into how institutionalizing policies and laws while incentivizing citizen engagement can result in a resilient framework for conservation Written for wildlife professionals researchers and students this book explores the factors that helped fashion an enduring conservation system one that has not only rescued recovered and sustainably utilized wildlife for over a century but that has also advanced a significant economic driver and a greater scientific understanding of wildlife ecology Contributors Leonard A Brennan Rosie Cooney James L Cummins Kathryn Frens Valerius Geist James R Heffelfinger David G Hewitt Paul R Krausman Shane P Mahoney John F Organ James Peek William Porter John Sandlos James A Schaefer
